There has been issued since that time on same account,	181,500 00
	<hr/>
Making total issued to the 1st day of November, 1855,	\$1,222,000 00

Five per cent. Deferred Special Canal Stock.

There has been issued on account of bonds surrendered up to the 1st day of November, 1854,	\$335,775 00
There has been issued since that time on same account,	125,970 00
	<hr/>
Making a total issued to the 1st day of November, 1855,	\$461,745 00

ABSTRACT OF STATE DEBT SINKING FUND REGISTER.

STATEMENT of Stocks purchased from the 1st day of November, 1854, to the 1st day of November, 1855.

DATE.	Number.	Amount.	TO WHOM ISSUED	Kind of Stock.	OF WHOM PURCHASED.	DATE OF PURCHASE.	Price.	Total.
October 21, 1853.....	2165	\$1,800 00	{ Auditor of the State of Indiana in trust for the Traders' Bank at Indianapolis.....	2½	This stock was purchased by the Auditor and Treasurer of State, and Agent of State has never been furnished with a statement of the purchase.	Jan. 9th, 1855. Date of transfer on the books of this Agency, } May 14th, 1855.		
September 21, 1854....	2225	200 00	{ Auditor of the State of Indiana in trust for the Traders' Bank at Indianapolis.....	2½	do do do	do do do		
April 19, 1854.....	2289	9,547 50	{ Auditor of the State of Indiana in trust for the Bank of Warsaw	2½	do do do	Jan 22, 1855. Date of transfer on the books of this Agency, } May 14, 1855.		
October 26, 1854.....	2261	25,000 00	{ Auditor of the State of Indiana in trust for the State Stock Security Bank.....	5	do do do	Feb. 26, 1855. Date of transfer on the books of this Agency, } May 29, 1855.		

After obtaining the advice and consent of your Excellency, the Auditor, Treasurer, and Secretary of State, I rented an office, (No. 27, Wall street,) and took possession of the same on the first day of May, last

The office formerly occupied was so small and so high from the ground that it was not safe to remain longer in it,—the books and papers of the Agency having accumulated to such an extent, that in case of fire, a portion of them at least, must have been destroyed. In this office I have a vault in addition to an iron safe, in which all the important papers are secured.

JOHN M. LORD,

Agent of State.

ABSTRACT of Indiana State Bonds surrendered by non-subscribers, from the 31st day of October, 1854, to the 1st day of November, 1855.

REPORT

OF THE CONDITION OF THE

STATE BANK OF INDIANA,

AND

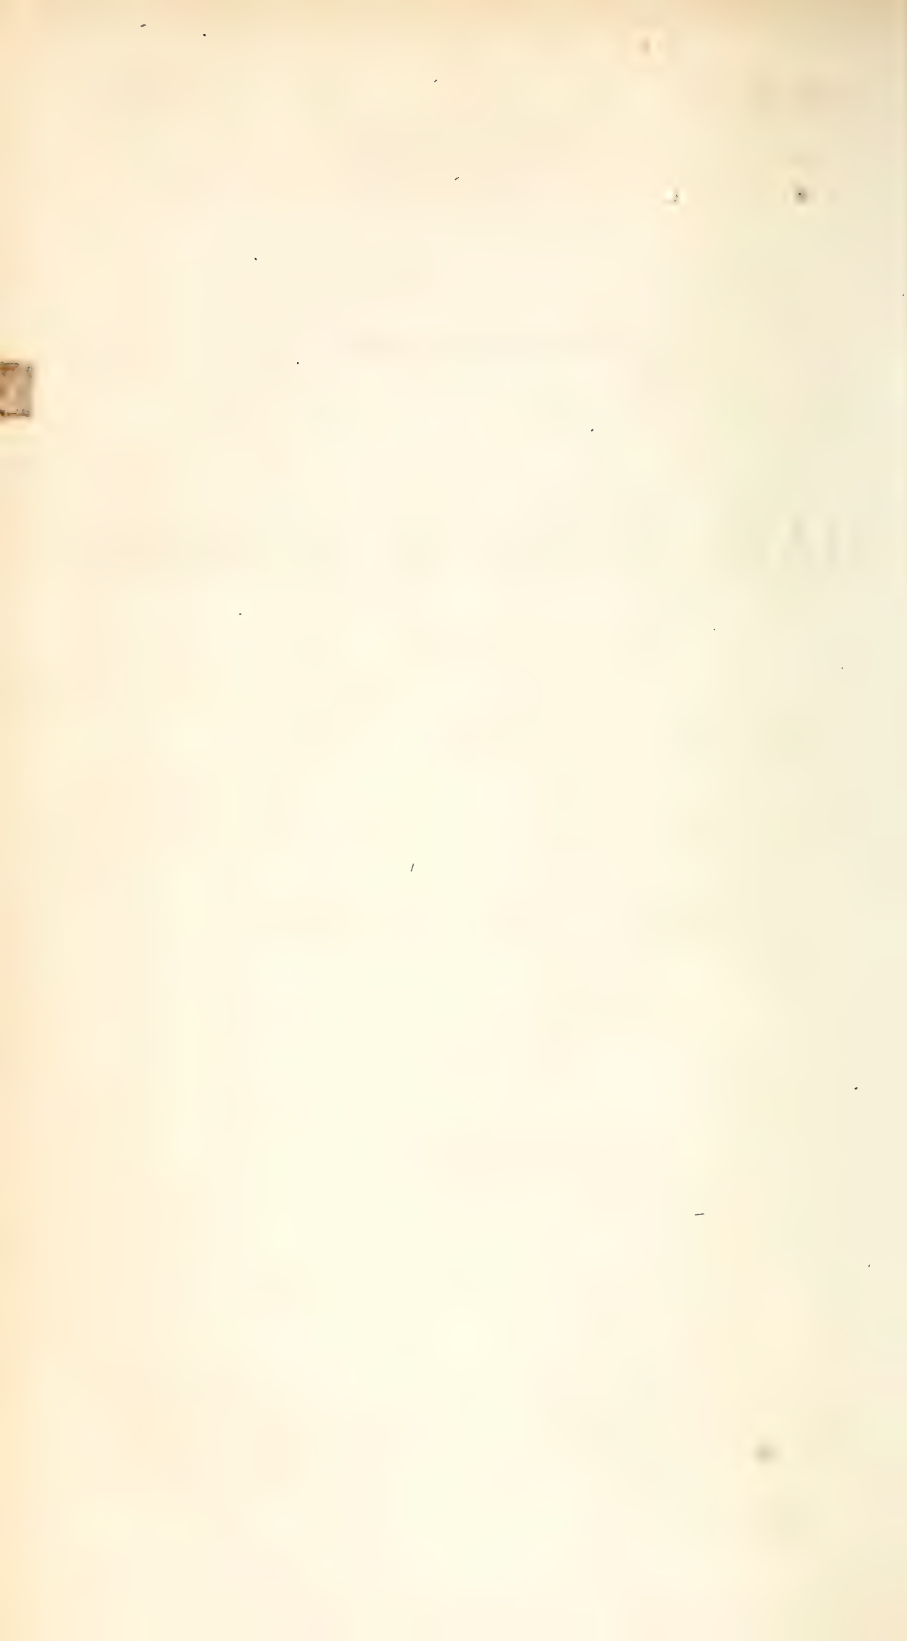

EACH OF ITS BRANCHES.

TO THE GOVERNOR.

INDIANAPOLIS:

WILLIAM J. BROWN, STATE PRINTER.

1855.

OFFICE OF THE STATE BANK OF INDIANA, }
Indianapolis, Nov. 24, 1855. }

To His Excellency, JOSEPH A. WRIGHT, Governor.

SIR:—Herewith I have the honor to transmit the annual report of the State Bank of Indiana, and of each of the branches thereof, on the 31st day of October last.

Respectfully,
E. DUMONT, *President.*

REPORT.

OFFICE OF THE STATE BANK OF INDIANA, }
Indianapolis, Nov. 24, 1855. }

His Excellency, JOSEPH A. WRIGHT,
Governor of the State of Indiana:

SIR:—I herewith submit, on behalf of the Directors of this Institution, the annual report of the condition of the State Bank, and of each branch thereof, on the 31st day of October last.

For a brief view of the continued prosperity of the Bank, and its profitable results to the State and other stockholders, I present the following summary, comparing the present condition of the Bank, with that existing at the time of my last annual report:

The amount of notes and bills discounted, is \$4,678,780 00; being an increase of \$480,196 00, or nearly a half million of dollars.

The amount of circulation is \$3,335,726 00; being an increase of \$357,380 00.

The amount of gold and silver on hand is \$1,223,200 00; being an increase of \$136,232 00.

The amount of eastern means on hand is \$707,634 00; being an increase of \$193,567 00.

The amount of the surplus fund is \$1,228,301 00; being an increase of \$119,345 00.

Profits, at the following respective rates, have been divided to the branches, on their capital stock, including extra dividends, during the past year:

To the branch at Terre Haute.....	28 per centum.
To the branches at Indianapolis and Ft. Wayne each,	21 per centum.
To the branch at South Bend.....	20 per centum.
To the branch at Michigan City.....	17 per centum.
To the branch at Richmond.....	16 per centum.
To the branch at New Albany	14 per centum.

To the branch at Madison	13 per centum.
To the branches at Lawrenceburgh and Vincennes, each	12 per centum.
To the branch of Evansville	11 per centum.
To the branches at Lafayette and Bedford, each .	10 per centum.

In reference to the power of the Bank to discount, or to issue notes of circulation ceasing after the 1st day of January, 1857, and that the closing of the business of the Bank, for which (two years thereafter, until January 1, 1859, is given by her charter,) may be expedited as much as may be practicable, with as little pressure on the community as is possible, the following resolution was unanimously adopted at the late session of the Board of Directors of the Bank, held during the present month.

“Resolved, That in view of the approaching close of the Bank, it is recommended to the several branches, that they call in at least twenty-five per cent. every four months, on all standing or accommodation loans; and in future confine their discounts to strictly prompt paper, to be paid at maturity.”

Respectfully submitted,

E. DUMONT, *President.*

REPORT

OF

THE COMMISSIONERS

OF

THE SINKING FUND.

TO THE GOVERNOR.

INDIANAPOLIS:

WILLIAM J. BROWN, STATE PRINTER.

1855.

1 D J.—17

THE

THE

THE

REPORT.

OFFICE OF THE COMMISSIONERS OF THE SINKING FUND,
Indianapolis, December 8, 1855.

His Excellency, JOSEPH A. WRIGHT, Governor:

SIR: — Herewith the Commissioners of the Sinking Fund submit their annual report of the condition of the Fund, on the fifth day of November last, at which date it is made, that it may conform as near as may be to the date of reports of public officers generally made to you by law.

Statement A. exhibits the whole condition of the Fund.

Statement B. exhibits the results of the business of the Fund, from December 4, 1854, the date of the last annual report to the date of this, as above, November 5, 1855.

Four of the bonds of the State issued for her bank capital, have been purchased since the last annual report; the remainder of the means have been used as heretofore in loans on mortgages of real estate, in making which it is our endeavor to require ample security for the Fund.

The dividend, on the capital stock of the State Bank of Indiana, for the profits of the bank, for the last six months, ending on the 31st day of October last, had not been declared at the date of this report; the amount of which, however, being now known, will be an increase of the means of the Fund, over and above, providing for the interest on the bonds of the State, which is chargeable on the Fund, of fifty-four thousand nine hundred and fifty-five dollars and nineteen cents, in addition to the exhibit by the accompanying report.

I have the honor to be

Your obedient servant,

E. DUMONT, *President.*

THE HISTORY OF THE

CHURCH OF LAMMA

100

REPORT.

OFFICE OF THE SECRETARY OF STATE, }
Indianapolis, Oct. 31, 1855. }

To His Excellency, JOSEPH A. WRIGHT,
Governor of the State of Indiana.

SIR :—In obedience to the requirements of Section one, of Chapter one hundred and two, of Session Acts of 1853, I submit the following report for the year 1855.

I entered upon the duties of this office the 15th day of January last. The acts of the last session of the Legislature fixing the time of holding courts in the 2nd, 5th, 8th, 9th, and 11th, and creating the 12th and 13th Judicial Circuits, together with the act fixing the time of holding, and the length of terms of the Courts of Common Pleas, in the several counties of the State; the act to provide for a general system of Common Schools, and the act to prohibit the sale of intoxicating liquors, were distributed in accordance with the requirements of the several acts. The act prohibiting the manufacture and sale of spirituous and intoxicating liquors, was the only one of the foregoing acts that required the Clerks of the several counties to certify to this office, the time of filing it in their respective offices; the last certificate acknowledging the receipt and filing of that act was received at this department on the 21st day of May, A. D. 1855, from the county of Starke.

June 22nd, contracts were made with the following named persons

at the rate named, for the distribution of the Laws, Journals, &c., of 1855, to wit:

In the 1st Judicial Circuit, with Daniel B. Culley, at	\$16,00
In the 2nd Judicial Circuit, with G. W. Richardson, at	35,00
In the 3rd Judicial Circuit, with John H. Ohr, at . . .	50,00
In the 4th Judicial Circuit, with S. S. Bloom, at	20,00
In the 5th Judicial Circuit, with William M. Munroe, at	10,00
In the 6th Judicial Circuit, with Charles Woodward at	25,00
In the 7th Judicial Circuit, with Henry S. Rockey at .	9,00
In the 8th Judicial Circuit, with Edwin Seaman, at . . .	33,00
In the 9th Judicial Circuit, with T. J. Williams, at . . .	73,00
In the 10th Judicial Circuit, with R. K. May, at	93,00
In the 11th Judicial Circuit, with David Braden, at . .	34,00
In the 12th Judicial Circuit; with William Braden, at	19,00
In the 13th Judicial Circuit, with David Strickland, at	17,00

Total \$434,00

The contracts entered into as above were all performed within the time specified in their respective bonds; and the books were all received in good condition, except one box, and in that there was not sufficient damage to amount to any thing.

Believing that the interest of the Common Schools would be better subserved by having the law generally distributed among the people in pamphlet form, with such forms and explanations as would have a tendency to develop the school system according to the spirit of the law, together with explanations, instructions and forms of proceeding as prepared by the Superintendent of Public Instruction, a large number of such pamphlets were put into the boxes with the laws; and three copies of vol. 4, of Porter's Indiana Reports in each box, all of which were not named in the advertisement for bids to distribute the laws, and consequently was an extra charge, amounting to one third of the whole amount for distributing the laws, &c., which has been allowed by the State Board of Officers.

All of which is respectfully submitted,

ERASMUS B. COLLINS,

Secretary of State.

ANNUAL REPORT

OF THE

AUDITOR OF STATE,

OF THE

STATE OF INDIANA.

SHOWING THE RECEIPTS AND EXPENDITURES OF THE TREASURY DEPARTMENT FOR
THE FISCAL YEAR ENDING OCTOBER 31, 1855.

TO THE GOVERNOR.

INDIANAPOLIS:

R E P O R T.

OFFICE OF AUDITOR OF STATE, }
Indianapolis, Dec. 10, 1855. }

To His Excellency JOSEPH A. WRIGHT,
Governor of Indiana :

SIR: In accordance with the provisions of an act, entitled "An act to provide for Annual Reports of State Officers, Branches of the State Bank, and Benevolent Institutions, to be made to the Governor," approved Feb. 3, 1853, I submit the Report required to be made from this Department, of "the revenues, taxables, funds, resources, incomes and property of the State," together with the expenditures of the fiscal year ending October 31, 1855, and the condition of the finances of the State.

For the purpose of distinctness, the various matters in relation to which it is my duty to furnish information, are classified as follows, viz :

I. *A General Statement of the Receipts and Expenditures, during the fiscal year.*

II. *A Statement of the several appropriations, the amounts expended, the amounts overdrawn, and the balance remaining unexpended.*

III. *A Statement in detail of the Receipts and Expenditures of the various Trust Funds, and the Funds for the Benevolent Institutions.*

IV. *The State Debt.*

V. *The Common School Fund.*

VI. *Wabash and Erie Canal.*

VII. *Swamp Lands.*

VIII. *Agricultural Products.*

IX. *Free Banking Operations.*

X. *General Remarks.*

XI. *Appendix.*

NUMBER III.

A STATEMENT in detail of the receipts and disbursements of the various Trust Funds, including the Funds for the Benevolent Institutions.

UNIVERSITY FUND.

The receipts and disbursements on account of this fund during the fiscal year ending Oct. 31, 1855, were as follows:

Receipts.

Loans refunded	5,738 13
Interest received on loans	8,394 87
Sales of University lands, principal	823 45
Interest on sales of land	275 90
Damages on sales of lands mortgaged	494 12
Excess on sales of lands	979 55
Costs of advertising	159 75
Total receipts	<u>\$16,865 77</u>

Disbursements.

Principal refunded	1,446 50
Interest on loans refunded	596 93
Excess on sales refunded	617 25
Damages on sales refunded	342 87
Loans made to borrowers	5,700 00
Costs of advertising refunded	42 25
Professors' salaries	3,912 50
Expense of Fund	1,316 00
Deficiency of Fund, Oct. 31, 1854	1,913 56
	<u>15,887 86</u>
Balance on hand Oct. 31, 1855	<u>\$977 91</u>

The large amount of principal, interest, excess of sales, damages, and costs refunded, grew out of the fact that the sales made in December last were illegal, the public notice of the sale not having been given the length of time required by law. On this account the sum of \$3,003 55 was refunded to the purchasers, they surrendering all claim to the lands purchased by them at the sale.

LOAN ACCOUNT.

The amount outstanding on loans October 31, 1854,	
was,	\$77,607 59
Loans refunded during the year 1855,	4,291 63
	<hr/>
	73,315 96
New loans made during the year,	5,700 00
	<hr/>
Making the outstanding loans,	<u>\$79,015 96</u>

Since 1849 no separate interest account has been kept, the Auditor deeming it proper, under the authority of Sec. 66, Chap. 13, Revised Statutes of 1843, the provisions of which are also found in Sec. 54, Chapter 114, Revised Statutes of 1852, to add all surplus interest to the principal, and place it on loan. Prior to 1849, a separate interest account was kept, and the balance on hand, on the 31st of October, 1849, was \$3,341 72. The salaries of the President and Professors, at the present rates, including incidental expenses, amount to but little short of \$5,000 per annum. The interest on the amount loaned, if punctually received, will very little exceed that sum, not enough to pay what should be allowed for its management at the State Treasury. Of course any default in the payment of interest, (and there is always more or less default,) would leave a deficiency to meet the warrants issued by the University.

For the purpose of adjusting the claim of the Vincennes University against the State on account of the appropriation of the proceeds of the seminary township of Gibson county to the State University at Bloomington, the General Assembly passed an act, approved Feb. 13, 1855, directing the Auditor and Treasurer of State to ascertain the amount equitably due to the Trustees of the Vincennes University by virtue of a decree of the Marion Circuit Court, limiting the sum to the amount of the judgment, interest, and costs; and, having ascertained the amount due, to issue to the Board of Trustees of the State University, in full payment of the same, State bonds bearing 6 per cent. interest, the principal payable in thirty years from their date, and the interest payable semi-annually on the first days of July and January. The Auditor and Treasurer accordingly, as required by this act, investigated the subject, and ascertained the amount due under the decree, to be \$66,585 00, for which amount bonds of the description aforesaid were issued, and delivered to the parties claiming them under the law. This, of course, will add to the annual burdens of the State the sum of \$3,395 10, for the payment of the interest on the bonds, and also over \$66,000 for the redemption of the principal when due.

SALINE FUND.

Receipts.

Amount on hand Oct. 31, 1854,	3,186 41
Loans refunded, sales of land, &c, . . .	2,851 74
Interest on loans,	1,099 40
Damages on sales of lands,	90 00
Costs of advertising,	16 00
Total,	<u>\$7,243 55</u>

Expenditures.

Expenses of fund,	\$273 85
Damages refunded,	50 00
Principal refunded,	450 00
Costs of advertising, refunded,	4 00
Interest refunded,	59 50
Balance on hand, Oct. 31, 1855, . . .	6,406 20
	<u>\$7,243 55</u>

The same remark made in regard to the principal, interest, &c., refunded of the University Fund, applies to this fund, and also to the Bank Tax, the Surplus Revenue, and the Congressional Township Funds, the sales being illegal, the amounts paid by purchasers were of course refunded by warrants on the Treasury.

LOAN ACCOUNT.

Outstanding on loans at close of fiscal year ending October 31, 1854,	\$13,714 26
Refunded during the year ending Oct. 31, 1855, . . .	1,262 54
Total outstanding on loan Oct. 31, 1855,	<u>\$12,451 72</u>

BANK TAX FUND.

Receipts.

Balance on hand Oct. 31, 1854,	4,206 99
Amount from Banks under 15th section of Charter, .	1,830 73
Loans refunded, &c,	2,575 96
Interest on loans,	586 88
Costs of advertising,	2 00
	<u>\$9,202 56</u>
Expenses of Fund,	104 51

Principal refunded,.....	316 37	
Balance on hand Oct. 31, 1855,.....	8,781 68	
	<hr/>	\$9,202 56

This fund is derived from the tax (twelve and a half cents on each share) on individual stock in the several Branches of the State Bank of Indiana, according to the provisions of the 15th section of the Bank Charter, and the whole amount received up to the 31st of October, 1854, was \$56,408 86

The amount received during the year ending Oct.

31, 1855, was as follows, viz:

From Madison Branch Bank,.....	\$316 37
From Evansville Branch Bank,.....	183 88
From New Albany Branch Bank,....	217 75
From Richmond Branch Bank,.....	271 87
From South Bend Branch Bank,.....	200 00
From Lawrenceburgh Branch Bank, ..	246 87
From Vincennes Branch Bank,.....	147 12
From Bedford Branch Bank,.....	129 41

Total receipts from Banks to Oct. 31, 1855,.....	1,713 27
--	----------

\$58,122 13

N. B. The remainder of the Branches have arranged for the payment of the amounts due, but at the close of the fiscal year the official receipts had not been given, and of course they do not yet appear on the Books.

LOAN ACCOUNT.

The amount outstanding on loans at the close of the fiscal year ending Oct. 31, 1854, was.....	\$7,271 85
Amount refunded during the year 1855.....	445 00
	<hr/>
	\$6,826 85

COUNTY SEMINARY FUND DERIVED FROM MILITIA FINES.

Amount on hand Oct. 31, 1854,.....	<u>\$445 00</u>
------------------------------------	-----------------

This fund was derived from militia fines collected from persons conscientiously scrupulous of bearing arms, and remains just as it was in 1843, no distribution having been made since, and the fund having received no accessions.

SURPLUS REVENUE FUND.

This fund is held in trust for the counties of Lake, Wells, and DeKalb, being a portion of the surplus revenue of the General Government deposited with the State in accordance with the act of Congress of June 23, 1836, belonging, in equal amounts, to the counties named. In pursuance of an act of the General Assembly of February 6, 1837, the fund was loaned and the interest paid to the respective counties. By the act of 24th January, 1842, the principal and interest, as they become due, have been paid over once a year to the counties to which the funds belong, and no loans of the fund have been since made.

The receipts and disbursements of this fund during the fiscal year ending Oct. 31, 1855, are as follows:

Receipts.

Balance on hand Oct. 31, 1855,	\$192 59
Loans refunded during the year,	1,152 00
Interest on loans,	677 00
Excess paid on sales of lands,	79 00
Damages on sales of lands,	52 50
Costs of advertising,	10 00
	<hr/>
	\$2,163 09

Expenditures.

Principal refunded on account of illegal sales,	586 00
Interest refunded,	150 00
Excess of sales refunded,	79 00
Amount distributed to Lake Co.,	64 19
Amount distributed to Wells Co.,	64 19
Amount distributed to DeKalb Co.,	64 20
Damages refunded,	25 00
Costs of advertising,	2 00
Expense of fund,	41 36
	<hr/>
	1,075 94

Total,	<u>\$426 58</u>

Disbursements.

Amount distributed to Lake County,.....	64 19
Balance due to Lake County Oct. 31, 1855,....	<u>\$362 39</u>

CONGRESSIONAL TOWNSHIP FUND.

This was a small fund, deposited in the treasury under an act passed Feb. 2, 1833, by two townships, one in Ripley and one in Greene County, to be managed for them. The amount originally received from the said townships was \$1,348, of which \$910 belonged to the township in Ripley county, and \$438 to the township in Greene. The Legislature in 1851 passed an act directing the Auditor of State to return the funds in moneys and securities to the townships to which the funds belonged. The Auditor in his report to the Legislature in December, 1851, states the fund at \$1,439 30, giving to Ripley \$986 74, and to Greene \$452 60, and announces an adjustment of the accounts by giving to Ripley county two mortgages amounting to \$753 30, and \$253 44 in money, and to Greene county a mortgage for \$250 and \$202 56 in cash. Since that time, the interest of the mortgages set apart, and so much of the principal as has been refunded, have been paid over. On an examination of the books, however, I find that, besides the mortgages set apart for the reimbursement of this fund, a mortgage for \$400, belonging to the Bank Tax Fund, has been regarded as belonging to the Congressional Township Fund, and the interest paid on that mortgage has been erroneously credited to that fund on the books. This error can be corrected before the accounts are finally closed, and the amount improperly paid, if any, charged to the townships.

The receipts and disbursements of this fund for the last year are as follows, viz:

Receipts.

Balance reported to be on hand Oct. 31, 1854,.....	\$17 50
Loans refunded,.....	350 00
Interest on loans,.....	238 75
Damages on sales of land,.....	52 50
Excess on sales of land,.....	17 50
Costs of advertising,.....	2 00
	<hr/>
	\$678 25

Expenditures.

Expense of fund,.....	\$26 10	
Principal refunded, (illegal sales),....	475 50	
	<hr/>	\$501 60
Balance due Oct. 31, 1855,.....		<hr/>
		\$176 65

The ledger balance varies \$34 50 from this balance, arising from the erroneous appropriation of Bank Tax Fund interest. No distribution of the fund was made during the last fiscal year.

THREE PER CENT. FUND.

Balance in the Treasury Oct. 31, 1854,	\$32 13
--	---------

Nothing has been received on account of this fund since February, 1844. There is an admitted balance due the State of a pretty large amount, negotiations for the payment of which have been in progress for several years between the authorities of the State and general Government. The difficulty in obtaining the amount acknowledged to be due, arises from the fact that the Government of the United States is the holder of Indiana State Bonds of a considerable amount, held in trust for other parties, the interest on which has not been paid since 1841.

COMMON SCHOOL FUND DERIVED FROM SINKING FUND.

Amount received of this fund to Oct 31, 1853,	\$780,886 66
Since which none has been paid over.	

This fund arises from the profits of the Sinking Fund, and has been absorbed by the redemption of the five per cent. scrip (commonly called Bank Scrip,) issued under authority of an act of the Legislature, passed Jan. 31, 1842, to pay the State's indebtedness to several of the Branches of the State Bank, for advances made to aid in carrying on the internal improvements then in progress in the State. It is of course a debt due from the State to the Common School Fund, to be reimbursed at the pleasure of the State.

INDIANAPOLIS FUND.

Amount outstanding on loans Oct. 31, 1855,	\$483 30
No receipts or disbursements since that time.	

TREASURY FUND.

NUMBER IV.

STATE DEBT.

The Public Debt of the State, formerly divided into what was denominated *foreign* and *domestic*, is now principally foreign, the domestic debt (except that which is due to the Common School Fund occasioned by the redemption of the Bank Scrip by the profits of the Sinking Fund) having been almost entirely extinguished. The foreign debt was created by the sale of State Bonds, first to construct the Wabash and Erie Canal, and afterwards to carry on the system of internal improvements authorized by the celebrated bill of 1836. Bonds continued to be sold from year to year until about 1839. The indebtedness of the State in 1841, when the interest ceased to be paid, was over \$11,000,000. The interest on this indebtedness, (over half a million per annum,) accumulated up to 1847, when, at the instance of the Agent of the Bondholders, the Legislature passed an act, entitled "an act supplementary to an act to provide for the funded debt of the State of Indiana, and for the completion of the Wabash and Erie Canal to Evansville," approved Jan. 19, 1846. The object of this bill was to so arrange the indebtedness of the State that the creditors should receive the Wabash and Erie Canal, and the lands granted to the State to aid in its completion, in full payment of one half of the State's indebtedness, principal and interest, and the State should issue new Bonds for the payment of the other half of the interest and principal due. The State Stocks issued for the redemption of one half of the State Debt are of the following kinds, viz:

1st. "Five per cent. State Stock," being for one half of the principal of the Bonds surrendered.

2d. "Two and one half per cent. State Stock," being for one half the *accrued* and one per cent of *accruing* interest on the Bonds surrendered.

For the payment of these two Stocks only is the State responsible. The bonds issued for the principal were to draw four per cent. interest from the consummation of the arrangement to the 1st of January, 1853, and afterwards five per cent. until redeemed, which may be done at the pleasure of the State after the expiration of twenty years. The Bonds issued for the accrued and one per cent. accruing interest, being the $2\frac{1}{2}$ per cent. Stocks, required no interest to be paid on them until 1853, and then only at the rate of $2\frac{1}{2}$ per cent. per annum.

For the payment of the other half of the debt, principal and interest, various kinds of Canal Stocks have been issued, for the payment of which the State is in no wise responsible.

One of the conditions of the arrangement was, that the Bondholders should complete the Canal from Terre Haute to Evansville. This has been done, and the Canal is now in operation the whole length of the State.

FOREIGN STATE DEBT.

The following statement of the condition of the Public Debt is furnished by the Agent of State, viz:

“STATEMENT of the Condition of the Public Debt of Indiana.

Bonds Surrendered.

There was outstanding on the 1st day of Nov. 1854,	
798 bonds, of \$1,000 each	\$798,000 00
There have been surrendered since that time, 363	
bonds, of \$1,000 each,	363,000 00
	<hr/>
Leaving outstanding on the 1st of Nov., 1855, . .	435,000 00

Five per cent. State Stock.

There had been issued on account of bonds surren-	
dered up to the 1st day of Nov. 1854,	5,120,000 00
There have been issued since that time on same ac-	
count,	181,500 00
	<hr/>
Making total issued to the 1st day of Nov., 1855,	5,301,500 00

Two and a half per cent. State Stock.

There had been issued on account of bonds surren-	
dered up to the 1st day of Nov., 1854,	1,911,003 50
There have been issued since that time on same ac-	
count,	125,970 00
	<hr/>
Making total issued to the 1st day of Nov., 1855,	2,036,973 50

Preferred five per cent. Canal Stock.

There is outstanding of this stock, same as reported	
last year,	4,079,500 00

Preferred five per cent. Special Canal Stock.

There is outstanding of this stock, same as reported	
last year,	1,216,737 50

Deferred five per cent. Canal Stock.

There had been issued on account of bonds surrendered up to the 1st day of Nov., 1854,	1,040,500 00
There have been issued since that time on same account,	181,500 00
Making total issued to the 1st day of Nov., 1855,	1,222,000 00

Deferred Special Canal Stock.

There had been issued on account of bonds surrendered up to the 1st day of Nov., 1854,	335,775 00
There have been issued since that time on same account,	125,970 00
Making total issued to the 1st day of Nov., 1855,.	461,745 00 "

The bonds outstanding at the time of the State Debt arrangement with the bondholders, amounted to,.	\$11,048,000
The amount of five per cent. State Stocks issued to the 1st of Nov., 1855, is ..	\$5,301,500
Add same amount for Canal Stocks ..	5,301,500
	<hr/> 10,603,000
Leaves bonds outstanding,	\$445,000

This makes \$10,000 more outstanding than is reported by the Agent. In tracing back the reports of the Agents the mistake is found in the report made December, 1852. The balance then outstanding is reported at \$982,000, whereas the figures show it should have been \$992,000. The error thus made has been ever since perpetuated.

INTEREST ON THE STATE DEBT.

According to the ledgers of this Office the amounts of interest paid each fiscal year, since the commencement of the arrangement, is as follows, viz :

In the year 1847,	\$78,600 00
In the year 1848,	183,730 00
In the year 1849,	188,344 00
In the year 1850,	188,595 00
In the year 1851,	203,718 00
In the year 1852,	199,784 00
In the year 1853,	249,127 75
In the year 1854,	298,255 52
In the year 1855,	306,169 14
	<hr/> \$1,896,723 41

During the last fiscal year, \$35,000 five per cent. State Stocks, and \$21,627 09 of two and a half per cent. Stocks were purchased by the State Officers.

The amount redeemed and cancelled of the Stocks issued under the State Debt arrangement, is \$234,411 50 of which \$75,000 are five per cents., and \$159,411 50, two and a half per cents.

EXPENSES OF STATE AGENCY.

The amount audited on account of salary of Agent and incidental expenses for the fiscal year, ending October 31, 1855, is as follows, viz:

On account of salary of Agent,	\$2 500 00
On account of incidental expenses, ..	1,317 81
Total,	<u>\$3,817 81</u>

DOMESTIC DEBT OF THE STATE.

Six per cent. Treasury Notes.

Total amount issued, ..	\$1,500,000 00
Total amount redeemed to Oct. 31, 1853,	\$1,501,330 00
Total amount redeemed since,	11,085 00
	<u>1,512,415 00</u>
Excess of redemption,	\$12,415 00

Five per cent. Treasury Notes.

Total amount issued,	\$722,640 00
Total amount redeemed to Oct. 31, 1853,	\$732,915 00
Total amount redeemed since,	2,630 00
	<u>235,545 00</u>
Excess of redemption,	\$12,905 00

Quarter per cent. Treasury Notes.

Total amount issued,	70,000 00
Total amount redeemed to Oct. 31, 1853,	76,995 00
Excess of redemption,	<u>\$6,995 00</u>

Interest Account.

Interest allowed and paid on Treasury Notes to the 31st October 1855, viz:

On six per cents,.....	337,523 54
On five per cents,.....	163,064 45
On quarter per cents,.....	657 92
Total,	<u>\$501,245 91</u>

NUMBER V.

Common School Fund.

By the first and second sections of the act to provide for a general system of Common Schools, approved March 5, 1855, it is declared that the Common School Fund shall consist of the aggregate amount of funds arising from the following sources, viz:

COMMON SCHOOL FUND.

I.—The sum of ten cents on each one hundred dollars, of the list of property taxable for State purposes.

II.—The Surplus Revenue Fund.

III.—All funds heretofore appropriated to Common Schools.

IV.—The Saline Fund.

V.—The Bank Tax Fund.

VI.—The funds derived from the sale of county seminaries.

VII.—All funds derived from fines and forfeitures, on account of breaches of the penal laws of the State.

VIII.—All funds derived from estates which shall escheat to the State for want of heirs or kindred entitled to such property.

IX.—All funds derived from the proceeds and sales of all lands which have been, or may hereafter be, granted to the State, where no special purpose is expressed in the grant.

X.—The proceeds of the sales of the swamp lands granted to the State of Indiana, by the act of Congress of September 28, 1850, after deducting the expense of selecting and draining the same.

XI.—The taxes which may from time to time be assessed upon the property of corporations, for Common School purposes.

XII.—The funds arising from the 114th section of the charter of the State Bank of Indiana.

XIII.—All unreclaimed fees as provided by law.

It will be observed that the school law of 1855, in the enumeration of the items constituting the Common School Fund, leaves out the Congressional Township Fund, which was embraced by the law of 1852. This is occasioned by a decision of the Supreme Court, which declares that to be a special or local fund, and the law (section 155) charges the County Auditors with the care and disbursement of the proceeds of said fund.

The amount of this fund received and disbursed during the fiscal year ending Oct. 31, 1855, was as follows, viz:

Receipts.

On account of delinquent tax of 1853,	\$10,457 67
On account of tax of 1854,	192,556 67

On account of delinquent tax of 1854,	12,321 58
On account of interest collected by Co. Treasurers,	4,177 34
Total receipts,	<u>\$259,513 26</u>

Disbursements.

Expenses of fund,	\$2,390 45
Distribution to Counties,	263,228 07
Interest of School Fund refunded, ...	1,364 53
Taxes of 1853 and 1854 refunded, ...	853 06
	<u>267,836 11</u>
Excess of disbursements over receipts,	<u>\$8,322 85</u>

The above shows the actual receipts and disbursements during the year ending October 31, 1855, according to the official ledger of the office. It will be seen that the amount paid out exceeds, by \$8,322 85, the amount received into the Treasury, including both the April and August settlements, and therefore, to that extent, reduces the former balance due the School Fund.

The books of the Auditor and Treasurer do not agree as to the balance on hand on the 1st of November, 1854. This arises from the fact that on the Auditor's books the amounts received and paid out on account of estates without heirs were posted with the Common School Fund, whilst on the Treasurer's books that account is posted separately, and is not reckoned as a part of the School Fund. Taking the account as it stands in the Treasurer's books, the balance due to the Common School Fund on the 1st of November, 1854, was

Receipts during the last fiscal year from all sources,	\$47,610 93
	<u>259,513 26</u>

Total,	307,124 19
The disbursements, as shown above, were	<u>267,836 11</u>
Balance due Nov. 1, 1855,	<u>\$39,288 08</u>

At the close of the fiscal year, October 31, 1855, nine of the Counties had not adjusted their school accounts, and of course the amounts due from them and to them are not embraced in the above statement. The tax and interest due from them, and the amounts due them on the distribution of 1855, will appear by the following statement:

COUNTIES.	TAXES & INTEREST DUE.	DISTRIBUTION.
Benton,	\$ 812 19	\$ 496 91
Carroll,	3,089 64	3,098 08
Howard,	1,608 31	2,240 78
Huntington,	2,014 85	2,811 67
Jefferson,	7,008 99	6,506 56
Montgomery,	6,308 82	4,784 18
Noble,	1,602 33	2,795 47
Porter,	1,395 49	1,632 96
Posey,	2,968 82	3,243 88
Totals	<hr/> \$26,809 44	<hr/> \$27,610 49

Some ten or twelve of the Counties, with which settlements have been made, still owe a balance to the Treasury, which will be adjusted at the next distribution. This arises from the fact that the Superintendent of Public Instruction, without consulting the Treasurer of State as to the ability of the Treasury, in view of the other indispensable demands upon it, to pay such an amount, issued a Circular to the several County Auditors of the State, informing them that he had made an apportionment which would not only divide all that would be received of taxes and interest at the April settlement, but also absorb all, or nearly all, of the large balance due of the preceding year's receipts. Ascertaining from the Treasurer that so large an amount could not be met in the then condition of the Treasury, the Superintendent published and circulated a second Circular, reducing the amount to be distributed so as to include only a portion of the previous balance. Before the receipt of the second Circular, however, several of the Counties had made a distribution according to the apportionment announced in the first Circular, and the Treasurers had not therefore the means on hand to pay the whole amount demanded of them at their settlement.

The whole amount of School tax and interest due from the several Counties in the State at the April settlement, 1855, was \$20,336 12.

The whole amount apportioned to the Counties for 1855, was \$288,873 44.

For details of this apportionment, of the taxes and interest due, and of the number of children between the ages of five and twenty one years, see Statement No. 6, in the Appendix.

In regard to the condition and operations of the School Funds in the several Counties, (returns having been received only from a portion of the Counties, and many of those received being very imperfect,) it is deemed useless to attempt to give an exhibition of them in this report. The Superintendent of Public Instruction will probably be enabled to give this information from returns made to him.

NUMBER VI.

Wabash and Erie Canal, from the State Line on the East to the Ohio River at Evansville, under the superintendence of Trustees.

REPORTS NOS. SIXTEEN AND SEVENTEEN.

Receipts.

There was remaining in the hands of Trustees on the 15th day of October, 1854, the sum of	\$418,551 19
The receipts by Trustees for the year ending Sept. 30, 1855, were as follows, viz:	
From tolls and water rents,	146,657 35
From lands east and west of Tippecanoe,	31,279 50
From lands in Vincennes District,	73,051 87
From interest on deposits,	1,072 90
From miscellaneous sources,	15 00
Total amount,	\$170,627 81

Expenditures.

The expenditures by Trustees for the same period were as follows, viz:

For general expenses of Canal, Warrant No. 3392,	\$16,698 46
For ordinary repairs of Canal, No. 3393,	84,543 64
For extraordinary repairs of Canal, No. 3394,	5,962 85
For rebuilding Bridges, No. 3395,	2,448 09
For expense of superintendence, No. 3396,	8,085 01
For expense of collection, No. 3397,	8,254 45
For construction from Terre Haute to Point Commerce, No. 3398,	18,634 16
For construction from Petersburg to Evansville, No. 3399,	2,639 76
For damages and water power, No. 3400,	8,120 50
For expense of engineering, No. 3401,	3,043 13
For expense of Land Office east and west of Tippecanoe, No. 3402,	1,055 09
For expense of Land Office in Vincennes District, No. 3403,	1,099 29
For expense of office, house and lot at Terre Haute, No. 3404,	243 60
For interest and exchange, No. 3405,	48,060 30

For instalment of 20 per cent. advance by Bondholders, No. 3406,.....	162,780 00
For interest on Wabash and Erie Canal Preferred Stocks, No. 3407,.....	50,520 74
Total amount,.....	<u>\$422,192 07</u>

Total receipts and balance on hand brought down,	\$670,627 81
Total expenditures brought down.....	<u>422,192 07</u>

Balance on hand Oct. 1, 1855,.....	<u>\$248,435 74</u>

No returns from Lagro and Terre Haute Offices.

NUMBER VII.

SWAMP LANDS.

In discharging during the last year the duties of this office, connected with the management of the Swamp Lands, considerable embarrassment and difficulty have been encountered. The large sales of lands during the preceding year had left a heavy balance in the Treasury, and had naturally stimulated the Swamp Land Commissioners, in the different Counties, to make extensive contracts for the drainage of the lands. The contractors, having in their employment many laborers who would demand their wages at every monthly estimate, would, of course, expect to receive the pay for their work whenever the proper vouchers should be presented at this office. The payment of these demands would have created no difficulty if the money received for the sale of the Swamp Lands had been in the Treasury, or if there had been on hand a surplus of any other funds not immediately needed. So far from this being the case, the large balance of \$385,892 32, reported to be on hand at the close of the preceding fiscal year, had been principally used in the payment of other claims upon the Treasury—the demands upon the Treasury growing out of the expenses of a session of the General Assembly, together with very liberal appropriations to the several Benevolent Institutions of the State, were very large—and the taxes for 1854 for revenue purposes had been reduced to 15 cents on the \$100, the delinquencies in the collection of which, in consequence of the failure of the crops and other causes, were unusually heavy. It soon became apparent, therefore, that the expenditures on this account must be checked, or the interest on the Public Debt and the ordinary expenditures of the State could not be met. With a view to limit the expenditures as much as practicable, the Governor and Treasurer of State, in the early part of the season, issued the following Circular:

INDIANAPOLIS, INDIANA, {
March 10, 1855. }

*To the Commissioner of Swamp Lands
for the County of ———, Indiana :*

You are hereby requested not to make any additional contracts for the *draining and ditching* of lands in your county, until you are further advised from the Treasury Department that funds have been provided for the payment of the same.

You will please advise the Treasurer of State what sum of money it will take to pay the present outstanding contracts in your county when completed.

This course has been rendered imperative upon the officers of State, from the fact that the State has used a large portion of the Swamp Land Fund to pay her interest the past year, which cannot be fully reimbursed before the revenue of 1855 is collected; and from the fact that a considerable portion of the sales of the lands have not yet been realized to the Treasury.

Respectfully, yours,

JOSEPH A. WRIGHT,

Governor.

W. R. NOFSINGER,

Treasurer of State.

This Circular had the effect to check the Commissioners in letting out new contracts, but in reference to contracts previously made, the work upon which was already in progress, there seemed to be no remedy but to continue the payment of the estimates until the means in the Treasury, except for the purposes above mentioned, should be exhausted. Finding that the object of the Circular was misunderstood in some quarters and misrepresented in others, and anxious that no avoidable obstruction should be thrown in the way of the drainage of the lands, and their sales in consequence of the prospect of drainage, the same Officers issued another Circular, as follows:

EXECUTIVE DEPARTMENT. INDIANA, {
Indianapolis, June 7th, 1855. }

To the Swamp Land Commissioner of ————— County:

SIR: On the 10th day of March last, we issued a Circular to the different Swamp Land Commissioners, requesting them not "to make any additional contracts for draining and ditching of lands in your County, until you were further advised from the Treasury Department that funds had been provided for the payment of the same."

Believing that we have been misunderstood in some Counties, and in others misrepresentations have been made as to the object of that Circular that are calculated to prevent the sale of these lands, we now distinctly state that you are authorized to let and make contracts for draining and ditching the lands in your County, upon the condition that the contractors, at their own option, will convert their warrants for work performed into lands, under the provisions of the law, or wait with the State until they are advised by the Treasurer of State that there are means in the Treasury to liquidate their claims, always keeping the amounts of the contracts within the amount of funds due from your County under the law, after the payment of her part of the necessary expenses.

The lettings in every case should be to the lowest responsible bidder, after due legal notice.

As soon as Swamp Lands are purchased with warrants, the County Treasurer receiving said warrants should return them to the Office of the Treasurer of State for cancellation, and then obtain quietuses for the amount of land sales thus made, as they will stand charged with the amount of such sales until this is done.

Many persons having invested their money in Swamp Lands, under the confident expectation that the work of draining and improvement would be carried on vigorously and promptly, justice to them, and the faith of the State, require that the work should be prosecuted by all the means within the reach of the State.

In many Counties large bodies of excellent land are yet unsold, and doubtless there are to be found those who will take contracts and enter those lands with their warrants; and if there are, they should have the privilege of so doing.

JOSEPH A. WRIGHT,
Governor of State.
W. R. NOFSINGER,
Treasurer of State.

Under the arrangement contemplated by this last Circular, contracts have been made for a considerable amount of drainage in several counties of the State, the estimates upon which are paid with Warrants on the Treasury, which are received in payment for lands. Every disposition has been felt and manifested, consistently with the condition of the Treasury, to promote the drainage and sale of the lands. Evidence of this may be found, among other things, in the fact, that, during the fiscal year ending Oct. 31, 1855, the amount paid out for work done exceeded by \$127,408 44 the amount received from sales of land; and the large balance of \$398,831 61 standing against the Treasury on this account at the commencement of the fiscal year, has been reduced, under a low tax and large delinquency in the payment of it, to \$271,423 17. It is hoped and believed that the receipt of the revenue of 1855 will much relieve the Treasury, and enable the Officers to considerably reduce the balances due to the Swamp Land and Common School Funds.

The sale of Swamp Lands made during the last fiscal year ending October 31, 1855, so far as reports had been received at this office, at that date, amount to 54,087 acres, which sold for \$66,071. A considerable amount of sales recently made have not yet been reported to this office; and those lands sold prior to the 1st of November 1854, which had not been reported at the period of making the last Annual Report from this office, are not included in this statement.

The actual receipts during the last fiscal year, on	
account of sales of land amount to.....	\$150,488 12
The expenditures during same time were.....	277,896 56
Excess of expenditures over receipts.....	\$127,408 44

The whole receipts and expenditures on account of Swamp Lands since the commencement up to October 31st, 1855, according to the Books of the Office, are as follows, viz:

Whole amount of receipts,	\$807,453 87
Whole amount of expenditures,	536,030 70
Balance on hand Oct. 31, 1855,	<u>\$271,423 17</u>

NUMBER VIII.

AGRICULTURAL PRODUCTS.

The assessment law of 1852, section 73, requires the county assessors, in making returns to the county auditors of the taxables of the respective townships, "to set down in appropriate columns, the number of domestic and farm animals of all kinds, and the quantities in bushels and tons of farm products of every kind in his township." The same section also makes it the duty of every county auditor in the State, after receiving the statements from the county assessors, to report the same, under appropriate heads, to the Auditor of State; and further provides that the Auditor of State shall embody a condensed statement of the matters contained in the reports in his annual report to the General Assembly.

Several counties have failed to make any report, notwithstanding they were repeatedly urged to do so, and the returns from many of the counties from which reports have been received are not so full as was desirable. For all the information communicated to this office reference is made to Statement No. 7, in the Appendix.

NUMBER IX.

FREE BANKING OPERATIONS.

The General Assembly of this State, at its last session, appointed a joint committee "to investigate the condition of the Free Banking system of the State, so far as the same was connected with this office." This committee engaged the services of Dr. E. W. H. Ellis, Mr. Jno. Hunt and Mr. J. R. Slack, to examine the Books of the Auditor, and to ascertain the amount of the circulation and securities of the several Banks. The report of these gentlemen as to the circulation outstanding and securities on hand, at the time the Banking Department was turned over to me, formed the basis on which the accounts of the several Banks were opened anew, and with which the present condition of the suspended Banks is contrasted in the abstract of their condition hereto appended. The tabular statement annexed, gives the condition of the specie paying Free Banks at this time—setting forth the kind and amount, at their par value, of the securities deposited, and the amount of the circulation issued thereon.

SUSPENDED FREE BANKS.

The circulation of the fifty-three suspended Free Banks as ascertained and reported to be outstanding on the 25th of January, 1855, was.....

\$2,868,403 00
Redeemed to December 15, 1855,..... 2,711,928 00

Outstanding,.....	\$156,475 00
-------------------	--------------

Some of the notes of the following named Banks having been protested, and said Banks having failed to comply with the requisitions of the General Banking Law in regard to protests, the securities of said Bank were sold in accordance with the Law, and the proceeds and other assets applied to the redemption of the circulating notes at the rates affixed to each, which rates were predicated on the circulation outstanding as shown by the Books of my predecessor:

Bank of Connersville,.....	87 cents.
Wabash Valley Bank,.....	92 "
Bank of America at Morocco,...	87 "
Atlantic Bank at Jackson,.....	80 "
Public Stock Bank, Newport,.....	89 "
Bank of Bridgeport,.....	88 "
State Stock Bank of Indiana, Peru,.....	85 "
Bank of Albany,.....	90 "
Bank of Attica,.....	89 "
Government Stock Bank,.....	80 "

Laurel Bank,.....	82 cents.
Bank of T. Wadsworth,.....	91 "
Greene County Bank,.....	81 "
Elkhart County Bank,.....	97 "
Traders' Bank at Nashville.....	92 "
Merchants' Bank, Lafayette,.....	90 "
Merchants' Bank, Springfield,.....	90 "
Orange Bank,.....	100 "

The securities of the following named Banks were sold in pursuance of the requirements of the Law, on the 29th day of October last. To guard against the possibility of any error in the amount of circulation outstanding, notice was given for those holding the notes of said Banks to return them to this office within ninety days for cancellation, and a certificate issued for the same, payable after the first day of February, at the rate to be ascertained when the amount of outstanding circulation should be correctly determined:

Farmers' Bank of Jasper.
Plymouth Bank at Plymouth.
State Stock Security Bank, Newport.
Traders' Bank at Terre Haute.
Drovers' Bank at Rome.
New York Stock Bank at Vincennes.

The securities of the following Banks are to be sold under the provisions of the General Banking Law, on Tuesday the 29th inst:

Northern Indiana Bank at Logansport.
Bank of Covington.
State Stock Bank at Marion.
Kalamazoo Bank.

It having been ascertained that the outstanding circulation of the following Banks, as reported by the joint committee, was correct—the amount burned by my predecessor, and the amount cancelled and left on hand by him, and the amount ascertained to be outstanding on the 25th day of January, 1855, agreeing with the whole amount originally issued—arrangements were made for the redemption of the circulating notes at par, at the places named:

Upper Wabash Bank,	} At the Office of Auditor of State.
North Western Bank,	
Steuben County Bank,	
Wayne Bank, Richmond,	
Wayne Bank, Logansport,	
Bank of Perrysville,	
Bank of Rockport,	
Starke County Bank,	
Bank of South Bend,	
Great Western Bank,	

Delaware County Bank, at Central Bank, Indianapolis.
 Agricultural Bank, at Bank of the Capitol, Indianapolis.
 Bank of Fort Wayne, at Branch State Bank Indianapolis.

Thus it will be seen that of the fifty-three suspended Free Banks, all, except the following, are being rapidly liquidated:

Western Bank at Plymouth.
 Bank of North America at Newport.
 State Stock Bank at Jamestown.

SPECIE-PAYING FREE BANKS.

The Tabular Statement annexed, gives the kind and amount of Bonds deposited by each Bank as security for the redemption of their notes, and the amount of circulation issued thereon, and designates those which have complied with the requisitions of the amended law of the last General Assembly. By this it will be seen that the actual securities in stocks amount to two millions forty-nine thousand and five hundred and forty-four dollars. The amount of notes received by them for issue one million six hundred and seventy-four thousand and eight hundred and seventy-two dollars.

These securities consist of the following State Stocks, viz:

Indiana 6 per cents,.....	\$12,000 00
Indiana 5 per cents,.....	700,600 00
Indiana 2½ per cents,	387,444 00
Virginia 6 per cents,	228,000 00
Tennessee 6 per cents,.....	12,000 00
Missouri 6 per cents,.....	265,000 00
Georgia 6 per cents,.....	73,000 00
Louisiana 6 per cents,	298,000 00
Kentucky 6 per cents,.....	42,500 00
North Carolina 6 per cents,.....	30,000 00
Pennsylvania 5 per cents,.....	1,000 00

Thus it will be seen that the securities thus deposited are the Bonds of those States which pay their interest thereon regularly semi-annually, and are of the very best class of State Bonds, whose value is more permanently fixed than the Bonds of other States, and liable but to slight fluctuations.

Those specie-paying Free Banks whose securities were not sufficient at the lowest market value to cover their outstanding circulation, were required to surrender an amount of their issues, or deposit additional bonds to make their securities, on this basis, to cover their circulation dollar for dollar. In almost every instance this requisition has been complied with. This, in connection with the fact, that the securities of those Banks which have accepted the provisions of the amended law, are taken at the lowest market

value and *ten per cent.* additional retained above their circulation, justifies the assertion that the circulating medium of no other State is better secured than that of Indiana.

The experiment of Free Banking in Indiana, disastrous as it has been in some particulars, has demonstrated most conclusively the safety and wisdom of the system. The original bill was crude and imperfect, admitting of such a construction as held out to irresponsible men, inducements and facilities for embarking largely in the business of banking, without the ability to sustain themselves in a period of revulsion.

That revulsion came at a time of universal commercial depression, when the circulation of the Free Banks had been expanded to over nine millions of dollars, when the rate of exchange ruled heavily against the West, and a suspension of a large majority of the Banks had created a wide spread panic, forcing home the entire circulation for redemption; and yet the loss to which the bill holder was necessarily subjected, in many cases, did not exceed five per cent., and in no case exceeded twenty per cent. of the amount in his hands. While, in numerous instances, in other States, under the system so much lauded by the opponents of Free Banking, when the securities were all in the vaults of the Banker, the wreck had been complete, the issues of the Banks proving entirely worthless in the hands of the holders, here was a basis, which although insufficient to re-imburse the bill holder in full, furnished a guaranty against, and ultimately saved him from any heavy sacrifice. Whatever defects there were, it was evident, could not be attributed to the Free Banking system, but resulted from the ambiguity of the law itself.

The amendatory act, enacted by the Legislature at its last session, was designed to remedy these defects, to guard against erroneous constructions of the law by the officers administering it, to prevent the receipt of doubtful or insufficient security, and to require the deposite of such an amount of security, as should in any emergency, be adequate for the protection of the bill holder. And, so far, the expectations of the authors of the amended law have been fully realized. Several of the specie-paying Banks have come under the provisions of the amended Statute, and assurances given that all will do so within the period named in the act. No suspension has taken place, even temporarily, and should any occur, the public are fully protected.

While the law does not extend to men without responsibility, to speculators and adventurers, facilities for flooding the State with an irredeemable issue, it is yet liberal enough in its provisions to justify men of capital, integrity, and business capacity, to embark in Banking to the extent of the wants of the community. Such, so far as we can judge, are the men now engaged in Free Banking in the State of Indiana, and we regard them as fully entitled to the confidence of the public.

No safer circulation can be produced than the issue of the spe-

cie-paying Free Banks, nor any so much entitled to the approbation and encouragement of our citizens. It is the interest of the banker, to have this issue promptly convertible into gold or silver at the pleasure of the holder, and it is, therefore, a closer approximation to the constitutional currency than any other. From these manifest advantages of the system, we feel fully assured that it will increase in popular favor, and that our citizens will be slow in extending their confidence to any mode of banking, which fails to furnish the guaranty of ample collateral securities, deposited in the hands of disinterested and responsible officers of State.

NUMBER X.

GENERAL REMARKS.

The balance in the Treasury, at the close of the fiscal year, Oct. 31, 1855, as will appear by an examination of the general statement of receipts and expenditures, is..... \$468,226 05

This is an apparent and not a real balance, as will be seen below. A large portion of it consists of a balance due to the Trustees of the Wabash and Erie Canal, whose receipts are credited and whose expenditures are charged on the books of this office, as if the money were actually paid in and drawn out. Other portions of it belong to the Swamp Land Fund, to the Common School Fund, and to the various Trust Funds in charge of this office. The following statement will show the balances due, viz:

To the Wabash and Erie Canal,.....	\$248,435 74
To the Swamp Land Fund,.....	271,423 17
To the Common School Fund,.....	39,288 08
To other Trust Funds,.....	16,841 92
<hr/>	
Total balances,.....	\$575,988 91
Deduct balance on hand,.....	468,226 05
<hr/>	

Which leaves a deficiency in the Treasury to meet at once all the balances due, of..... \$107,762 86

The aggregate of the balances due on the above accounts at the commencement of the year, has been considerably diminished during the year, notwithstanding the reduced rate of taxation for general purposes, and the unusually large delinquency in the collections, occasioned by the failure of the crops and a general derangement of the currency. The revenue for the present year, the taxes for general purposes having been increased from fifteen to twenty cents on the hundred dollars, the currency having become sound, and the country having been blessed with large crops which command high prices, must be greatly enhanced; and, besides meeting the usual ordinary and extraordinary expenditures, together with the interest on our State indebtedness, will probably absorb all the balances due, and leave something on hand to apply, under the constitution and laws of the State, to the reduction of the principal of our Public Debt.

The expenditures usually denominated ordinary were, during the year, the details of which may be seen under the general head of expenditures, \$147,442.61.

These expenditures are greater than the estimate made by my predecessor, on account of a large increase in the expense of printing, binding, and paper; a large amount of specific appropriations; a considerable increase in the State Prison account, occasioned in part by the expense of transporting prisoners back to the counties whence they were taken, by order of the Supreme Court, and in part by the payment of \$2,852 70 to the keeper of the prison for money and clothing furnished to discharged prisoners, the Attorney General having decided the claim to be a just one under the law; together with an increase in the Contingent Fund and several other items.

Several of the appropriations, as will be seen by the synopsis of appropriations and expenditures, have been unavoidably overdrawn, which it will be necessary to adjust in the next appropriation bill.

The net amount of revenue collected on the duplicate of 1854, (including the revenue from the branches of the State Bank), and paid over at the April and August settlements, is as follows:

Revenue of 1854,.....	\$419,590 90
Delinquent Revenue of 1853,.....	24,627 99
Total,.....	\$444,218 89

In the last Auditor's Report, the amount estimated for the collections of 1854 and previous delinquencies was \$610,000, which is \$165,781 11 more than the amount actually realized.

The estimate for ordinary expenditures was \$123,938 69, and for the Benevolent Institutions \$42,000, making together \$165,938 69; whereas the ordinary expenditures amounted to \$147,442 62, and the expenses of the Benevolent Institutions to \$159,511 52, making together \$306,954 14—exceeding the estimates \$141,015 45. The Auditor estimated that at the end of the year there would be in the Treasury, over and above all balances due, the sum of \$126,861 31. It will have been seen, however, that the whole of this balance, and more, is absorbed by the difference in the actual receipts and expenditures from those which were estimated.

Besides the very large increase in the expenses of the Benevolent institutions and the ordinary expenditures of the State, a considerable amount of old claims was directed by the Legislature to be paid, and the expenses of the Supreme Court, for which only \$1,000 were appropriated, amounted, in consequence of a law permitting the Clerk to transcribe the mutilated records, to the sum of \$3,435 17, an amount undoubtedly larger than the Legislature anticipated, the payment of which however, under the law, was unavoidable.

The Benevolent Institutions are confessedly an honor to the State, and that they should be liberally sustained and cherished is doubtless the unanimous sentiment of the people; but the propriety of making large appropriations without providing the means to meet them may not appear quite so clear.

Statement No. 1 in the Appendix will show, in detail, the settlements with the County Treasurers, of the various kinds of taxes payable at the State Treasury at the April Settlement, together with the delinquencies returned on the various assessments.

Statement No. 2 will exhibit the August Settlements of delinquent taxes of 1854, so far as settlements were consummated. Several Treasurers, not included in the table, sent forward their settlement sheets but have not yet made settlement, and the Treasurers of about six counties have neither sent their Settlement Sheets, nor settled for delinquent taxes of 1854.

Statement No. 3 will show the number of acres of land, the value of lands, improvements, town lot and buildings, railroad stock, other corporation stock, personal property, the total value of all taxables, and the number of polls returned for taxation for 1855, in all the counties of the State, except Fulton, Laporte, Posey, Tippecanoe, and Wabash, from which, at the time of preparing this Report, no returns had been received. Taking the Counties not returned as they were last year, (which is much below what a return for this year would have shown,) and the taxables for 1855, compared with those of 1854, will show the following result:

Value of all taxables in 1855,	\$301,858,474
Value of all taxables in 1854,	290,418,148
Increase,	<hr/> \$11,440,326
Number of Polls in 1855,	178,877
Number of Polls in 1854,	171,736
Increase,	<hr/> 7,141

This shows a pretty fair increase, which would have been swelled somewhat if the returns had all been received. A new valuation of the real estate—which has not been appraised since 1851—would add a very large amount, certainly not less and probably more than 60 or 70 millions, to the value of that portion of taxables. Taking the lowest amount as the estimate of the increase, and the general revenue would be enlarged \$120,000. Since the last valuation of real estate, railroads in every direction have been completed, affording extensive facilities for travel and transportation, and consequently greatly enhancing the nominal and intrinsic value of the property in their vicinity. The General Assembly, at its last session, made no provision for a re-valuation, and the five years, during which, by the terms of the act of 1851, directing an appraisement of the real property of the State, the valuation then directed was to remain in force, having expired, a considerable anxiety was manifested by the County Officers throughout the State as to the proper course to be pursued in the absence of a law directing another appraisement, and numerous inquiries

were addressed to this Office for instructions in regard to their duties. Believing that a valuation without authority of law would not be valid, I addressed to each County Auditor the following Circular :

OFFICE AUDITOR OF STATE,
Indianapolis, Nov. 24, 1855. \

SIR:—In reply to the numerous inquiries addressed to this Office, in regard to a new Appraisement of Real Estate, I have deemed it proper to issue this Circular. The last appraisement of Real Property of the State was made in 1851, under the authority of “an Act to appraise the Real Estate of this State,” approved Feb. 13, 1851. The 27th Section of this Act provides that the appraisement made under its provisions shall stand for the term of five years, and shall be the amount upon which the Taxes shall be assessed.” Another Act providing for the valuation of the Real and Personal Property of the State was passed in 1852, the 44th Section of which provides that the appraisement list of the Taxable Real Property of this State, made under the authority of the provisions of the first mentioned Act, shall stand and be considered as the grand levy of the State. The five years, during which, by the provisions of these Acts, the Appraisement shall stand, having expired, and no law having since been enacted by the General Assembly, the question arises, What shall be done? I think it clear that no appraisement can be legally made until it be authorized by the Legislature; and hence, from the necessity of the case, in order that the operations of the Government may be carried on, and the Interest on our Public Debt paid, the Taxes on Real Estate will have to be assessed on the appraisement heretofore made, unless the Legislature shall be convened, and a new law be passed.

Respectfully, yours.

H. E TALBOTT,

Auditor of State.

After the foregoing Circular was issued, the opinion of the Attorney General was solicited and obtained. He concurred in the opinion expressed in the Circular, that a new valuation could not be made, and further decided that the 44th section of the act of 1852 continued the grand levy, made under the act of 1851, in force until the Legislature shall require a new valuation.

The following table will show the total amount of taxable property for the last eleven years, and the increase of each year,

viz:

	TOTAL TAXABLE.	INCREASE.
1844,	\$ 116,237,965
1845,	118,870,251	\$ 2,632,286
1846,	122,265,686	3,395,435
1847,	124,610,441	2,344,755
1848,	128,960,986	4,350,545
1849,	133,419,056	5,458,070
1850,	138,262,085	4,843,029
1851,	210,973,643	72,711,558
1852,	218,563,809	7,590,166
1853,	266,097,614	47,533,805
1854,	290,418,148	24,320,534
1855,	301,858,474	11,430,320

Total increase for eleven years, \$186,610,717

A new valuation now of the real estate would probably make the total taxables \$380,000,000—more than triple the amount of the taxables ten years ago.

Statement No. 4 will show the amount of taxes charged on the duplicates for 1855, for State and all other purposes, in each County in the State, except the Counties of Howard, Pulaski, Steuben, Tippecanoe, and Vigo, from which no returns have been received. The failure of these Counties to make returns, notwithstanding the importunity with which they were urged to send them, renders it impossible to show the exact amount of taxes levied. Taking the returns in this statement, and estimating for the Counties from which no returns have been received, and the taxes assessed for 1855, for revenue proper, would be, in round numbers, about \$690,000, to which may be added the amount that shall be received from Branches of the State Bank, and also a very large delinquency of 1854. There is a very fair probability that the collections of 1855 will be much better than those of 1854, and that the delinquencies will probably be as small as has been usual during the years when the most favorable collections have been made. The amount on the duplicates is upwards of \$200,000 more than was on the duplicates of 1854, according to the returns of last year correctly added up.

Statement No. 5 will exhibit the condition of the Swamp Land funds in the several Counties of the State in which the lands are located.

Statement No. 6 will show the amount of taxes and interest due at the April settlement, from each County of the State, to the Common School Fund, the amount of funds apportioned to each County for 1855, and the loss and gain of each county.

APPENDIX.

STATEMENT NO. 1.

Showing the Settlement with County Treasurers in detail, for collections of State Revenue, for 1854, together with School Fund, Library Fund, and Sinking Fund Taxes for the same year.

TWELFTH ANNUAL REPORT

OF THE

TRUSTEES AND SUPERINTENDENT

OF THE

INDIANA INSTITUTION

FOR

Educating the Deaf and Dumb.

TO THE GOVERNOR.

INDIANAPOLIS:

WILLIAM J. BROWN, STATE PRINTER.

1855.

The Indiana Institution for Educating the Deaf and Dumb is situated on the National Road one and one-fourth miles east of Indianapolis.

Visitors are admitted on each day of the week, except Sunday, between the hours of nine and twelve, A. M., and at no other time. During these hours, an attendant will be in readiness to conduct visitors through those parts of the buildings open to the public, and to the school rooms.

TRUSTEES' REPORT.

HON. JOSEPH A. WRIGHT. *Governor of Indiana :*

We have the honor to submit the following, being the Twelfth Annual Report of the Board of Trustees of the Indiana Institution for Educating the Deaf and Dumb.

It affords us the highest gratification to report that the affairs of the Institution are in a sound and satisfactory condition, and that it is fulfilling its mission in a manner creditable to the State, and to the West. Indeed it will compare favorably in all respects, we have reason to believe, with any similar Institution in the country.

The observations in our last annual report in regard to the internal economy of the Institution, are, in the main, applicable at this time.

A very full and satisfactory account of the past year's operations is presented in the report of the Superintendent, herewith submitted. This officer has continued to merit our most cordial approbation. It has been mainly attributable to his indefatigable energy and zeal in the cause, that the Asylum has maintained its high rank as an educational Institution, though he has been ably seconded and sustained by a faithful corps of teachers; and to his prudence and watchfulness that the establishment has been supported so economically, and continues to be free from debts and financial embarrassments. It has, however, required the strictest economy, owing to the enormously increased price of provisions, to keep within the appropriations the past year.

The large and increasing number of pupils from other States, is a gratifying evidence of the standing and character of the Institution abroad.

As we remarked in our last report, the accounting under the present law, falls chiefly upon the Superintendent, and the Auditor of State. The report of the former officer contains a detailed statement of the finances of the Asylum. The following is a summary:

RECEIPTS.

Cash on hand at the date of last report . . .	\$330 00
Cash from warrants on the State Treasurer . .	24,392 51
Cash from sale of Boots and Shoes	978 39
Cash from sale of Barrels	751 37
Cash from paying pupils	770 00
Cash from farm and garden	594 35
	<hr/> \$27,816 62

EXPENDITURES.

On account of groceries and provisions . . .	\$7,194 82
On account of salaries and wages	10,180 14
On account of shops	2,245 53
On account of farm and garden	1,112 08
On account of furniture, fuel, clothing, school books, repairs, and miscellaneous items,	5,973 05
	<hr/> \$26,660 62

Balance in hands of Supt. Nov. 15th. .	\$1,156 00
--	------------

The amount on hand, (inclusive of the above balance of \$1,156,00) to carry the Institution up to the 1st of April next, when the appropriations of 1856 are payable, is \$7,742 07, which will probably be sufficient.

For a more particular exhibit of the financial affairs of the Institution, as also for many other interesting matters, your attention is invited to the Superintendent's report.

The shops, though not quite meeting expenses the past year, are answering the purposes of their establishment admirably; and it will be the policy of the Board to encourage, and in due time extend their operations. They are regarded as a most efficient and necessary means of qualifying the boys for active usefulness in after life.

The report of the excellent physician to the Asylum, Dr. Livingston Dunlap, is also herewith submitted. In the good providence

of God, the Institution has again passed through the year without a single loss by death. Considering that many in the household are small children, and many pre-disposed to disease, this fact speaks well for those having charge of the health and comfort of the pupils.

Commending the Institution again to the protection of the all-wise and merciful author of our Being, and to the favor of the authorities and people of the State, in whose affections we know it has a place, this report is respectfully submitted on behalf of the Board of Trustees.

W. J. BROWN, *President.*

JOHN S. SPANN, *Secretary.*

SUPERINTENDENT'S REPORT.

To the Board of Trustees :

GENTLEMEN :—In making my annual report, as required by law. I have the satisfaction of assuring you, that the Institution committed by you to my superintendence, is, in every important respect, in a most prosperous condition.

As a history of the operations of the Institution for the year just closed, would be in the main but the repetition of its history in any former year, I will content myself on the present occasion with a brief summary of the most important events connected with its condition, progress and management, which have transpired since I last addressed you on the subject.

It is certainly cause for thankfulness that in a community of a hundred and sixty or seventy persons, year after year should pass away without one case of mortality. Through the blessing of Providence on the means used and regulations adopted and enforced as to diet, clothing, cleanliness, and exercise, the general health of the pupils during the year has been good. But few cases of sickness and no deaths have occurred among them. For several years past, there has been a gradual, but very perceptible improvement in the health of the inmates of the establishment. This happy result has been produced in part, no doubt, by the improved accommodations which have been enjoyed since the buildings have been completed and occupied ; but no one thing has contributed more to this result, than the regular system of manual labor which has been introduced among the pupils. Nor is this mere speculation, for it is a fact well established on the ground of both reason and experi-

ence, that regular alternations, at short intervals, of study and recreation and rest, is not only favorable to intellectual and moral improvement, but is also in a high degree, conducive to health. The hours of study, of recitations, of labor, of recreation, and of rest, are now arranged so as to combine the most rapid advancement in knowledge, with the most vigorous development of health.

The whole number of pupils who have enjoyed the advantages of the Institution, within the year, ending October thirty-first, has been one hundred and sixty-six. Of these, seven, having completed prescribed course of study, were honorably dismissed at the close of the last term. Nine others, although they had not gone through the whole course of study, yet were, at their own request, regularly dismissed. The number therefore who properly belong to the regular classes is one hundred and fifty-one. But nineteen of them are absent, not having yet returned this session. At this date the actual number present is one hundred and thirty-two.

If parents only knew the great loss their children suffer by being detained at home after the session has begun, and the great trouble and inconvenience it causes the teachers, they would make greater effort to have them here at the opening of the term. Six weeks of the session have passed by, and yet so many are still absent. Doubtless some are detained at home by sufficient cause; but for the indifference and carelessness of others, in this respect, there is no excuse. The vacation of two months gives sufficient time to make all the preparation as to clothing necessary. The facilities for traveling are very great—Indianapolis can be reached by railroad from almost every county in the State. Liberal provision is made for all the deaf and dumb who wish an education, and certainly there is an obligation resting on parents when they have once entered their children as pupils, not to embarrass the operations of the Institution, by detaining them at home after the session has commenced. This fall the first month of the session, was in a great measure lost by the want of punctuality in the return of pupils. Some were sick we know; but many came late that ought to have been on hand earlier. If only those who stay away were injured it would be the less matter, but those who come promptly are kept back by those who are tardy.

By a reference to the rules adopted by the Trustees for the regulation of the admission of pupils accompanying this report, it will be

perceived that when a parent has entered his child as a pupil he is bound to bring him punctually at the commencement of each term, and not to withdraw him from the school until he has completed the full course of study, without the permission of the Board of Trustees. This rule is reasonable and right—and it is hoped that in future it will be more faithfully regarded and obeyed. To withdraw a pupil without permission, or to keep one at home without good cause after the session has commenced, is a violation of the rule.

In this connection it is proper to refer to another rule of the Board which defines the ages within which persons can be received as pupils into the Institution. I do this for the purpose of correcting a mistake which exists in the minds of some on the subject. The rule entitles all the deaf and dumb of the State, of sound mind, between the age of ten and thirty to admission. Some retain their children at home till they are fully grown, and others are anxious to send them before they are old enough. It is as great a mistake in the one case as in the other. Those over thirty are beyond the hope of gaining an ordinary education. Even at twenty the habits are usually become so fixed, the evil passions and appetites so fully developed, the moral sensibilities so perverted, and the intellect so deadened by want of exercise, that it is impossible to arouse them to activity, and induce them to give that attention, and make that application which is necessary in order to learn and use written language. As a general thing they cannot perseveringly submit to the discipline required; but become wearied and discouraged. Of the many cases which have come under my observation, of deaf mutes who have entered school after they had passed their majority, I do not recollect a single one who learned our language so as to be able to express his thoughts in writing on even common subjects with such a degree of accuracy as to be of much practicable utility. But although such persons cannot master our language so as to make it a means of intercourse with others, yet they can be very materially benefitted by instruction. By means of signs their dispositions can be corrected, their manners cultivated, and much valuable information communicated to them, both as it respects the world that now is and that which is to come. For this reason a wider latitude is allowed here than is usual in other Institutions of the kind. In most of them none are admitted as pupils who are over twenty-one years of age.

Experience has proven that, however it may be with other children, with deaf mutes it is not best to begin a course of instruction before they are ten or twelve years of age. At ten they are in self-reliance, in experience, in knowledge, in ability to take care of themselves, not ordinarily above other children at five or six, and until that age they need the care of a mother and the services of a nurse, more than that of a teacher. The discipline which we are compelled to adopt from the outset is too severe for young children. The exercise of play is better for such than the discipline and the confinement of the School room. We have been applied to frequently of late, to admit children under ten years of age, but from a sense of duty we have been compelled to refuse their request. The rule on this subject we are confident is reasonable and right, and admits of very few exceptions. The only one that occurs to us, is the case of destitute orphans. We should feel it to be our duty to receive such and take care of them, but we should not put them in school till they were ten years of age.

The intellectual department of the Institution is upon the whole in a very satisfactory condition. The advanced class this session is the largest and most promising of any we have ever before had. Formerly very few were willing to remain under instruction longer than five years. Although the full course allowed is seven years, yet heretofore, but few have availed themselves of the privilege. The average time of attendance for each pupil, taking the whole number of those who have gone out from the Institution from the commencement, is a fraction less than three years and a half—a period of time much too short to obtain anything more than a very meager and imperfect education. If therefore in past years many poor scholars have left the Institution, the fault has not been ours, but has been chargeable upon those who have withdrawn them from instruction too soon. By this means the older classes have been very much reduced, and sometimes broken up entirely. But latterly, in this particular, there has been a manifest change for the better. The new class formed this session is large and promises well. The classes of one, two, three and four years standing respectively, are also large and well constituted. The two advanced classes, the one of five, and the other of six years standing, are fuller and composed of pupils more equal as to age and ability, than we have ever had before.

There has been one change during the year in the corps of instructors.

Mr. C. W. Moores, called by the providence of God and a sense of duty, to another field of labor, resigned at the close of last term the situation of teacher, which he had filled for three years with honor to himself, and usefulness to the Institution. With much regret at the necessity which led to the separation, his resignation was accepted by the Trustees.

To lose as in this case, the services of a talented, faithful and experienced teacher, is in almost any circumstances a misfortune to the cause, but one which we fear is not fully appreciated by those who are not familiar with the peculiarities and difficulties of the system of instruction which we practice. Experience is valuable in every profession, and especially so in ours. The art of instructing the deaf and dumb is peculiar, and differs widely from all other kinds of teaching; and no one, even the most gifted, can become an adept in it without years of study and practice. However much skill and experience a person may have gained in the use of the ordinary method of teaching, they will be of very little benefit to him in the practice of this; nor will any skill or experience gained in the use of this method, serve him any useful purpose in any of the other walks of life. It is, therefore, the mutual interest and obligation of the Institution and her faithful teachers, that their situations should be made as secure to them and permanent, as the nature of the case will allow. Of course, an absolute pledge cannot be exacted of a person accepting of a situation as teacher, not to abandon it under any circumstances whatever that might occur; but he can give assurances of an honest intention to make the business his permanent profession, and that he will not consider his position merely as a stepping stone to something more profitable. This assurance the Trustees require of all the teachers whom they appoint; and it is enacted as a by-law, that if a teacher abandon his place without the consent of the Board, he shall forfeit one quarters' salary. In Mr. Moores' case, although regretting to lose his services, now become so valuable to the Institution by the experience gained in the use of signs, yet this consent was granted, and he retires with the good will and approbation of the Trustees and all with whom he has been associated. No appointment will be made at present to fill the place thus made vacant. A new classification of the pupils has been made to suit our new circumstances; the number of classes reduced so that the five teachers and two

monitors in the service of the Board, are all that will be required this session.

The appropriations made to the Institution by the last Legislature of the State, have been sufficient to enable us to provide for all its reasonable wants without incurring any debts. And we have, notwithstanding the very high prices of almost all articles of living which have prevailed, and notwithstanding some extraordinary expenses unavoidably incurred in connection with the heating apparatus and the shops, an available balance but little less than the amount on hand this time last year. This balance is made up of the following sums :

Balance in the State Treasury to the credit of the Institution	\$5,502 78
Balance in the hands of the Su'pt	1,156 00
Amount due from counties for clothing advanced to indigent pupils	409 29
Amount due and available from the shops	674 00
Making the sum total	————— \$7,742 07

The means at our disposal last session to meet current expenses from the first of November to the first of April following, was \$7,921 93. For the same period this session, there is an apparent difference against us of \$179 86. But this difference is only apparent; for it is more than made up by the increased amount of Steward's stores on hand and paid for this fall, over and above what we had last year. Still this is coming nearer the bottom of the meat-tub than is agreeable. Therefore, some reductions in the expenses have been recommended and adopted by the Board, so that we are able confidently to assure the friends of the Institution that the wise and just policy of the Legislature and of the Trustees, not to run in debt, need not, and will not be departed from by us.

The aggregate amount of receipts for the year from all sources, has been \$27,816 62; and of expenditures, \$26,660 62; which leaves in the hands of the Superintendent, \$1,156 00. The payments are made in part, directly from the State Treasury on certificates of indebtedness signed by the President of the Board of Trustees, and in part by the Superintendent, and the remainder by the Steward. The accounts, however, are all kept by the Superintendent, who charges the Institution with all moneys drawn from the Treasury and all collections from whatever source made, and credits all authorized payments, by whomsoever made. He is required

by law, to report in detail, the objects upon which the funds are expended. Therefore, a full and accurate statement, as made up from the books of the Asylum, is here inserted for the information of all whom this matter may concern.

A detailed statement of receipts and disbursements, for the year ending October 31st, 1855.

The mechanical department of the Institution we can assure the Board, has been carried on with energy, and is accomplishing the design for which it was established. From thirty to forty of the male pupils have been engaged from three to four hours a day, in learning coopering and shoe-making, and have made very commendable progress in the knowledge of these arts. In a financial point of view, however, the shops have not quite come up to our expectations. The expenses of each have slightly exceeded the receipts, whereas it was calculated that there would be a small profit from the business of each of them. Yet in reviewing the transactions of the year, I see no way in which the receipts could have been materially increased, without sacrificing other important interests. As much of my time and attention has been given to the management of this department, as is consistent with the faithful performance of other important duties devolving upon me. The foremen of both the

shops are faithful and skillful workmen, and have given their entire energies to their respective duties. But this is a new enterprise, the pupils are yet mere beginners, and in the nature of the case much of the work manufactured is very imperfect, and has to be sold for a very little if any more than the cost of the material. This is especially true of the shoe-shop, which has only been in operation one year, and besides this, we have to say in behalf of the cooper-shop, that last winter, barrels sold at least twenty per cent. lower than usual. These reasons will fully account for all the deficiency which exists.

As was remarked in a former report, not much pecuniary profit to the Institution can reasonably be expected from the shops. As much as we have just ground to look for, is, that in the long run the profits will equal the expenses. This is all that we can promise. The loss of last year will doubtless be made up by the profits of this year. The experience gained will enable the pupils to work to better advantage in future than they have been able to do heretofore.

But this aspect of the matter, although important, is by no means the chief one in which the shops should be viewed. The main design in the erection of the shops and the introduction of trades, is the benefit and improvement of the pupils who work in them. In this point of view they pay large dividends on the amount invested. Here are acquired those habits of industry, regularity and self-reliance, which are essential to the formation of proper characters, and necessary for becoming useful members of society. The first object of our labors is the intellectual and moral culture of those committed to our care; but scarcely less important is the training of them in the practice of useful manual labor. Nor is this latter object at all inconsistent with the former, but rather favorable to it; for it is found that two or three hours' vigorous labor a day on the farm or in the shops, is the very best kind of preparation for the exercises of the school-room. Therefore we hold that each pupil should be taught to labor with his hands as well as to read and write.

The female pupils are divided into three classes, and each class alternately spends about three hours a day for a week at sewing, ironing, and chamber-work, and thus each member of the class in turn, has an opportunity of learning how to perform these different duties. They make their own clothes, the clothes for the male pupils, bind the shoes for the shop, do all the sewing for the Institu-

tion, and pay some attention to ornamental needle-work. The profits from the sale of fancy work made last session, amounted to twenty-nine dollars and fifty cents. This money, at the request of the young ladies, was devoted to the purchase of books for the library.

Within the last year about nine hundred volumes have been added to the library. This we were enabled to do by the contributions of visitors, and the liberality of a few of the citizens of Indianapolis, who were applied to for aid. With the approbation of the contributors, a full set of the publications of the American Sunday School Union was purchased, the Society having generously made to the object a discount of one-fourth of the usual price. The other additions to the library consist principally of American biographies, histories and books of reference.

The books of the library are read with avidity by the older pupils, and are exerting a happy influence in storing their minds with useful knowledge and in cultivating in them the habit and taste for reading. The acquisition of a habit of this kind is very important to the deaf and dumb; for when they shall have left their teachers, they will be almost entirely dependent upon books for instruction and intellectual food and enjoyment.

The last Legislature of the State appropriated to the Institution two thousand five hundred dollars, for the purpose of lighting it with gas, and also an equal amount, to enable us to complete the verandas heretofore commenced.

Upon a full and careful consideration of all the questions relating to the former of these measures it was determined that it would be better and more economical, to procure a supply of gas, if it could be done, from the works in the city, than to manufacture it on our own account. A conference was had with the officers of the Indianapolis Coke and Gas Company, and the scheme was found to be entirely practicable, and the Company disposed to undertake to carry it into effect on reasonable terms. But as the money granted for this purpose was not made payable until the first of April next, this improvement could not be entered upon last season. We however, have such assurances from the Gas Company, as lead us confidently to hope that we shall be able to have the pipes laid early next spring, and the whole completed before the close of the present session.

The other improvement, mentioned above, has been prosecuted

with diligence, and is now nearly finished. In the forepart of last summer a contract was entered into and sanctioned by the Board of Trustees, with Messrs. N. T. Horton and Co., of Cincinnati, to make and put up the iron work of the verandas, according to the plan and specifications drawn up by the architect, for the sum of one thousand seven hundred dollars, payable the first of March next. They have faithfully done the job, according to the terms of the agreement. The other parts of the work, as the frames, floors, roof, ceiling and painting, is being done on the most advantageous terms by competent workmen of this city. In the course of a few weeks the whole will be completed. The appropriation for this object, was made on the condition that the whole cost should not exceed twenty-five hundred dollars, and if it could not be done for that sum, no part of the money should be drawn from the Treasury. The work is now so nearly done that we are able to announce that the condition of the grant will be fully complied with, and that the whole expense will not quite exhaust the sum appropriated.

Besides the matters thus briefly discussed, nothing further occurs to me as worthy of present attention. Commending, therefore, the Institution in all its interests, to your fostering care, and expressing my sincere and grateful sense of the high consideration and kindness with which you have been pleased, uniformly, to treat me in the relation in which I have the honor to sustain to you as your agent, in carrying on this benevolent enterprise, I conclude this review of the transactions of the year.

All which is respectfully submitted,

THOMAS MAC INTIRE,

November 1, 1855.

Superintendent.

PHYSICIAN'S REPORT.

To the Trustees of the Deaf and Dumb Asylum :

GENTLEMEN :—The undersigned is happy to be able to report to your honorable Body, that notwithstanding the unusual prevalence of sickness in this city and surrounding country, there has, perhaps, been no year since the organization of the Asylum, when its inmates have enjoyed better health than during that just past. Ophthalmia prevailed in the winter and spring months among the boys showing its contagious character, for almost every one had an attack. It was not conveyed to the girls, as there was no opportunity except in class at school hours. The inflammation was very severe in a few individuals, but subsided in every case without leaving the least permanent injurious effects.

In the sudden changes of temperature on the last of February and first of March, three or four pupils were attacked with lung fever ; three of erysipelas, and two of rheumatism. Intermittent fever prevailed to some extent during the summer and fall months, but in all cases terminated favorably, producing only temporary debility. The undersigned would again respectfully direct your attention to the suggestion made in his last annual report touching the erection of a bath-house for the use of the pupils. Personal cleanliness is certainly very important to the health of schools of this kind, and it is impossible to have the benefit of it in this Institution unless bathing apparatus be provided. Frequent bathing is a preventive as well as a remedy for many diseases ; and its importance as such, should not be overlooked. The cost of building and fixtures whatever they may be, would be trifling when compared with the beneficial results derived therefrom.

LIVINGSTON DUNLAP, *Physician.*

BOOKS, MONEY, &c.

A set of Dick's Works, 10 vols. 12 mo., by Rev. Caleb Mills, Sup't of Public Instruction.

Hymn Book, in the Arabic language; by Rev. H. De Forest, Missionary.

Memoir of Boardman; by Rev. Gideon Williams.

Arthur's Tales, 4 vols. 24 mo.; by P. A. Emery.

Towards the purchase of a set of the publication of the American Sunday School Union, cash \$81 21, by gentlemen of Indianapolis; \$3 00 by Mrs. Dean of Cincinnati, and \$21 50, by the Officers and Teachers of the Asylum.

Nine dollars and ten cents contributed for the benefit of the library, by visitors.

A collection of fossils and minerals; by James Jameson, Esq.

THOMAS MAC INTIRE, *Sup't.*

INDIANA DEAF AND DUMB ASYLUM, Nov. 1, 1855.

RULES

FOR THE

ADMISSION OF PUPILS, &C.

I. All the Deaf and Dumb of the State, between the ages of ten and thirty years, are entitled to an education, without charge for board or tuition, in this Institution, upon compliance with its Rules. No certificate of any kind is required for admission. Persons, however, desirous of placing a pupil in the school, should write to the Superintendent, informing him of the name, age, residence of the mute, the cause, if known, of deafness, &c. The Superintendent will immediately answer, stating the time when the pupil will be received. This course is in all cases, recommended, though none will be refused who come at the commencement of the session. Applications in behalf of persons of more or less than the required age, will be considered by the Trustees, who reserve to themselves the right to accept or reject such applicants, as they may deem just and proper.

II. Pupils from other States are received at the rate of one hundred dollars per session of ten months, for board and tuition.

III. The length of the course of instruction is five years: and, that the pupils may become more proficient in their studies, they

are allowed and advised to remain one year longer. At the end of six years, the Superintendent may select such pupils as he may consider would be particularly benefitted by continuing longer at school; and, if approved of by the Board of Trustees, they shall be permitted to remain an additional year.

IV. Pupils will be admitted on the following conditions: 1st. The pupil, well provided with clothes, is to be brought to the Asylum punctually at the commencement of each session, for the period of five years, unless detained at home by his or her own sickness. 2d. The pupil is to remain in the school until the fifteenth day of July of each year. 3d. No parent or guardian shall be allowed to take a pupil out of the school without the consent of the Board of Trustees.

V. It is the intention of the Trustees to render the Institution self-supporting, so far as practicable, and that every pupil, on leaving its walls, shall be so proficient in some useful occupation or trade, as to be able to procure a livelihood, without reliance on the charities of others. In accordance with this design, all the scholars will be required to labor a portion of each day, the girls in performing the lighter kinds of house work, and in various kinds of needle-work, as plain sewing, ornamental work, dress-making, or millinery, &c.; and the boys at various trades, the necessary work about the Asylum, and the cultivation of the farm and garden.

VI. The annual sessions of the school continue ten months, commencing on the 15th day of September, and closing on the 15th day of July. *Every pupil is to come promptly on or before the first day of the session, and is to remain until the last day of the same. The only exceptions allowed are cases of sickness.*

VII. No pupil, unless under extraordinary circumstances, can be received at any other time than the commencement of the session.

VIII. Parents and guardians are required to furnish annually to each pupil, the following supply of clothing:

FOR THE MALE PUPILS.

WINTER CLOTHING.

2 Coats,	5 pairs of Socks,
2 Vests,	1 pair of Boots,
2 pairs of Pantaloons,	2 pairs of Shoes,
5 Shirts,	2 Hats, or 1 Hat and 1 Cap.

SUMMER CLOTHING.

2 Coats,	2 pair of Pantaloons,
2 Vests,	1 Palm-leaf Hat.

ADDITIONAL ARTICLES.

1 Ivory Comb,	2 pairs of Suspenders,
2 pairs of Wooden Combs.	2 pocket Handkerchiefs.

FOR THE FEMALE PUPILS.

3 or 4 Calico Dresses,	2 pairs of Summer Stockings,
1 Woolen or Worsted Dress,	2 pairs of Winter Stockings,
1 Sunday and 1 Sun Bonnet,	2 Night Gowns.
2 or 3 changes of underclothing,	3 pairs of Shoes,
2 Pocket Handkerchiefs.	

ADDITIONAL ARTICLES.

1 Shawl,	2 Hair Combs,	1 Coarse and 2 Ivory Combs.
----------	---------------	-----------------------------

In addition to the above out-fit, a sum of not less than \$3 00 is to be deposited with the Superintendent for incidental expenses. repair of shoes, &c.; any part of which remaining unexpended. will be returned at the close of the session.

It is not intended that the clothing should be of an expensive kind. For boys' winter apparel, plain home-made cloth is sufficiently good. For summer wear, country linen will answer for pants, with some kind of dark goods or prints for coats and vests. Girl's calico dresses may be made of a cheap article which will not fade; and while for older girls, at least, one pair of morocco shoes should be furnished, one or both the other pair should be of good calf-skin. On all articles of clothing which it is possible to mark, the full name of the pupil should be written with indelible ink. Each pupil should be supplied with a trunk or a chest.

IX. Pupils can be furnished with clothing in the Institution. only in accordance with the following Legislative enactment :

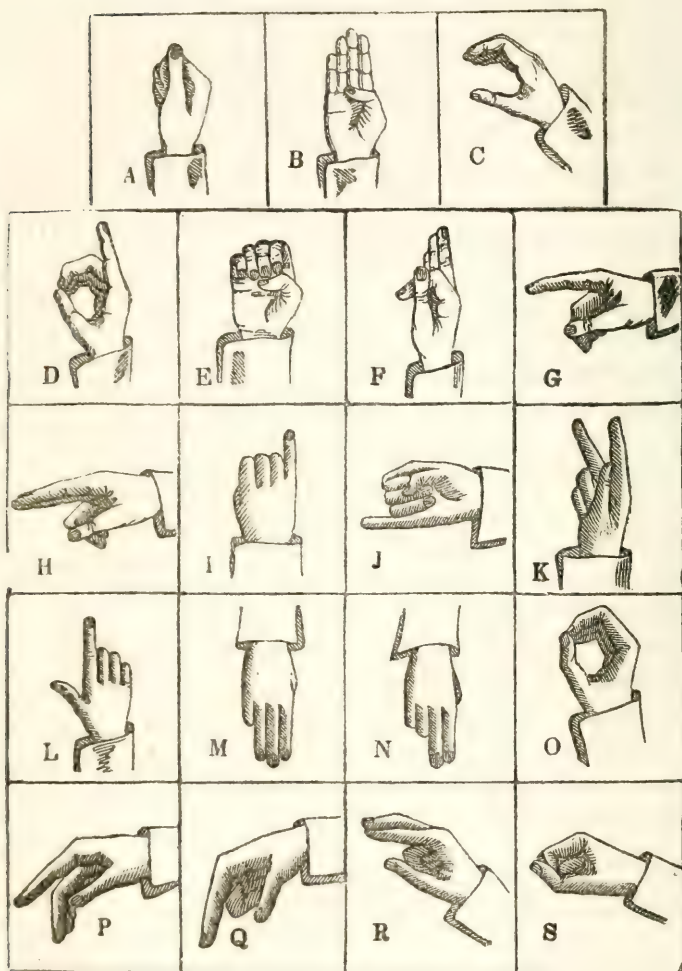

"That when the patients of the Hospital for the Insane, and pupils of the Institute for the Blind and Asylum for the Deaf and Dumb are not otherwise supplied with clothing, they shall be furnished by the proper Superintendent who shall make out an account therefor, in each case, against the respective counties from which said patients and pupils were sent, in an amount not exceeding twenty dollars per annum for every such patient, which account shall be signed by the Superintendent and attested by the seal of the Hospital, Institute for the Blind, or Asylum for the Deaf and Dumb, as the case may be, and the Treasurer of State shall charge the account thus certified to the county from which the patient was sent, and credit the amount to the current expense fund of the Indiana Hospital for the Insane, Institute for the Blind, and Asylum for the Deaf and Dumb."

"SEC. 3. When such certified account shall be received by the Treasurer of the proper county, to whom it shall be immediately sent upon its reception by the Treasurer of State from such Superintendent, such county treasurer shall cause the same to be paid out of the county treasury to the Treasurer of State. And such county treasurer shall collect the amount of such account from the estate of such patient, or pupil, if he have any, by suit, if necessary, in the name of the county: *Provided*, That if such patient or pupil have a family, at least five hundred dollars of his property shall be exempt from the payment of such account. And suit for the collection of such account may be commenced in the county to which the account is certified, but the Court in which it is instituted, shall appoint a guardian *ad litem* for such patient or pupil: and if he have a wife, shall cause at least twenty days' notice of the commencement of such suit, to be given her in writing. And no other notice of such suit, except as herein provided shall be required."

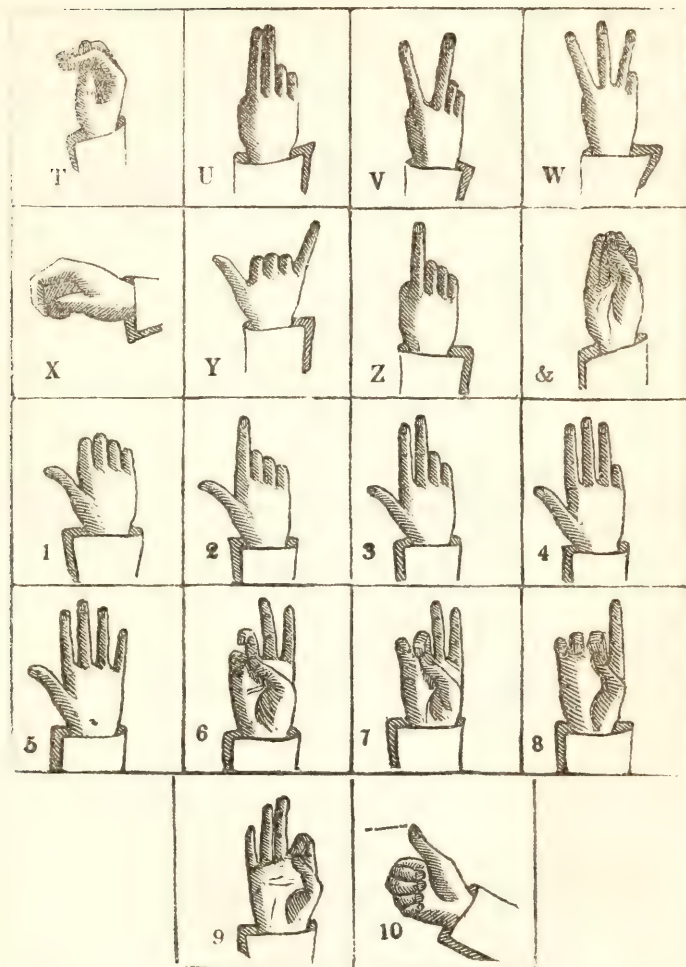

X. Those persons bringing pupils to, or taking them away, cannot be furnished with board, lodging, or horse-keeping at the Asylum.

XI. All business letters, or letters of inquiry in regard to pupils in the Asylum, or those whom it may be designed to place there, should be addressed to "THOMAS MAC INTIRE, *Superintendent, Institution for the Deaf and Dumb, Indianapolis.*" All letters for pupil must be pre-paid, and contain the words, "*Institution for the Deaf and Dumb,*" as part of their direction.

COMMISSIONERS' REPORT.

*To His Excellency JOSEPH A. WRIGHT,
Governor of the State of Indiana:*

The Commissioners of the Hospital for the Insane herewith present to your Excellency their annual report.

There has been no change in the officers of the Hospital during the past year; and through the blessings of a merciful Providence, more than an ordinary degree of health has been enjoyed both by the officers and patients. For particulars, in relation to the general health of the Hospital, the number admitted, discharged, now under treatment, and all statistical matters connected with this Institution, we beg leave to refer you to the accompanying report of the Superintendent.

The completion of the South wing has been retarded in consequence of the unusual amount of sickness in this vicinity; yet it is in such a state of forwardness as to insure its early completion and occupancy. This part of the Hospital, in the opinion of scientific men, is the best arranged and adapted to the purposes for which it is designed, of any similar building in the Union.

The new boiler house and stack, models of durability, and fine specimens of architectural taste, have been completed since our last report. The requisite machinery for heating the entire building has all been procured and is in successful operation. The new steam suction and force pump, supplies the farthest extremities of the Hospital with an abundance of hot and cold water for the use of the

patients, heats all the wards, and has plenty of power in reserve for the North wing when completed.

There is no insurance on any of the Hospital buildings or machinery, and there would be but little necessity for any, if the Hospital were supplied with hose, which, in case of a fire, could be attached to the force pump and water thrown on any part of the Hospital buildings. The attention of the Legislature was called to this subject in our last report, and no special appropriation having been made, we again present it, for the consideration of your Excellency. The amount of hose necessary, will probably cost from eight hundred to one thousand dollars.

The management of the farm and stock has been quite satisfactory, as will be seen by the accompanying report of the Steward, to which we respectfully refer you.

We would also suggest, that while the State is furnishing libraries to every township within her borders—alike creditable to her benevolence and resources—that early provision be made for a suitable library for the Hospital. Patients who are convalescent would derive much benefit from the reading of a judicious well selected library; and when discharged would return to their friends not only physically, but intellectually improved. Another consideration why suitable books should be furnished to those who are convalescing is, it may be the only time they have ever had, or will have to store their minds with useful, practical knowledge.

The materials for the North wing of the Hospital already procured, are properly housed and taken care of. The increasing demand upon the Hospital for more accommodations, require the erection of the North wing at as early a day as possible.

In conclusion, we report the Hospital for the Insane, in all its appointments and management, in a healthy, prosperous condition—accomplishing a great amount of good; and while it is a blessing to the unfortunate, it is a proud monument of the enterprise and benevolence of a great and growing State.

SUPERINTENDENT'S REPORT.

To the Board of Commissioners :

GENTLEMEN:—It is through the mercies of Him who controls all things, that we are again enabled to assemble together at our annual meeting without being called upon to mourn the loss of any of the official members of the Indiana Hospital for the Insane; and it is becoming and proper on this occasion, that we should return our sincere gratitude to the Dispenser of all good for His protection, during this, the most unhealthy season that has transpired since the erection of these buildings. While all around and throughout the country have suffered to an unusual extent from febrile diseases, the Hospital has been spared this common autumnal scourge. Every phase of fever, however, common to this region, have been brought here by newly received patients. Indeed, with few exceptions, every insane person admitted to the Wards during the past summer, and thus far this fall, had fever in some form or other; but notwithstanding these unfavorable circumstances, we have been fortunate enough to escape. Besides the patients, there are forty-five persons resident, and employed in various capacities about the Hospital, nearly all of whom have enjoyed uninterrupted health. At this time we are enabled to report the house entirely clear of all diseases arising from miasmatic origin, except a few of the recent as above stated.

This happy condition is attributable in part to the location of the Hospital buildings, but more especially to the police and hygienic

rules steadily and perseveringly enforced, without which we should be visited every fall by the whole catalogue of autumnal afflictions.

The applications now on file for admission, including those who have been discharged for chronicity, number above six hundred. With very few exceptions all those whom we have been compelled to discharge incurable, are seeking to be re-admitted, and we regret to mention the lamentable fact, that many of the recognized chronic and incurable cases of insanity in the State, are subjected to all the inconvenience incident to indigence, and are not only shut out from all probability of mental amendment, but are suffering in many instances for the comforts of life as well as for their bodily complaints.

This wretched condition of a portion of our fellow citizens should operate as a powerful incentive to the true philanthropist to seek out and urge some policy, which shall eventually secure to the unfortunate incurable insane, a comfortable home, where, if the mind cannot be restored, at least the body may receive that attention which humanity and the age imperiously demand. The law for the admission of patients to this Institution denominates many cases of insanity cronic, which are really curable, if time was allowed for their treatment, but the want of room often compels us to discharge cases which only requires a few years, and proper moral treatment for their restoration, to make place—as the law specifies—for recent and which are designated curable cases. The experience of everybody who has been connected with the specialty, and made themselves familiar with the statistics of similar Institutions, are posted up in the history of lunatics, who have persisted for years in the most absurd delusions which lead their friends to believe they were beyond redemption, but still did their duty in persevering in their efforts to restore them; and time, with a rational treatment, eventually brought about sanity. The history of our Institution covers but seven years, and already our records will show several very striking instances of cures illustrative of the beneficial effects alone of *time* on insanity. Where the bodily health is unimpaired and all the animal functions remain intact, moral and physical training is all that can be depended upon for bringing about such aberrant minds, and this training requires a great deal more time than is allowed by the law, growing out of the urgency of cases and the want of room.

It requires months, sometimes, before the physician is enabled to

learn the true source of his patient's trouble, and it occurs sometimes, that ere he has fully tried the appliances in his hands for their restoration, his patients are forced out by recent and urgent cases. It is greatly to be regretted that the accommodations in the Hospital will not permit us to keep every insane person under treatment till every possibility of effecting a cure vanishes; indeed our arrangements should be ample enough to make the Hospital their home, until they either get well or die, then these pitiable objects would have a fair chance for their lives, there would be more cures effected, and a less number of insane in the country. It would cost less for the support, and thus diminish the burdens of the people. We, with one million of inhabitants, expend thirty thousand dollars a year for the support of our insane, including, however, the building expense going on from year to year. We may say our commonwealth is paying annually sixty thousand dollars on account of her insane. This, under all the embarrassing circumstances which surrounded the early history of the Institution, may be considered a munificent appropriation; but more is required before sufficient room can be made for all who are importuning for assistance. Massachusetts, with about an equal number of inhabitants, annually expends for current expenses alone, for her insane, one hundred and forty-six thousand dollars. Since the year eighteen hundred and fifty, she has erected a Hospital at Taunton, which is now in full operation, accommodating two hundred and fifty-six patients. During the late session of her Legislature, that body appropriated two hundred thousand dollars towards building the third State Lunatic Hospital for her insane. So well satisfied were the Assembly of the importance and *economy* of this measure, that the bill passed without discussion, and without a dissenting voice. There are other States, besides Massachusetts, awake on the subject of providing, on a larger scale, for their insane. New York, Virginia, Kentucky, and Ohio are all moving in this matter, and are met with a hearty response from the people. Not only humanity is consulted, but it is pretty clearly established that the more insane patients the State can accommodate with Hospital treatment, the more economical it is for the tax-payers; and, what is of more importance to community, a greater number of cures are effected.

We have merely referred to the foregoing facts to show you that we are not alone in believing that the more of our insane we can

accommodate, the more success would attend our labors, and the less burdensome it would be to the people.

Since the first opening of the Hospital, there has been admitted to the Wards, nine hundred and ten patients. This covers a period of seven year—less twenty one days. Of the number received, four hundred and eighty-five were discharged cured, eighty-eight were discharged improved, fifty-eight unimproved, and eighty-three have died.

During the past year, one hundred and ninety-one applications were received for admission, of which number one hundred and seventy-one were accommodated, leaving twenty, which we were compelled to reject for the want of room. The history of these cases warrants the belief, that they could have been very materially benefited by treatment in the Hospital; but as months elapse, their chances for restoration must gradually diminish. Insanity, like all other maladies, requires early medication to arrest its progress. Postponement of this advice, almost certainly dooms the insane to misery for life. At this moment there are many of our insane poor in the State, confined in jails and out-houses, whose hopes are crushed, not even the shadowy gleam of a hope allowed to peer into their lonely and dismal domicils, where they are left day after day to commune with their troubled thoughts, and writhe in imaginary impending dangers—wallowing in their own effluvia—unconscious that there is a God, or that they have compeers around them who are careless of their fate, or at least seem to be indifferent as to whether anything is done for their relief or not. What is to be done to relieve them? That is the question. My own opinion is, that we should complete the present contemplated capacity of the Hospital as soon as possible, and admit all the patients the buildings will accommodate, without reference to the age of their insanity.

There are many insane epileptics in the State who are very dangerous to community, and ought to be provided for in the Hospital; but their applications are refused on the supposition that insanity arising from epilepsy, is incurable; and without doubt, this position is correct as a general rule. There are, however, occasional exceptions. At any rate, whether it is the rule or the exception that predominates, every class should have the privilege of availing themselves of all the means of regaining their mental and physical health, and, if neither the epilepsy nor the insanity can be relieved, there is, at least, a chance to improve their personal habits. The

deplorable situation of this unfortunate class of our citizens, calls loudly for assistance, and nothing seems so humane and appropriate, as an enlarged area of accommodations at the expense of the State. It is hoped that the spirit of philanthropy which is abroad, may devise some plan by which the epileptic as well as the insane may be properly treated and cared for, and not left to rust out an existence that might be made comparatively useful and happy.

Three hundred and thirty-one patients were treated in the Hospital during the year. *One Hundred and fifteen* were discharged cured, *twenty* have died, and *one hundred and ninety-six* remain in the Hospital. Five of the deaths occurred in a few days after their admission, and one especially, in four and a half hours after her reception. The friends of the deceased awaited the result, and then removed the remains back to her home.

The result of this year's labor has been equal to our expectations. We look back upon it with no little satisfaction, and regret nothing; but the want of room to accommodate more of those who have so pitiously importuned our assistance.

You will observe in the accompanying tables that there is a blank in the "improved" and "unimproved" columns where the previous years, there were figures indicating the number of patients under those heads. The reason for these clear columns is attributable to the anticipated early completion of the new wards, which enabled us to make room for those who otherwise must have been discharged "improved" and "unimproved," for the want of room to keep them longer.

From this point we have a pretty fair view of the entire condition of the insane of the State. The number, from all the information in our possession, is not far from a thousand, many of whom are living in squalid poverty, without the least spark of hope of their condition ever being any better. The applications on file are no indication of the entire number of insane within our borders, as facts in our possession fully testifies. Many persons, being aware of the object of the Institution, and the law for its government, content themselves by writing and making inquiry about room, before they proceed to make out the necessary papers; and by this means we are enabled to form a pretty good opinion as to the number of insane in the State. As in other States, so we will find in this, as every decennial period returns there will be an increase in the number of patients; that the number will bear an exact proportion to

the accommodations afforded by the State for the treatment of the insane; that is, although the State is rapidly increasing in population, her insane will diminish in proportion to the facilities for treating and taking care of them.

The average cost per annum of keeping a patient in this Institution is about one hundred and twenty-five dollars. This includes subsistence, medicine, officers' salaries, and every other expense, except clothing. The amount expended for current expenses is a fraction over three hundred and thirty dollars to each county in the State.

In my last report, I called your attention to a disposition prevailing among some of our citizens, to prepare and fit up apartments at the county poorhouses for the incurables; and I only refer to it here to reiterate the opinion I then expressed, and to add one more reason against adopting such a policy. Besides the almost impossibility of obtaining the necessary pecuniary means in our sparsely settled counties, to erect appropriate buildings and employ competent persons to take charge of the bereft of reason, I have no hesitancy in saying that, aside from the impossibility of securing proper medical and moral treatment in our poorhouses, the expense would be a great deal more to the counties; and it might be added, with almost any amount of proof to establish the fact, that the poorhouse policy would increase the number of chronic cases in our State. This position, however, may be looked upon by the advocates of this policy as untenable; but a thorough investigation of the subject, and the workings of our law for the admission of patients, and the statistics of other State, and especially of Massachusetts, clearly establishes the fact that many of the recent cases become chronic and incurable for the want of early and proper treatment. Every year's experience goes to show to the observant medical man, that insanity absolutely requires early treatment; and if this period is lost, that the chances for success diminishes as years increase.

Entertaining, then, this view of the county poorhouse policy, and believing that a large portion of our people are averse to such a system, but are in favor of enlarging at the expense of the commonwealth, the present broad and liberal system of Hospital accommodations, I therefore would most respectfully urge upon your Board the expediency of bringing before the General Assembly, at as early a day as possible, the importance of giving this matter their

serious and earnest consideration. It is a question of the gravest import, and deserves at the hands of the Legislators a rigid investigation; and I am sure that if it is pursued with the spirit which its importance demands, the philanthropist will have reason to rejoice for the future prospect of the insane.

NEW SOUTH WING.

The new wing is very nearly completed. Already we have thirty-six patients occupying new apartments, and by the time our report is printed every vacant room will be filled. Sickness among the several kinds of mechanics, has retarded and prevented our full realization of a free occupancy ere this, of every part of this much needed addition to the Hospital. Thus far the arrangements for heating and ventilating have met our expectations; but the trial has not been made to its fullest, and required extent; consequently we are not prepared to give a detailed and satisfactory account of our operations in these particulars. One thing, however, may be mentioned, which we think is pretty well settled, and that is, the saving of fuel. The old boilers, owing to the plan upon which they were put up, required much more fuel than the new to generate the same amount of steam. The difference is calculated at twenty-five per cent. at least, in favor of Carpenter's reverting plan.

FINANCE OF THE HOSPITAL.

The report of the Treasurer of State, exhibits a tabular view of the monetary affairs of the Hospital, and the accompanying tables of the Steward, will show to whom and for what purpose the money was expended. The Legislature of last winter, very justly made appropriations to adjust all the old outstanding debts against the Institution—liabilities which had been accumulating almost from the earliest commencement of the buildings, and which could not under the circumstances at that time, have been avoided. Calculating upon the basis of the present prices of principal articles used in subsistence, we are enabled to assure you that the appropriations of last winter for current expenses for two consecutive years, will be ample.

CELEBRATION OF MAY-DAY.

May-day is hailed by the inmates with delight, and although this

is but the third celebration, already it is created quite an anniversary, which is looked forward to with interest, by all those connected with the Hospital. At our late celebration, above a hundred patients partook of a repast prepared for the occasion in the adjoining wood. Those of the household unable to attend were waited upon in their wards and everything made to approximate as near the scene in the grove as the surrounding circumstances would permit. These festival occasions are calculated to do much good in imparting cheerfulness and awaking new ideas, and breaking up old ones. So well satisfied am I of the usefulness of out door scenery and labor, that I have no hesitancy in saying that ten per cent. more cures could be effected, were our grounds arranged so that every inmate would be as safe out as in the wards ; but before we can expect to avail ourselves every day of a full immersion of fresh air and light, we must have airing courts constructed so as to afford every facility for amusing the patients, without running any risk of elopements. Whenever we can trust patients to walk out with an attendant, we begin to have hopes of being able to do something to ameliorate their condition. Beyond the walls of the Institution, however, there is nothing to prevent the escape of a patient, except through the mere strength and activity of attendants. There should be yards or airing courts attached to every Hospital, so that every inmate that was able to walk, could go out into the pure air and sun whenever it was thought expedient by the medical officers. As it is, especially in this Institution, we are obliged to depend entirely upon the adroitness of our attaches for the return of patients when they are permitted to air themselves. Although our halls are large and well ventilated, affording ample room for promenading ; the air and exercise is not like that experienced by man in the open broad sunlight of day, where every inspiration is part of the uncontaminated breeze that is passing loaded with naught but buoyancy and health. I earnestly hope that your board will be able to impress the next General Assembly with the great importance of making a special appropriation for fencing off part of our grounds into airing courts; and in order to bring the subject properly before that body, I would, most respectfully, advise that surveys and estimates be made with reference to the construction of these necessary out-door Hospital appendages.

Besides the advantage of affording a secure place in the open air for patients, where they may walk about unrestrained by the con-

stant proximity of an attendant ; the area may be made both useful and ornamental by erecting mechanic shops for the construction of light fancy articles, and engaging in various innocent sports, all of which has a decidedly beneficial effect on the insane. Much might be said to illustrate the good effects of airing courts on the lunatic, but the name is enough to recommend it to your Board. An airing court! Who could expect to enjoy physical and mental health without a free respiration of the atmosphere and a full and untrammelled admission to the vivifying rays of the sun? None. You might as well attempt to produce a crop of any of the known vegetables from seeds planted in your cellars, as to expect man to enjoy health—the greatest boon in life—pent up in-doors, drawing a mere pittance of what his maker intended he should have in abundance, free and without price. The vegetable seed which germinates in silence and the dark, seeks light and air; and if in a crevice, peers out in such a way as to show that its flowers owe their beauty and their virtues to the air and sun. Even the ligneous portion of the vegetable world,—the trees of the forest,—will stunt and grow worthless, without free motion in the wind and a full flood of light which will move every fibre, open every cell, and expose every leaf. So with man: if he is deprived of a full supply of these elements which were intended by our Creator for all conditions of mankind alike, in kind and quantity, he pines, dwindles, and passes away, without having a fair chance to fulfil his destiny here and prepare himself for a better world, hereafter. A small appropriation will enable your Board to erect such courts as will afford an opportunity to give every patient an airing every twenty-four hours. I hope you will consider this matter favorably, *and present it to the next Legislature.*

FOURTH OF JULY CELEBRATION.

This anniversary so dear to every lover of liberty, was celebrated as on the two preceeding years, with the happiest effects. Including the employees, above two hundred inmates partook of an appropriate dinner in the grove; where Dr. Torbet read the Declaration of Independence, and an oration of singular appropriateness was delivered by Dr. Elliott. The ceremonies closed by a dance on the green. Although the new scenes were not startling enough to break in upon the delusions of many of the participants, the salutary effects

were very evident, and fully justifies the pains it requires to get up these celebrations and amusements.

MINISTERIAL SERVICES ON SABBATH.

It gives me great pleasure to acknowledge the ministerial services in the Hospital Chapel during the past year, by the following gentlemen, viz: Rev. Mr. Stevenson, of the third Presbyterian Church; Rev. Mr. Dyer of the Baptist Church; Rev. Mr. Williams of the Baptist Church; Rev. Mr. Noble of the M. E. Church; Rev. Mr. Crary, of the M. E. Church; Rev. Mr. Foster, of the Universalist Church; Rev. Mr. Eddy, of the M. E. Church; Rev. Mr. Combs, of the Christian Church; Rev. Mr. Webb, of the M. E. Church, and the Rev. Mr. Talbott, of the Episcopal Church.

ACKNOWLEDGMENTS.

Through the kindness of the Editors and publishers of the following newspapers and periodicals, we have been favored the past year with an immense amount of literary matter, which has contributed to the amusement and instruction of a large portion of our patients. Newspapers, and Legislative documents, are sought after with great interest, and perused with avidity, and especially if they emanate from localities with which patients are familiar. We feel under lasting obligations to those gentlemen connected with the press, who have so generously continued their favors from year to year.

No class of individuals in community have aided us so much in diffusing cheerfulness in our wards, as the corps editorial. Their products have flown in free, and without price, from every section of our State, affording our household an opportunity of whiling away the pleasant winter hours, and keeping up with the current news. We have also been favored with newspapers from other States for which we feel very grateful.

A list of Newspapers and Periodicals sent to the Asylum gratuitously.

We take this occasion to acknowledge our obligations to the following members of Congress for valuable papers and public documents: Hons. J. D. Bright, John Pettit, S. Miller, W. H. English, C. L. Dunham, J. H. Lane, T. A. Hendricks, S. W. Parker, J. G. Davis, D. Mace, N. Eddy, E. M. Chamberlain, A. J. Harlan, and Gen. Joe Lane. We are also indebted again to Dr. E. W. H. Ellis for valuable papers, books, and, especially, for a volume pertaining to agriculture and mechanics. Also, Mr. C. W. Cady presented us with a choice selection of rare newspapers and magazines. Rev. Mr. Packard, of the Sunday School Union, through the Rev. Mr. McIntire, Agent for this State, presented the Institution

with several handsome engravings, and a number of excellent papers on morals and religion. These donations from the Sunday School Union, are distributed in every ward in the Institution.

Philip F. Snider, of Philadelphia, through the politeness of his brother, presented the Institution with a number of beautiful engravings for the adornment of our halls—for which we thank him.

We are again indebted to R. Brackenridge, Jr., of Ft. Wayne, for a donation of one hundred and twenty-five dollars, to be laid out in the purchase of shrubbery, ornamental and fruit trees, to decorate the surrounding grounds. This gentleman has for three consecutive years, made similar gifts; which, together with like donations from other sources, we have been enabled, during the two last springs, to transplant about three thousand shrubbery, forest, and fruit scions. Mr. Constantine P. Sutermeister, of Laporte, presented the Hospital with fifty dollars, which he requested should be expended for shrubbery, &c. Trees for shade and ornament, and trees to bear fruit are of the highest importance to the patients; the one to cool the air and please the eye, the other to add a grateful and highly nutritious article to their food. My experience in general practice, has led me to the conclusion that those families were healthiest who used freely of ripe fruits in the proper seasons. The acids contained in most fruits are combined in such proportions as to make them grateful to the taste of the patients. Under any circumstances, ripe fruit never injures, but almost always assists digestion. Entertaining these views, I have embraced every opportunity to transplant fruit trees on a scale which will eventually supply the Hospital in the proper season with every variety, and in abundance, of the fruits common to our climate.

Drs. Elliott and Torbet, my assistants, have performed their arduous duties with promptness and fidelity, and it gives me pleasure, on this occasion, to bear testimony to their readiness at all times to carry into effect the police of the establishment. The interest which they have always manifested for the Institution, and for the specialty pertaining to the treatment of the Insane, has rendered my intercourse with them everything that I could desire.

I. H. Shimer, the Steward of the Hospital, is a faithful officer, economical and efficient in all the details of his position. His experience and success as a farmer, is fully illustrated in his report of the products of the farm. The farm contains one hundred and sixty acres—eighty acres cleared, and eighty acres in woodland.

Every acre is in use. The cleared is cultivated in Indian corn, grass, potatoes, and the various vegetables. The woodland is used for pasture. We should have more land connected with the establishment both for cultivation and pasture. We should then have an opportunity of taking out more of our patients to labor, which exercise is doubtless of immense advantage to a large majority of the insane. Besides this great lever in the treatment of the insane, the Steward would be enabled, with the force on the farm, (that is now lost) to supply all the grain and vegetables necessary for the House. I am satisfied that it would be cheaper for the State to purchase lands adjoining the premises, not only for the reasons mentioned above, but for another which in the future must become the policy of the Institution, namely: the furnishing of our own meats. This item in our subsistence bill is large, and from present appearances there is very little if any prospect of it being less. With more land we should have very little difficulty in fattening our own cattle without increasing our present force. While speaking on this matter, I wish to call your attention to the county road, lying a few rods from the western extremity of the buildings. The reasons assigned in my last report for its re-location, apply with as much force now as then. The distance will not be much increased, and the ground upon which it is proposed to locate it will be equally as good, and moreover the annoyance from the proximity of a public road to an Institution like this, will be abated. It seems to me there can be no valid objections to this proposition, especially, as the re-location would not touch or interfere with any other lands than the premises of the Hospital.

Mrs. Mary Wright, the Matron, has conducted her department with her usual industry and promptness. Her report, accompanying this, will exhibit the amount of work done during the past year by the department under her supervision.

RECAPITULATION.

By referring to the accompanying tables you will see what has been the result of our labors for the year: one hundred and seventy-one received this, against one hundred and sixty-nine last year; one hundred and fifteen cured this, against one hundred and fourteen last year. Last year there were but thirteen deaths; this year there were twenty deaths. The results, upon the whole, are equal to our expectations.

In closing this report, gentlemen, permit me to return you individually and collectively, my sincere thanks, for the courtesy you have extended to me in all our social and official intercourse.

Very respectfully,

JAMES S. ATHON,

Superintendent.

October 31, 1855.

A N A C T

FOR THE GOVERNMENT OF THE INDIANA HOSPITAL FOR THE INSANE, AND THE CARE
OF THE INSANE OF INDIANA.

PREAMBLE.

WHEREAS, By the taking effect of the present constitution the office of Associate Judge is abolished:
AND WHEREAS, There is no law now in force regulating the admission of patients into the Hospital
for the Insane: AND WHEREAS, An emergency exists making it necessary that this act shall take effect
immediately: therefore,

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana,* That there shall be six Commissioners of the Indiana Hospital for the Insane, who shall be elected by a joint vote by the General Assembly, and three of whom, to be determined by lot, shall serve two years, and the other three four years, from the day of their election, and until their successors are elected and qualified. When a vacancy occurs during the recess of the General Assembly, it shall be filled by the Governor. The person so appointed shall serve until an election is made by the General Assembly. The person elected by the General Assembly shall serve out the residue of the term of the person holding the appointment when the vacancy occurred: *Provided,* No person holding the office of trustee in either of the benevolent institutions of the State shall hereafter be elected or appointed to the office of Commissioner of said Hospital: *Provided, however,* That those of the present Commissioners who have not served four years from the time of their elections, shall continue to serve as such Commissioners until they shall have served four years from the dates of their respective elections. The Commissioners before entering upon the duties of their office shall severally take an oath or affirmation faithfully and impartially to discharge their duties as such Commissioners, and in all respects conform to the laws in force relating to said Hospital. And in addition to the compensation now allowed by law to Commissioners, any Commissioner residing out of the county of Marion shall be allowed six cents per mile for each mile going and returning from the meetings of said Commissioners, estimated by the most direct route from his place of residence.

SEC. 2. The Commissioners shall be entrusted with the general control and management of the Hospital; they shall prescribe by-laws for the government of the same, conduct its affairs agreeably to the laws in force and such by-laws as they may establish; they shall have authority to appoint a Superintendent to take charge of the patients and Hospital, and to appoint a Matron and such assistant Physicians, Steward, and other principal officers as may be needed for the efficient and economical administration of the affairs of the Institution. They shall in their by-laws, prescribe the duties of the respective officers, their tenure of office, and determine their salaries, except as otherwise provided by law. The Commissioners may at their pleasure remove from office any officer of said Institution, except the Superintendent; and they may remove the Superintendent for incompetency, wilful neglect, or refusal to discharge any of his duties, or for any misconduct on his part which might render it improper for him to continue longer in his said office.

SEC. 3. Two of the Commissioners shall visit the Hospital together monthly, a majority of them together semi annually, and all the Commissioners together shall make at least one visit during the year. An annual meeting of the Commissioners shall be held on the second Tuesday of November.

SEC. 4. The Commissioners shall keep a full account of their proceedings in a book to be provided for that purpose. The officers of the Institution shall make reports to the Commissioners, as they may from time to time require: the Superintendent and Treasurer shall severally make full reports to them at their annual meeting, and the Commissioners at that meeting shall make a full report to the General Assembly, accompanying the same with the annual reports of the Superintendent and Treasurer.

SEC. 5. The Commissioners may take and hold in trust, for the Hospital, any lands conveyed or devised, and any money or other personal property given or bequeathed, to be applied for any purpose connected with the Institution.

SEC. 6. The Treasurer of State shall be the Treasurer of the Hospital, and shall collect all its debts, and for any neglect or violation of his duty he and his sureties shall be liable as in other cases.

SEC. 7. The Superintendent to be appointed under this act shall be a physician and a person of knowledge, skill, and ability in his profession. He shall reside in the Hospital, and devote his entire time and attention to the same, and the patients therein; he shall receive for his services an annual salary to be fixed by the Commissioners, and paid quarterly out of the State Treasury, upon the warrant of the Auditor of State, and shall also have the boarding of himself and family in the Hospital free of charge. He shall continue in office four years unless sooner removed by the Commissioners; and before entering upon the duties of his office shall take an oath or affirmation that he will diligently, faithfully and impartially discharge all the duties required of him by law.

SEC. 8. The Superintendent shall be the chief executive officer of the Hospital, and shall have the care and control of every thing connected therewith; he shall see that the several officers of the Institution faithfully and diligently discharge their respective duties; he shall employ such attendants, nurses, servants and other persons as he may think proper, and assign them their duties, and may at pleasure discharge them; he shall receive from the proper person the patients entitled to admission into the Hospital, and when cured discharge them; in all cases, however, he shall be subject to the control of the Commissioners.

SEC. 9. The Superintendent shall provide an official seal for the Hospital, upon which shall be the words "Indiana Hospital for the Insane," he shall make reports to the Commissioners, as by section four of this act is required, and in all things he shall conform to the requirements of the Legislature, and to the by-laws made by the Commissioners for the government of the Hospital.

ADMISSION OF PATIENTS.

SEC. 10. Insane persons residing in this State, having a legal settlement in any county therein, shall be supported and receive medical treatment in the Hospital, at the expense of the State, subject to the limitations and restrictions hereinafter mentioned. To entitle such person to admission into the Hospital, the following proceedings shall be had:

Some respectable citizen residing in the proper county shall file with one of the Justices of the Peace of said county a statement in writing, which shall be substantially as follows:

State of Indiana, _____ County, ss:

The undersigned, a citizen of the State of Indiana, states that _____ (naming the person) is insane. His insanity is of _____ duration, (or his living at large is dangerous to community,) he is a resident of _____ township in this county, and has a legal settlement in the State of Indiana. These facts can be proven by _____ and _____, (naming at least two persons, one of whom shall be a respectable physician.) Dated this _____ day, A. D. ____.

A. B.

SEC. 11. Such Justice of the Peace shall thereupon order the Clerk of the Circuit Court of such county to issue subpoenas for the persons named as witnesses, and such other persons as he may think proper, commanding them to appear before him at the court house in said county, at a specified time, to testify concerning the facts set forth in said statement. Subpoenas may also be issued for witnesses on behalf of the person alleged to be insane.

SEC. 12. Before the time specified for the appearance of the witnesses, the Justice of the Peace ordering the subpoenas to issue, together with any other Justice of the Peace of said county, shall visit the person alleged to be insane, and may, if he deems it necessary, employ some respectable physician of such county best acquainted with the person alleged to be insane, to accompany them in such visit.

SEC. 13. At the time appointed (unless the investigation shall be adjourned,) the officers, as in the 12th section of this act provided, shall proceed to examine the witnesses in attendance, at least one of whom shall be a physician.

SEC. 14. If after such visit and inquest the officers shall be satisfied of the truth of the facts set forth in the statement, they shall require the medical witness forthwith to make out a certificate setting forth—

1. That the patient is free from any infectious disease or vermin.
2. The age of the patient, and a concise history of the case.
3. The duration of the disease dating from the first symptoms.
4. The supposed exciting cause of the disease.
5. Whether the disease is hereditary.
6. Whether the patient has been subject to epilepsy.
7. Whether the patient has made any attempt to commit violence on himself or others.
8. Whether married or single.

9. Whether a professor of religion, and if so, what denomination.

10. Occupation.

11. The medical treatment pursued in the case, and any other circumstances known to the physician tending to throw light on the subject.

Such examining officers shall likewise forthwith make out a certificate as follows:

State of Indiana, _____ county, ss:

We, the undersigned, Justices of the Peace in and for said county, hereby certify that we have visited _____ of said county, a person alleged to be insane, and have this day held an inquest in regard to him according to law; we are satisfied that he is insane and a proper patient to be sent to the Hospital for the Insane for treatment; that his disease is of _____ duration; that his being at large would be dangerous to community; that he is a resident of _____ township in said county, and has a legal settlement within the State of Indiana. Witness our hands this _____ day of _____, A. D. _____.

A. B.

C. D.

SEC. 15. If after such visit and inquest the said examining officers shall not be satisfied of the existence of any of the facts necessary to be certified to entitle the person alleged to be insane to admission into the Hospital, they shall make out a certificate in the same form with that required by the preceding section, setting forth the necessary facts of which they are satisfied and the necessary facts which are not established to their satisfaction. The medical witness shall also make out a certificate as above required.

SEC. 16. Immediately after the inquest the said examining officers shall deposit with the Clerk of the Circuit Court the statement in writing, their certificate and that of the medical witness, all of which he shall label, file, and carefully preserve in his office. It shall be the duty of the Clerks of the Circuit Court in their respective counties to attend such investigation, and keep a book in which the proceedings in the investigation shall be recorded, and the Clerk shall make out a bill of the costs and certify the same to the County Auditor, and upon his warrant the same shall be paid by the County Treasurer.

SEC. 17. The Clerk of the Circuit Court, upon receiving the certificate of said examining officers, and the certificate of the medical witnesses, made out according to the fourteenth section of this act, shall forthwith apply to the Superintendent for the admission of said person into the Hospital. He shall at the same time transmit copies of said certificates under the seal of Circuit Court. Upon receiving the application, the Superintendent shall immediately advise the Clerk whether the patient can be received, and if so, when. The Clerk shall, thereupon, in due season, for the conveyance of such person to the Hospital by the time appointed, issue his warrant to the Sheriff or any other suitable person, commanding him forthwith to arrest such insane person and convey him or her to the Hospital. If the Clerk be satisfied of its necessity, he may authorize one or more assistants to be employed. Said warrant shall be substantially, as follows:

The State of Indiana, _____ county, ss:

To _____, Greeting:

Whereas, the proceedings necessary to entitle _____ to be admitted into the Indiana Hospital for the Insane as a patient, have been had according to law, you are hereby commanded forthwith to arrest said person and convey him to said Hospital, (and you are hereby authorized to take to your aid _____ assistants, if deemed necessary by you.) After executing the warrant you will make the return thereof to this office. Witness my hand and the seal of _____ Circuit Court, this _____ day of _____, A. D. _____.

_____, Clerk.

Upon receiving the patient, the Superintendent shall endorse upon said warrant a receipt substantially as follows:

Indiana Hospital for the Insane, A. D. _____. Received this _____ day of _____ the patient named in the within warrant. _____, Superintendent.

This warrant, with the receipt thereon, shall be returned to the Clerk who issued it, and shall be filed by him with other papers relating to the case; *Provided*, That in all cases the relations of the insane person shall have a right, if they choose to convey him to the Hospital. In such case the warrant shall be directed to one of them, and the person to whom it is directed, and his assistants shall, if demanded, receive the same compensation allowed for like services to others. *Provided, also*, That if the medical witness shall not state in his certificate that the patient is free from any infectious disease and from vermin, it shall not be the duty of the Clerk to apply to the Superintendent as hereinbefore provided.

SEC. 18. When a patient is sent to the Hospital, it shall be the duty of the Clerk to see that he is provided with proper clothing, and if not otherwise furnished, the Clerk shall purchase it, and in such case, the same shall be paid for upon the certificate of the Clerk and the order of the County Auditor, out of the county treasury. For a male patient, such clothing shall be as follows; A coat, vest, and two pairs of pantaloons, all of woollen cloth, two pairs of woollen socks, two pocket handkerchiefs, a black stock or neck handkerchief, a good hat of fur or silk, (or comfortable cap), a pair of shoes or boots, at least two cotton shirts, and a comfortable overcoat. For a female patient, two strong gowns, two flannel petticoats, two pairs of woollen stockings, one pair of shoes, two handkerchiefs, at least two cotton chemise,

and a large warm shawl or cloak. The clothing shall be new or as good as new, the woolen of a dark color, and shall be delivered in good order with the patient to the Superintendent.

[It is very desirable that extra and better apparel than merely that required by law should be sent with those accustomed to it, that when they become better, so as to attend church, ride or walk out, their self-respect may be preserved. In all cases, the patient's best clothing should be sent—it will be carefully preserved, and only used when deemed necessary for the purpose above mentioned. Jewelry, knives, &c., should be left at home, as they are liable to be lost. A trunk should also be provided for each patient.]

SEC. 19. When the patients are not otherwise supplied with clothing, they shall be furnished by the Superintendent, who shall make out an account therefor, in each case against the respective counties from which said patients were sent, in an amount not exceeding the sum of twenty dollars per annum, for every such patient, which account shall be signed by the Superintendent, and attested by the seal of the Hospital, and shall be delivered to the Treasurer of State, to be by him collected of such county as a debt due the said Institution.

SEC. 20. In case of the death of a patient at the Hospital whose funeral charges are not otherwise supplied, accounts thereof shall be made out, attested and collected as provided in the next foregoing section.

SEC. 21. If the Clerk shall neglect to deliver to the proper person a warrant for the conveyance of the patient to the Hospital as herein provided; or if the person to whom the warrant is directed shall not, within fifteen days after the receipt thereof, deliver the patient at the Hospital, the Clerk or person so offending shall forfeit the sum of fifty dollars, to be recovered with costs, in an action in the name of the Superintendent, for the use of such patient; and if any insane person shall be conveyed to the Hospital before the Superintendent shall have given notice that he can be received as hereinbefore provided, no fee whatever shall be paid to those by whom he was so conveyed.

SEC. 22. If any person conveying a patient to the Hospital under the provisions of this act shall conduct him in company with criminals going to the penitentiary, or shall suffer such patient to drink ardent spirits, the person so conveying him, and his assistants, shall forfeit all claim to the compensation allowed them by this act.

SEC. 23. If, according to the result of the inquest aforesaid, the patient shall be entitled to admission into the Hospital, the Clerk shall direct how he shall be taken care of until he can be admitted, and if necessary may direct his confinement in the county jail, and if all things needful for his comfort and proper care be not otherwise supplied, he shall furnish them, and the same shall be paid for out of the county treasury on the certificate of the Clerk and order of the County Auditor.

SEC. 24. Any patient may be discharged from the Hospital upon the application of the Superintendent to the Commissioners, and the order of one of the Commissioners thereupon. Incurable and harmless patients shall be discharged whenever it is necessary to make room for a recent case, as ordered by the Commissioners.

SEC. 25. Whenever an order shall be made for the removal of a patient from the Hospital, the Superintendent shall immediately give notice thereof, under his official seal, to the Clerk of the Circuit Court of the county from which said patient was sent, and thereupon said Clerk shall forthwith issue his warrant to the Sheriff of said county, which warrant shall be substantially as follows:

The State of Indiana. ——— County, ss:

To the Sheriff of ——— County, Greeting:

Whereas, the proper authority has directed that ———, a patient in the Indiana Hospital for the Insane from this county, be removed from said Hospital, you are therefore hereby commanded forthwith to remove said patient, and return him to ——— township in this county, whence he was taken to the Hospital. Witness my hand and seal of the ——— Circuit Court, this ——— day of ———, A. D. ———.

———, Clerk.

Immediately upon receiving such warrant it shall be the duty of the Sheriff, by himself or deputy, forthwith to execute the same and return it to the Clerk by whom it was issued, and if any Clerk upon receiving such notice, shall refuse, or neglect for the space of five days, to issue and place such warrant in the hands of the Sheriff, or if such Sheriff shall refuse to receive the same, or neglect for the space of ten days after receiving the warrant to demand such patient of the Superintendent, the expense of the patient shall, from the date of the notice to the Clerk until his removal, be charged at the rate of two dollars per week against the person so offending, and the amount may be recovered in an action with the cost of suit, in the name of the Superintendent, against the Clerk or Sheriff so offending; *Provided, however*, That it shall in no case be necessary for the Superintendent to give such notice to the Clerk when the friends of such discharged patient are ready and willing to remove him; but such patient shall at once be entrusted to their care.

SEC. 26. When a patient is discharged as cured, the Superintendent shall furnish him with suitable clothing, and a sum of money not exceeding twenty dollars, unless otherwise supplied.

SEC. 27. No idiot shall be admitted into the Hospital, and every such patient therein shall be discharged.

SEC. 28. If the application shall be made for the admission of more patients than the Hospital can receive, a selection shall be made as follows:

1st. Recent cases, (i. e.) when the disease is of less than one year's duration, shall have the preference over all others in the county.

2d. Chronic cases, (i. e.) when the disease is of more than one year's duration, presenting the most favorable prospect of recovery, shall be next preferred.

3d. Those for whom applications have been the longest on file, other things being equal, shall next be preferred.

4th. Each county shall be entitled to its just proportion, according to its population, but the Commissioners in the exercise of a sound discretion, may, if necessary, give preference to recent cases from one county over chronic cases from another county.

SEC. 29. When any patient discharged from the Hospital as cured, shall again become insane, any respectable physician may file with the Clerk of the Circuit Court a certificate setting forth the recurrence of the disease, and such facts and suggestions relating thereto as he may deem material; upon receiving such certificate, the Clerk shall immediately transmit a copy thereof, authenticated by the seal of the Circuit Court, to the Superintendent, and thereupon the same proceedings shall be had in all respects as when the certificate of the examining officers holding the inquest was transmitted.

SEC. 30. Should any insane person elope from the Hospital and return to the county from whence he was committed, it shall be the duty of the Sheriff of said county, upon being notified by the Superintendent, forthwith to apprehend him and take him back to the Hospital, and the Sheriff shall be paid by the Steward of the Hospital, by order of the Superintendent, the same fees as provided in other cases for the commitment of insane persons to the Hospital.

MISCELLANEOUS PROVISIONS.

SEC. 31. The taxable costs and expenses to be paid under the provisions of this act shall be as follows:

To the examining officers holding the inquisition, each two dollars per day. To the medical witness accompanying the officers on their or his visit to the person alleged to be insane, or attending the investigation and making out a certificate as required in section fourteen of this act, three dollars per day. To other witnesses the same fees as are allowed by law in other cases in the Circuit Court. To the Clerk of the Circuit Court the same fees as are allowed by law for like services in other cases, and the amount of postage upon all the communications to and from the Superintendent, which said Clerk is required to pay. To the Sheriff for serving process herein and attending the inquisition, the same fees as are allowed by law for like services in other cases, and for taking a patient to the Hospital or removing one therefrom upon the warrant of the Clerk, mileage going and returning at the rate of eight cents per mile, and fifty cent per day for the support of each patient on his way to and from the Hospital. To each assistant allowed by the Clerk and accompanying the Sheriff mileage at the rate of eight cents per mile going and returning. The computation in both instances to be made from the county seat to the Hospital by the nearest route. To other persons discharging the duties of Sheriff herein, as by this act provided, the same fees as are herein allowed the Sheriff, and to the assistants of such person the same fees as are herein allowed the assistant of the Sheriff. The costs specified in this section shall be paid out of the county treasury of the proper county, upon the certificate of the Clerk and the order of the County Auditor.

SEC. 32. When any person shall be confined as insane, a writ of *habeas corpus* may be issued as in other cases for his discharge; and the question of insanity shall be decided at the hearing; a decision of insanity shall not operate as a bar to the issuing of another writ: *Provided, however*, that when a patient is admitted into the Hospital, and a trial of his insanity has been had upon one writ, no trial shall be had upon another within a period of three months from the date of the first.

SEC. 33. No part of this act shall be construed to effect or change the laws heretofore in force in relation to the erection and completion of said Hospital, and the improvement of the Hospital grounds, nor in the manner of contracting work or materials therefor, nor in the manner of paying for such work or materials, but the same shall in all particulars be done according to the law heretofore in force in relation thereto; nor shall the same in any way affect the tenure of the present officers, or any action accrued or depending in favor of said Hospital.

SEC. 34. When any officer of the Institution is required by the by-laws of the Commissioners to give bond with security for the faithful performance of his duties, such bonds shall be made payable to the "Indiana Hospital for the Insane," upon such conditions as such Commissioners may prescribe.

SEC. 35. The Superintendent shall not be bound to appear and testify in any court in this State as

witness in any civil case, and in lieu thereof his disposition may be taken and read as evidence on the trial.

Sec. 36. This act shall take effect and be in force from and after its passage and publication.

JOHN W. DAVIS,

Speaker of the House of Representatives.

JAMES H. LANE,

President of the Senate.

Approved January 15, 1852.

JOSEPH A. WRIGHT.

The State of Indiana, Office of the Secretary of State:

I, CHARLES H. TEST, Secretary of State for the State aforesaid, certify that the foregoing is a true, full and complete copy of an enrolled act now on file at my office.

In witness whereof, I have hereunto set my hand, and affixed the seal of State, at Indianapolis this 16th day of January, A. D. 1852.

[L. S.]

CHARLES H. TEST,

Secretary of State.

A N A C T

TO AMEND SECTION NINETEEN OF AN ACT ENTITLED "AN ACT FOR THE GOVERNMENT OF THE INDIANA HOSPITAL FOR THE INSANE, AND THE CARE OF THE INSANE OF INDIANA," APPROVED JANUARY 15, 1852.

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana, That* section 19 of said act, which reads as follows, to-wit: "When the patients are not otherwise supplied with clothing, they shall be furnished by the Superintendent, who shall make out an account therefor, in each case against the respective counties from which said patient was sent, in an amount not exceeding twenty dollars per annum for every such patient, which account shall be signed by the Superintendent and attested by the seal of the Hospital, and shall be delivered to the Treasurer of State, to be by him collected of such county as a debt due the said Institution," be amended to read as follows to-wit: That when the patients of the Hospital for the Insane, and pupils of the Institute for the Blind, and Asylum for the Deaf and Dumb are not otherwise supplied with clothing, they shall be furnished by the proper Superintendent, who shall make out an account therefor, in each case, against the respective counties from which said patients and pupils were sent, in an amount not exceeding twenty dollars per annum for every such patient, which account shall be signed by the Superintendent and attested by the seal of the Hospital, Institute for the Blind, or Asylum for the Deaf and Dumb, as the case may be, and the Treasurer of State shall charge the account thus certified to the county from which the patient was sent, and credit the amount to the current expense fund of the Indiana Hospital for the Indiana, Institute for the Blind and Asylum for the Deaf and Dumb.

Sec. 2. It is declared that an emergency exists for this enactment, therefore, this act shall be in force from and after its passage and publication in the State Sentinel and Journal.

Sec. 3. When such certified account shall be received by the Treasurer of the proper county, to whom it shall be immediately sent upon its reception by the Treasurer of State from such Superintendent, such county Treasurer shall cause the same to be paid out of the county treasury to the Treasurer of State. And such County Treasurer shall collect the amount of such account from the estate of such patient or pupil, if he have any, by suit, if necessary, in the name of the county; *Provided*, That if such patient or pupil have a family, at least five hundred dollars of his property shall be exempt from the payment of such account. And suit for the collection of such account may be commenced in the county to which the account is certified, but the Court in which it is instituted shall appoint a guardian *ad litem* for such patient or pupil; and if he have a wife, shall cause at least twenty days' notice of the commencement of such suit, to be given her in writing. And no other notice of such suit, except as herein provided, shall be required.

Sec. 4. All laws and parts of laws coming in conflict with this act, be and the same are hereby repealed.

ANNUAL REPORT

OF

THE BOARD OF TRUSTEES

OF THE

WABASH AND ERIE CANAL,

TO THE GOVERNOR.

JANUARY 1, 1856.

INDIANAPOLIS:

WILLIAM J. BROWN, STATE PRINTER.

1856.

2 D. J.—8

TRUSTEE'S OFFICE, W. & E. CANAL, }
Terre Haute, Jan. 1, 1856. }

JOSEPH A. WRIGHT, *Governor of Indiana :*

DEAR SIR : I have the honor to hand you, herewith, the Annual Report of the Trustees of the Wabash and Erie Canal, to be disposed of, in the absence of the General Assembly, as the laws of the State require.

I am, very respectfully,
THOMAS DOWLING,
Resident Trustee, &c.

REPORT OF TRUSTEES.

To JOSEPH A. WRIGHT, Governor of the State of Indiana :

The Board of Trustees of the Wabash and Erie Canal have the honor of submitting to you their Annual Report. The year just closed has been one of great discouragement in the business of the Canal; the tables of revenue show a diminution from the receipts of last year, amounting to the sum of \$40,135 80. This deficiency is to be accounted for, generally, by the failure of the crops last year throughout the Wabash Valley, and the breaks occurring during the season of navigation, and which interrupted the passage of boats for several weeks of the time. The Trustees consider, however, that the deficiency is to be mainly attributed to the competition of the railroads traversing districts of country contiguous to the Canal, and diverting the trade and business which would otherwise have come to it. The effect of this competition upon the Canal has been more strikingly exhibited during the past year than ever before. A reference to the returns from the Ft. Wayne and Lafayette Offices affords evidence of this. The receipts of the latter Office alone show a deficiency of \$19,621 68, as compared with the previous year, while that of the former shows a deficiency of \$16,965 96. The last Office is the principal one in the Valley of the Wabash on the Canal at which shipments are made of the produce of the country seeking an eastern market, and the other Office is the first one within the State line, and at which entries are made of the merchandise coming into the country by the Canal. This deficiency at the Fort Wayne Office is in merchandise, which, since the opening of lines of railways, connecting many of the principal towns in the interior, which were formerly dependent upon the Canal for their supplies directly with Lake Erie and the eastern cities, has been steadily falling off, and the shipments of merchandise this year by the Canal are less by more than fifty per cent. than they were in the year 1853.

The delay in the opening of the Miami Canal of Ohio, occasioned by casualties, until the 4th of July, had considerable influence in lessening the receipts of the Fort Wayne Office, by cutting off the early Cincinnati trade. It is, however, not to be disguised, that the business of the Canal has been this year seriously affected by the competition of the railroads which now cover the State of Indiana, like a net-work, in every direction. The state of the markets for all articles of human food, during the year, has favored the transportation of the produce of the country by railroads, wherever they were accessible, and, as a consequence, we find that dressed hogs, in large quantities, are now being sent from Terre Haute to Cleveland, on Lake Erie, by railroad, a distance of 280 miles, to be there cut and packed. At the same time, pork and beef, in barrels and tierces, are sent by the packers from the same point to Evansville, on the Ohio River, by railroad, and this notwithstanding the Canal navigation between the two points is in good condition. It is possible that the peculiar condition of the country and the markets during the year may have increased the tendency to send forward the produce of the country by the more rapid means of transportation, even at the higher charges.

The Wabash Valley Road is now nearly completed to Huntington, and it is expected to be opened to Lafayette in 1856, thus bringing the competition of that road also to bear directly on the Canal.

Similar effects from the competition of railroads upon the business of Canals have also been experienced in the State of Ohio. The revenues from their Canals exhibit a large deficiency, notwithstanding the extraordinary increase in population of the State and the productions of the soil.

The Trustees regret to say that since the date of their last Report to the General Assembly, serious outbreaks have occurred in a portion of Clay county, by which the Canal property has suffered serious damage. The embankment of the Birch Creek Reservoir, (a necessary and indispensable feeder of the Canal in dry seasons) was cut and destroyed on the 10th of May, 1855, and the water collected for the safety and certainty of navigation, allowed to escape. This act of wanton outrage was perpetrated by an armed body of one hundred men, disguised by blackened faces and other concealments. The deed was done at mid-day, and a small body of workmen, placed there by the Trustees, were driven off at the peril of their lives. This breach was attempted to be repaired promptly, and a force was collected for the purpose; but while in the prosecution of their lawful labors, they were surrounded by a similar band of armed persons, and warned to desist and leave the site of the Reservoir. On the 31st of May, an attack was made on the aqueduct over Birch Creek, and by burning and cutting the same, that structure was greatly damaged and impaired. The Governor of the State was promptly advised of these outrages, and, after as short a delay as was possible, an armed

force was collected for the protection of the workmen while engaged in the repair of the breaches and re-construction of the aqueduct. These volunteers were placed under the direction of Gen. Dodd, one of the military aids of the Governor, who remained at the site of these disturbances until the repairs were completed. No sooner were these troops withdrawn, however, than the same band, on the night of the 29th of June, again made an aperture in the embankment, and permitted the water to escape from the Reservoir, thus hazarding, for many months, the safety of navigation. A series of outrages appear to have been deliberately planned and executed, in defiance of the laws of the State, and in derogation of the guarantees and pledges given for the security of the Trust property.

In the last report to the General Assembly, it was the unpleasant duty of the Trustees to refer to similar outrages committed on the same works in 1854. Though the Trustees had adopted every plan, and acceded to every demand made by the supposed authors of these lawless proceedings, these concessions were of no avail, and they had the mortification of witnessing the destruction of the works and structures on which thousands of dollars had been expended for the benefit of the State and her creditors. The Trustees regret to say, further, that no convictions for such offenses are probable in Clay county, every person arrested by General Dodd and the Sheriff having been discharged by the local magistracy.

Since the last annual report, the decision of the Supreme Court has been made, in the suit of the State against the Trustees, instituted for the purpose of compelling them to construct the side-cuts at Williamsport and Independence. It is in favor of the Trustees, and fully sustains the ground which they deemed it their duty to take, and which is fully explained in former reports.

The Trustees have to regret the death of their late colleague, Benjamin R. Edmonston, Esq., who departed this life on the 16th of August, 1855, at his residence in Dubois county, after a brief illness. Mr. Edmonston was an upright public man, and greatly respected for his devotion to the interests of his adopted State. This vacancy, as was proper, has been promptly filled, and Austin M. Puett received the Executive appointment, completing the organization of the Board.

CANAL LANDS.

Of the lands lying in the Vincennes District, there has been sold during the year ending 30th November, 1855, 39,033.53 acres, for the sum of \$79,403 43. This shows a decrease from the corresponding period of last year of 73,929.20 acres sold, and \$155,278.30 in cash.

This heavy diminution in the receipts from this source of revenue is doubtless attributable to the causes alluded to in the report of last year. The same causes do not now exist, and it is to be hoped that the sales for the next year will considerably exceed those for 1855.

The total receipts on account of lands east of Tippecanoe, for the year ending 30th November last, were \$9,728.25, of which was in scrip, \$20 principal and \$17.61 interest.

The total receipts on account of lands west of Tippecanoe, for the same period, were \$21,946.28, of which \$365 was in scrip.

The Trustees have been somewhat disappointed in not realizing a larger amount of the indebtedness due on account of these lands during the past year, but the depressing influences referred to in last year's report doubtless operated to prevent it. By the end of next year it is expected that most of this debt will be paid up.

In consequence of the diminution of the debt for these lands, and the comparatively small amount of labor and time required for the transaction of the business connected with them, the Trustees thought it expedient, at their session in June last, to discontinue the office at Logansport, and the books and papers were accordingly transferred in July last to the office of the Trust in Terre Haute. As most of the business is done by correspondence, no inconvenience whatever has been caused to the parties interested, and the expense of a separate office has been saved to the Trust.

The Trustees call attention to the reports of the Chief Engineer and Resident Engineer, accompanying this report, for particulars respecting the condition of the Canal and the operations of the current year.

The Trustees also transmit tabular statements, showing the amount received for tolls and water-rents, at the various offices, during each month of the year, and the tonnage and kind of shipments; also, statements exhibiting the sales and receipts at the land offices for each month of the year; also, a statement of receipts and disbursements during the year ending on the 1st of December, 1855.

The balance on hand December 1, 1854, was	\$279,590 53
Add to this the amount received from all sources	
during the year	249,225 77
Making	<u>\$528,816 30</u>

The amount paid out during the year is..... 272,564 14

Leaving balance on hand, Dec. 1, 1855, (a portion of
which is on deposit in New York and the balance
in the Banks in Indiana,) \$256,252 16

All of which is respectfully submitted:

CHARLES BUTLER,
A. M. PUETT,
THOMAS DOWLING,
Trustees.

Dated at the office of the Trustees of the Wabash and Erie
Canal, Terre Haute, December 20, 1855.

CHIEF ENGINEER'S REPORT.

OFFICE OF CHIEF ENGINEER, }
Terre Haute, December 15, 1855. }

To the Board of Trustees of the Wabash and Erie Canal:

GENTLEMEN: The navigation was opened at Fort Wayne on the 16th of April, and continued, with some interruption, until closed by ice on the 10th of December. The opening was postponed to a period of a few weeks later than usual, to give more time for the cleaning out and deepening some sections of the Canal, particularly the lower portion of the long levels between Fort Wayne and Huntington, and between Lafayette and Attica, as was recommended in my last report. About \$6,000 was expended in this work. The same process of deepening should be continued on these levels, as it may be done without delaying too much the spring business.

The past season, since the middle of June, has been marked for abundance of rain, keeping the streams from which feeders are taken much of the time, even through August and September, at flood stage. The chief interruptions to navigation have resulted from the redundancy rather than the want of water. The great rain which fell on the 16th of June, and which was heaviest in the vicinity of Fort Wayne, caused some five or six breaks, two of which were of a character so difficult to repair that navigation was suspended over three weeks. The Spy Run Aqueduct, on the St. Joseph's Feeder, proving insufficient in its capacity for the stream, was undermined, and both abutments, and indeed the entire structure, mainly destroyed. In rebuilding, the water-way for this stream was doubled, which involved the erection of one new abutment of cut-stone masonry, and a pier of timber, with an additional reach of trunk.

Another break, requiring yet longer time for repairs, though less in apparent magnitude, was at Seven Mile Creek, east of Fort Wayne. Here the culvert seems to have rested on a stratum of

quicksand, which being removed by the force of the current, the structure was broken in fragments, and sunk to the depth of ten feet below the bed of the stream. Its reconstruction was a work of extreme difficulty, and consumed longer time than was at first anticipated. The contracted position limited the number of workmen, while the nature of the work forbade its prosecution at night to advantage. Its commencement was necessarily delayed some days by the continuance of the high water. The capacity of this culvert, for the passage of the stream, was likewise materially enlarged in re-building. The repair of these two principal breaks, with others of less magnitude, occurring at the same time in the 1st District, cost near \$8,000.

The insufficiency of water-way, in many of the culverts and small aqueducts, for the increasing floods of the streams, especially on the eastern portion of the Canal, constructed when the country was an unbroken forest, and before the streams had attained their present height of floods, has been referred to in former reports. As the means of the Trust will allow, and as opportunity shall offer, without delaying too long the opening of Spring navigation, a number of these culverts should be rebuilt and enlarged. At one stream three miles east of Fort Wayne, and at another thirteen miles west, the culverts are to be rebuilt during the ensuing winter, with enlarged water-way.

A very heavy break occurred in the high embankment at Lewisburgh Bluff, toward the last of October. As the season of navigation was near its close, and much produce collected for shipment at the towns below, its prompt repair was an object of peculiar importance to the country. A very large force, amounting in effect, to 180 men, was collected as speedily as possible. The total cost of this repair was near \$3,700.

On the entire Canal from State Line to Clinton Lock, coming under my personal oversight, the expenditure for repairs amounts to \$64,987 90, and may be classed under the several heads as follows:

Expense of repair boats, with regular force.....	\$20,765 77
Repairs of breaks in embankments, aqueducts, culverts, &c., &c.....	14,180 57
Cleaning out canal in the spring	12,227 03
Rebuilding wooden locks, dam, abutments, &c.....	5,298 73
Adding new works, raising guard banks,.....	2,026 75
Rebuilding and repairing bridges for State and County roads	1,848 77
Lock tending	3,787 03
Salary of Superintendents	4,853 25
Total	\$64,987 90

Of which there belongs to the general head of extraordinary repairs \$9,174 25

Leaving, as the cost of ordinary repairs the sum of \$55,813 65

The sum expended in each of the five districts into which the work is divided for the purpose of supervision, with the proportion performed by contract, and paid for on estimates of the Engineer, is fully exhibited in the tabular statement appended and marked A.

With navigable feeders the distance is 221 miles, and the average per mile, for ordinary repairs, is \$253, or including ordinary and extraordinary repairs, \$294.

It may be interesting for purposes of comparison and review to bring forward in one statement, the yearly averages of repairs and expenditure since the commencement of the Trust. They are as follows:

In 1848 average per mile.	\$246
In 1849 average per mile.	325
In 1850 average per mile.	270
In 1851 average per mile.	198
In 1852 average per mile.	224
In 1853 average per mile.	235
In 1854 average per mile.	303
In 1855 average per mile.	294

Giving a general average for the eight years of \$262 per mile. This includes salaries of Superintendents and Engineer, with all expenses chargeable rightly to the repair service. The cost of renewing the road bridges and wooden locks, with other perishable structures, as they have required it, and of adding such new works as were found necessary, is also embraced. Deducting these extraordinary repairs, and including only such ordinary repairs as would have been required had these structures been built in the first place of durable material, the general average per mile, for the eight years, is reduced to \$201.

Considering the dilapidated condition of the Canal, as received by the Trustees from the State authorities, and the general renewal of the wooden structures since made, these results, it is presumed, will be satisfactory. Taking the highest general average for the eight years, it is considerably within the annual expenditure on any of the principal Canals of the country.

On the whole Canal system of New York, the general average per mile of repairs for twenty-three years, prior to and including 1848, as stated in official reports, was \$645.

On the two leading Canals of Ohio, taking a period of fifteen years, ending with 1849, the cost of repairs are reported officially at a general average per mile of \$394 for one Canal, and \$361 for the other. That State has recently adopted the new policy of

maintaining the navigation of her Canals by contract. The contracts recently made are for a term of five years. On the Ohio division of the Wabash and Erie Canal, the contract averages \$364 per mile, yearly; and on the Miami Canal, from Cincinnati to the Junction, \$611 per mile. On the Ohio Canal, including the Walhonding Branch, the average is \$264. On the last named work there are no wooden locks to renew, nor does the State of Ohio maintain the Road Bridges out of the Canal revenues. In comparing with the Wabash and Erie Canal, it is, therefore, more fair to take the cost of "ordinary repairs" on that work, which, for the eight years is \$201.

Contracts have recently been made for rebuilding three lift locks, originally built of cut stone masonry, but which from the perishable character of the stone used, are now found unsafe for another season's use. One is $1\frac{1}{2}$ miles below Logansport. This is to be rebuilt from the base of cut stone masonry, laid in hydraulic cement. The stone to be used are from the Georgetown quarries, and are unquestionably durable under any exposure. The other two locks are at Peru. The base of these lock walls, below water of lower level, being yet quite sound, and no doubt capable of resisting the weather for eight or ten years, will be suffered to remain, and on this base a timber crib will be built in the usual manner of a wooden crib lock.

The large cut stone arch, $24\frac{1}{2}$ feet chord and 100 feet long, over Silver Creek, five miles below Huntington, which has been for some time under contract, will be completed before the opening of navigation. The stone, procured at the Georgetown quarry, are all on the ground and chiefly cut. The removal of the embankment and of the old timber structure, here as well as at the locks, is by this time in progress, and the work of rebuilding must be pressed during all weather that will admit of it, in order to be in readiness by the usual time of opening navigation.

The Wabash river, Deer creek and Wild Cat creek, as is known, are each crossed in a pool of a dam. The sediment brought down in floods, and held in solution while in the strong current, tends to settle as it meets the more quiet water of the pool. At the entrance and outlet locks of these slack waters, deposits have been gradually forming since the construction of the canal. By partially removing the upper surface of these bars, any serious interruption has thus far been avoided, but a thorough removal is now called for. As the pools cannot be drawn off, an under water dredge must be used.

At the Deer creek pool, where, from its shape and position, the sand deposit has become extensive and formidable, it is proposed to build a culvert with gates, under the guard bank, placed below the Canal bottom, through which the sand may be wasted out, by draining through it the water of the Canal and of the creek, at its low stage. The cost may be near \$1,000, but, if successful, the

culvert will offer a ready means of removing this oft-recurring obstructions in future years.

The Wea Feeder Dam, in consequence, probably, of the limited means within the control of the State, when that Division of Canal was constructed, was built in a temporary manner of brush and gravel. By frequent repairs, it has been made to answer the purpose heretofore. But a permanent dam is now required, and it is proposed to erect it before the low water of next season.

The failure of last year's crops, with the southern demand for grain, has produced the anticipated diminution of tolls for this year. Other causes have contributed to this result. The tendency of lighter merchandise to the railways, and the suspension of navigation on the Miami Canal until the 4th of July, cutting off the usual spring shipments of Cincinnati goods by the Canal, accounts for the large decrease of tolls at the Fort Wayne Office. The very large crop of corn now in the Wabash country promises an active freighting business for next season.

The amount of corn cleared during the past season at all offices north of, and including Terre Haute, is 2,655,824 bushels, against 3,546,550 bushels last year. Of wheat the export from same district has been 678,258 bushels. Last year it was 412,800 bushels. Of pork, bacon and lard, 17,968,478 pounds have been shipped by Canal from same portion of the Valley, against 24,198,950 pounds in 1854.

Under the head of merchandise, 5,182,817 pounds have been cleared at the Fort Wayne Office, against 9,432,671 pounds last year; and of salt, coarse and fine, 101,200 barrels, against 77,712 barrels last year. Of bar iron, the year's importation has reached 21,372,571 pounds. Last year it was 38,119,941, the decrease being chiefly in rails for railroads.

The decrease in shipments of merchandise, amounting to over fifty per cent. since 1853, is attributable to the railway system, by which other and more speedy communications have been opened between the Wabash Valley and Lake Erie. As this class of articles pay the highest rates of toll, the effect upon the revenue is quite material. Experience seems to verify the apprehension that this new competition for the carrying trade of the Wabash counties, both north and south, may disappoint the reasonable expectations of larger increase from the Canal.

Respectfully submitted:

J. L. WILLIAMS,
Chief Engineer.

RESIDENT ENGINEER'S REPORT.

ENGINEER'S OFFICE, }
Terre Haute, Dec. 17, 1855. }

To the Board of Trustees Wabash and Erie Canal:

GENTLEMEN: Since my last annual report was submitted, there has been expended under the head of construction, the sum of \$18,273 38. The payments made on this account, have been for the following objects, viz:

Birch Creek Feeder, Reservoir, &c	\$7,521 11
Clearing Birch Creek Reservoir.....	8,941 00
Bridges in Evansville.....	1,811 27
Total.....	<u>\$18,273 38</u>

There has been expended, on account of *repairs* on the division under my charge, extending from the Clinton Lock to Evansville, the sum of \$36,638 48; of which \$6,355 40 has been paid out on account of extraordinary, and \$30,283 08 on account of ordinary repairs.

A further classification of expenditures may be made as follows, viz:

Ordinary repair boat expenses.....	\$16,327 90
Breaches in embankments, aqueducts, culverts, &c .	5,266 25
General cleaning out of canal.....	1,838 99
Watchmen on the banks, at locks and other points .	3,649 94
Re-building wooden structures, others than bridges, .	720 31
Increasing height of embankments and adding new works.....	3,847 34
Repairing and re-building bridges	1,787 75
Salaries of Superintendents.....	3,300 00
Total.....	<u>\$36,638 48</u>

The table annexed, marked B. will show the expenditures under the various heads, on the several districts.

The average per mile of the sixth district is \$151 17; of the seventh district \$118 71, of the eight district \$317 38, and of the ninth district \$194 37; giving a general average of the whole Division of \$208 11 per mile.

During the past season the Canal, south, has sustained no serious damage from high floods. In April last there were heavy rains towards the lower part of the ninth district, which raised Pigeon Creek so high that the water ran over the tow-path of the Canal at several points, and caused some breaches, but they were small and soon repaired. Our dams, aqueducts, and other important structures have sustained no damages from high water.

There have been numerous small breaches on the ninth district during the past season. These have mainly arisen from the action of muskrats and craw-fish.

The twenty miles of the lower end of this district having been completed several years before the Trustees took charge of the Canal, and having been used but little, the embankments, in many places, were almost destroyed by the burrowing of muskrats. The breaches arising from this cause were generally small, but the navigation was frequently interrupted, from one to two days, and the aggregate cost of repairs has been materially swelled from this cause. There have been some slides in the heavy embankments, but no important breaches. These repairs have been made without suspending navigation.

During the season there has been an abundant supply of water when the feed has not been cut off by breaches in the district above, but owing to the heavy bar in the Pigeon Summit, we have not been able to maintain a greater depth of water at this point than two and half feet. A force was set to work at this place last winter and the heaviest bars were removed, but it was almost impossible to do the work thoroughly, and the continued rains during the past season, falling upon the long slopes of the deep cuts, have washed down a large amount of material into the bottom of the Canal, forming a bar from one to one and half feet deep, for three fourths of a mile. It will be an expensive job to remove this, and the work cannot be well done in the winter. The same remark may be made in regard to cleaning out other summits and the bars in the wet prairies north of Maysville, on the 8th district; and in view of these facts, I suggest that hereafter the water be drawn off the middle of June each year. On the division of the Canal under my charge, this will cause the least interruption to transportation. It will afford an opportunity to put the Canal in good order and maintain it so, at less cost than has heretofore been incurred in attempts to do the work in the winter, when the days are short and there is every disadvantage to contend with.

On the 8th District, there have been several breaches, two of which were heavy. The first was in the Petersburg Bluffs, and

the last in the high tow-path, a short distance below Maysville. The tow-path at the Petersburg and Cummins' Bluffs continues to settle; but by constant care and attention breaches have been prevented, except in the case above referred to. Upon the whole, this division is now in much better condition than it ever has been heretofore; and it is probable the extraordinary repairs hereafter will not be very heavy. During the fall, three and a half feet water has been maintained on the Petersburg level. Next summer, after the rains and high water are over, it may, I think, be raised to four feet with safety.

On the 7th District, navigation has been kept up, without serious interruption, until the recent breach in the bluff bank at Kossuth. This is a heavy breach, requiring several weeks to repair. There has been so much rain since this break occurred, that but little progress has yet been made in filling up the gap. At this time, Eel river is so high that the level is filled by the water of the river, and boats are passing the breach. Until the river falls considerably, the work of repairing cannot be resumed with advantage. This is the first heavy breach that has occurred on the 7th District since the Canal was first filled with water. The locks and important structures have stood well, except the northwest abutment of the Newbury dam. The cross-ties in this abutment having rotted off, and a number of the courses of timber being much decayed, it became necessary to rebuild the abutment from the comb of the dam up. Although considerably decayed, it is believed the river lock, forming the southeast abutment of the dam, will not require rebuilding for several years, except a few courses near the top.

The continued high water of White river has worn into the slack-water tow-path above Newbury, and at several points nearly destroyed it. The work of rebuilding and protecting this embankment should be commenced. The slope should be protected with stone and brush, and I would recommend an annual expenditure, at this point, of about two thousand dollars, until the whole work is completed. It will cost about six thousand dollars to protect thoroughly the most exposed points.

On the 6th District, navigation has been kept up during the season without much interruption. There have been several small breaches on the Eel river feeder, caused by muskrats; and there was more time required for these repairs than the magnitude of the breaches would seem to justify. This was owing to the difficulty of getting earth for the embankment. The river bottom, being low, was covered with water at the time of the breaches, and no earth could be got except by boating—a tedious and expensive operation. The wooden structures on this District need considerable repairing, a portion of which must be done the ensuing season. Nearly all the lock-gates require new balance beams, quoin and mitre posts, and one of the cut-stone locks will require some repairs to stop the leakage, which has become so bad

that open boats are in danger of filling with water and being sunk whilst they are in the lock.

During the past season there were shipped from Evansville of the following *leading* articles: 538,060 pounds of sugar, 247,237 pounds of coffee, 1,335 barrels of molasses, 185,518 pounds of castings, 155,742 pounds of bar iron, 490,952 pounds of merchandise, and 159,942 pounds of machinery.

From Petersburg, there has been cleared as follows, viz: 611,095 pounds of pork and lard, 45,582 bushels of wheat, 376,000 pounds of pig iron, 5,350 bushels of corn, 1,941 bushels of oats, 8,618 bushels of coal, and 957 barrels of flour.

From Worthington, the following leading articles have been cleared, viz: 46,161 bushels of wheat, ——— bushels of corn, ——— bushels of oats, 10,346 pounds of pork and lard, and 146,755 pounds of pig iron.

From Terre Haute, the following leading articles have been cleared, viz: 29,335 bushels of wheat, 20,239 bushels of corn, 2,950 bushels of oats, 5,353 barrels of flour, and 759,000 pounds of pork and lard.

The foregoing results show a gratifying increase of business on the Canal south of Terre Haute; but they indicate the *kinds* of trade that may be expected rather than the amount. It is believed that when confidence in the certainty of the Canal, as a means of transportation, is established, the shipments now made will have no comparison with the future results.

Last year there was a general failure of the corn crop; but it was unusually fine this year, and it is yet to be sent to market. Most of the pork and lard, from the country south of Terre Haute, contiguous to the Canal, will be sent to market by way of the Canal.

The items of mineral coal and pig-iron, are now stated, only as a commencement, and to show the rapid increase anticipated in this branch of the trade. New coal pits have recently been opened, and within the past year extensive preparations have been in progress for making pig-iron. The beds of iron ore in Greene County, apparently inexhaustible, furnish a variety of the better qualities of ore; and all the requisites for making iron are at hand. It is believed the facilities for making good iron at this point are equal to those of any section of the country. It is already in contemplation to erect a rolling mill at Terre Haute, and when this shall have been done, the transportation of iron, in its crude and manufactured states, will form an important item of Canal trade.

Although the export of grain by the Canal, south of Terre Haute, has not yet reached to a very great amount, the beneficial effects of the new means of transportation has been very striking the past season. It is not doubted that the producers of Clay, Greene, Daviess, and Pike counties have realized from fifty to seventy-five thousand dollars *more* for their crops the past year, than they would have done without the Canal.

Owing to the frequent rains during the summer and fall, there has been a sufficient supply of water for navigation, furnished by the Eel river feeder, and the loss of the Birch Creek Reservoir has not proved detrimental to the full extent anticipated. But although this has been a season during which the Birch Creek Reservoir was not necessary to supply the Canal with water, still its loss has been a very serious damage to the business of the Canal. The last breach in the Birch Creek Reservoir was made on the 29th of June—so late in the season that it was not practicable to repair the breach and collect another supply of water for navigation. It was known that if there were sufficient rains to fill the reservoir, the supply from Eel river would be adequate without the reservoir. No one could anticipate what the character of the season might be, and hence a large amount of business has been driven from the Canal, from the uncertainty of its navigation. It is impossible to estimate with accuracy the loss of revenue sustained by the Trustees from this cause, but those familiar with the business of transportation, and the preliminary arrangements that have to be made dependent upon the *certainty* of navigation, can readily appreciate that the damage to the Canal must have been very great. In fact but for the local trade, the *anticipation* of interrupted navigation produced the same effect as if it had been realized. But we may not have such a season as the past again for many years, and it becomes a matter of vital importance to ascertain what may be expected in regard to the future maintenance of the Birch Creek Reservoir, without which there can be no *certainty* in the Canal navigation between the Ohio River and the Lakes.

In my last annual report, I gave an account of the breach that was made in the Reservoir embankment on the night of the 21st of June, 1854, together with other depredations committed about the same time. After this breach was repaired, and the reservoir again filled by the rains of last winter and spring, a watch was stationed on the bank to guard it both night and day, and hopes were entertained that no further depredation would be committed. But in this we were disappointed, for on the 10th of May last, a large company of men, armed and disguised, assembled at the site of the reservoir, and after driving off the men stationed there to protect the work, *deliberately* made an opening in the embankment and discharged the water that had been collected for the summer and fall navigation. After the facts had been duly communicated to Governor Wright, and his Excellency's proclamation had been issued, an attempt was made to repair the breach in the embankment, but the men were driven off and the work stopped. After the work was suspended on the repairs of the Birch Creek Reservoir, it was supposed other parts of the Canal would not be molested; but such was not the result, for on the 31st of May last, a ditch was cut through the berme bank of the Canal near the Birch Creek Aqueduct, with a view of causing a large breach; and the tow-path of the aqueduct, together with a portion of the trunk,

was destroyed by fire. The next attempt at the destruction of property was made on the night of the 20th of June, when the shanties owned and occupied by Baird and Erissman, the original contractors for building the reservoir embankment, were all destroyed by fire. The Trustees sustained no damage from this wanton outrage, except in the loss of convenient places of accommodation for the men to be engaged in the repair of the reservoir embankment, and other work connected therewith, that have been destroyed or injured by these depredators.

Governor Wright having been duly informed of these acts of outrage, as they were committed, his Excellency issued a second proclamation, and ordered a military force to be stationed on the work to protect the men engaged in making the repairs, and to prevent further damage; and immediately thereafter, the necessary arrangements were made, and the repairs completed.

Under the order of the Trustees, based upon representations made by citizens of Clay county, that no further damage would be done to the Canal, if the timber in the Birch Creek Reservoir was cleared off, contracts were entered into with James Baird and Abijah Donham, for removing all the timber, logs, and brush from its area, so far as practicable without draining off the water and impairing the navigation of the Canal during the anticipated dry portion of the season. But even this did not give satisfaction, for on the night of the 29th of June last, immediately after the military force had been disbanded, the Reservoir bank was again cut, and all the water discharged.

Notwithstanding this breach of faith, it has been deemed best to proceed with the clearing, and every effort has been made to accomplish the work before winter, in order that the breach in the embankment might be filled up and a supply of water collected for next season's navigation. But the summer and fall was unusually sickly, and during the whole season, there has been such frequent rains that it has been impossible to make much progress with the work. Still it is hoped the clearing may be completed in time to secure the filling of the reservoir for the ensuing year's business. The entire cost of clearing this reservoir will be about \$25,000, of which sum \$14,535 have already been paid.

It will be apparent from the foregoing statement, that every effort has been made, on the part of the Trustees, to conciliate the parties supposing themselves aggrieved by the construction of the Birch Creek Reservoir, fallacious as were their apprehensions, and unreasonable as their demands were known to be. After the frequent disappointments we have met with, it is impossible to anticipate what the result may be, but I think there is a favorable change in public sentiment in Clay county. When it becomes known, that our predictions in regard to the effect of the Birch Creek Reservoir on the health of the surrounding country have been fully sustained by the fact, that it was more healthy immediately on the Pigeon Creek Reservoir the past season, than any

where else in Gibson county; and the important advantages of Canal transportation are fully realized by the farmers of country, I trust a better sentiment will prevail in Clay county, and we shall have numerous friends, who will do all in their power to protect the Canal from future depredations.

All of which is respectfully submitted:

WM. J. BALL, *Res. Engineer.*

L. S. NEWELL, *Teacher of Music.*

S. McGIFFIN, *Teacher of Handicraft.*

MISS M. E. COOK, *Matron.*

MRS. M. E. DUNN, and MISS ELIZA W. BOWMAN, *Teachers.*

L. DUNLAP, M. D., *Physician.*

W. R. NOFSINGER, *Treasurer.*

TRUSTEES' REPORT.

To His Excellency, the Governor of the State of Indiana:

In pursuance of the requirements of law, the Trustees of the Indiana Institute for the Education of the Blind present to you their Ninth Annual Report.

Through the liberality of the Legislature, and the system of economy established in the Institute, its financial condition has been much improved since the date of our last report. At that date the indebtedness to the Sinking Fund Commissioners, on account of loans, amounted to the sum of \$21,334 15, while the entire amount of funds in the Treasury for the support of the Institute was only \$3,178 01; and even this amount had been borrowed from the Sinking Fund upon the individual guarantees of the Trustees.

The financial operations of the Institute for the year ending October 31, 1855, have been as follows :

RECEIPTS.

Balance in Treasury Oct. 31, 1854.....	\$3,178 01
From Legislative Appropriations.....	44,634 58
From Work Department.....	2,651 35
From Pupils' clothing refunded ..	158 24
From miscellaneous sources	355 08
Total.....	\$50,977 26

EXPENDITURES.

On account of current expenses	\$8,542 04
On account of pupils clothing.....	621 89
On account of work department.....	4,115 98
On account of printing and stationery.....	57 30
On account of miscellaneous expenses.....	697 51
On account of construction and repairs.....	1,238 05
On account of fuel and lights.....	1,233 65
On account of officers and salaries.....	2,704 70
On account of furniture.....	583 19
On account of Sinking Fund loans.....	15,334 15
On account of new heating apparatus.....	280 00

Total..... \$35,408 46

Balance in the Treasury, Oct. 31, 1855..... \$15,568 80

This balance in the Treasury is applicable as follows:

For payment of Sinking Fund loans.....	\$6,000 43
For new heating apparatus	3,720 00
For current expenses to April 1, 1856.....	5,848 37

Total..... \$15,568 80

The sum applicable to the support of the Institute will be ample for that purpose, and will relieve the Board from the disagreeable alternative, anticipated by the Legislature, of closing the Institute on account of a deficiency of funds.

The Trustees again respectfully call the attention of His Excellency to a discrepancy existing in the accounts of Mr. Wm. H. Churchman, former Superintendent, and E. Newland, Esq., former Treasurer of the Institute. In consequence of that discrepancy the funds of the Institute are withheld to the amount of \$1,362 23. On the 15th of December, 1853, the following order was passed by the Board and placed in the hands of His Excellency, to-wit:

“Ordered, That the Governor be notified that through some error committed in the keeping of the accounts of the Institute, before the organization of the present Board, the sum of \$1,362 23 has either been twice drawn from the Treasury, or is improperly withheld from the Institute.”

Acting upon the information contained in this order, a suit was brought for the money, in the Marion Circuit Court, under the direction of His Excellency, against Mr. Churchman, but upon trial the jury failed to find the money in his hands. The Board thereupon on the 14th of March, 1855, appointed a committee from their number to confer with the Executive officers in regard to the funds of the Institute, and as no action has yet been taken, earnestly request the Executive to cause such further investigation to be made, as may be necessary to reimburse the Institute the sum unlawfully withheld from its Treasury.

A comparison of the last two years shows an increase in the expenditures for the support of the Institute in 1855, exclusive of the work department, of \$4,098 74, over the year ending Oct. 31. 1854. This excess is chiefly owing to the enhanced price of provisions and labor, and the increased number of pupils.

The expenditures on account of the work department for the past year exceed the receipts from the sale of manufactured articles in the sum of \$1,464 63. A sufficient amount, however, of manufactured articles, and work material, are on hand to account for this deficiency. While the work department can only be relied upon to a limited extent, as a source of income, it is believed that under proper management it will prove a self-sustaining department of the Institute. The report of the Superintendent will exhibit more in detail its operations.

During the past year eighty-seven pupils have enjoyed the privileges of this noble charity. The Board and the Superintendent have made every exertion to attract the unfortunate to the doors of the Institute—circulars have been sent to every county, and scattered broadcast over the State, pointing out the requisites for admission, and urging upon parents and guardians the propriety of availing themselves of the privileges of the Institute for their children and wards. The policy of the Board has been to admit all, of every age and condition, who could be considered proper subjects for instruction. And yet not more than one-eighth of the Blind in the State have so availed themselves.

While much of this neglect may be attributable to the indifference of parents and guardians, or to the advanced age of this unfortunate class, still more is chargeable to a want of knowledge as to the nature and designs, the benefits and discipline of the Institution. The attachment of the parent to the child of deformity, or of mis-

fortune, has been too long observed to excite astonishment, and we are not surprised that the uninformed shrink from sending the blind from the endearment and comforts of home to the care of strangers. And yet if they could witness the happiness of those who gather around the altar of the Institute, the new-born intelligence that beams in their faces, their expansion of intellect, and their skill in handicraft, every doubt and prejudice would be removed, and our capacious halls filled with eager applicants for the benefits of the Institution.

So far as the Board can judge the advancement of the pupils in their literary studies, and in the several branches of handicraft, during the past year, has been highly creditable to their respective teachers, while their moral and exemplary deportment has been worthy of all praise.

The general health of the pupils and officers of the Institute, has been good, and has been properly cared for. Dr. L. Dunlap, a gentleman of eminence and experience in his profession, has been appointed Physician to the Institute, in place of Dr. T. Parvin, who resigned the position.

At the July meeting of the Board, upon the recommendation of the Superintendent, it was ordered that the following named pupils be graduated at the expiration of the term, to-wit:

LORENZO D. TAYLOR,
WM. T. FLEMING,
GARY STAFFORD,

MARGARET BELCHES,
MARY BOILEAU,
ALTHEA A. PAXTON,

RACHEL MARTIN.

J. W. Record, having remained in the Institute as long as was deemed profitable to him, was, on recommendation of the Superintendent, directed to be discharged at the close of the term.

The Superintendent recommended that the following pupils in the work department, having made sufficient proficiency in their work be honorably discharged; and the Board so ordered, to-wit:

MATHEW MCGOWAN,
JONATHAN BEAUCHAMP,

JOHN CALDWELL,
JOHN FORD,

EDWARD DILLON.

Several important changes have been made in the government of the Institute within the last year. Hon. Isaac Blackford, who

had ably and faithfully discharged his duties as Trustee and President of the Board, resigned, and was succeeded by Nathan B. Palmer, Esq., as Trustee, under appointment of the Governor, and Hon. James G. Read was unanimously elected President of the Board. Prof. Hoss, and his amiable lady, who had become endeared to the pupils as Teachers in the literary department, declined a re-election.

Mrs. C. B. Sisson, who had for two years faithfully discharged her duties as Matron, was superseded by the Board, at the July meeting.

Rev. G. W. Ames was re-elected at the same term as Superintendent, and on the 13th of September resigned the position, and the Board thereupon elected Prof. W. C. Larrabee as such Superintendent for the term of two years, from the 1st day of October, 1855. The Board feel the highest confidence in the literary acquirements and tastes of Prof. Larrabee, and in his industry and integrity, and the care and attention he will bestow upon the pupils of the Institute.

The complete organization of the Institute, with the salary of each officer annexed, is as follows:

Prof. W. C. Larrabee, Superintendent, salary \$800, with board in the Institute.

Charles M. Walker, principal male Teacher, salary \$400 and Board in the Institute.

L. S. Newell, Teacher of Music, salary \$600 per annum.

Sam'l McGiffin, Teacher of Handicraft, salary \$350, and board in the Institute.

Miss Elibabeth M. Cook, Matron, salary \$300, and board in the Institute.

Mrs. M. E. Dunn, Female Teacher, salary \$200, and board in the Institute.

Miss Eliza W. Bowman, Female Teacher, salary \$200, and board in the Institute.

The Legislature having appropriated the sum of \$4,000 for a new heating apparatus, the Board have employed Mr. W. Tinsley, architect, to superintend its construction. Upon his recommendation, and after making suitable inquiries on the subject, the Board have adopted the system of direct radiation by steam, and have provided for using a considerable portion of the old apparatus in the con-

struction of the new. The work will be completed during the ensuing summer.

For specific items of expenditure, reference is made to the accompanying report of the Secretary, and for other interesting particulars to that of the Superintendent.

J. G. READ,

President of the Board of Trustees.

E. W. H. ELLIS, *Secretary.*

SUPERINTENDENT'S REPORT.

To the Trustees of the Indiana Institute

For the Education of the Blind :

GENTLEMEN: Though the time has arrived, when, in obedience to law, and in accordance with usage, the Superintendent of this Institution should make his Annual Report, yet having been personally connected with the Institution only one-twelfth of the year just past, and knowing little or nothing of its previous history and operations, I can hardly be expected by you, or by the public, to embody in this report any thing more, than such facts and suggestions, as might naturally and obviously occur to the mind even of the occasional visitor.

This Institution forms one of a class of benevolent enterprises, in which the people of Indiana take a very deep interest, and of which they are justly proud. It is one of the points of attraction for visitors from every part of the State, and for travelers from other States, and even from remote countries. During the single month just past, more than twelve hundred visitors have recorded their names in the register kept in the reception room. At least ten thousand visitors are every year received, and conducted over the Institution. We show them the building, the pupils, the work, and also the magnificent panorama of city and country so beautifully exhibited from the cupola. We also give them specimens of reading and music by the pupils. We believe that visitors generally leave the Institution with favorable impressions.

DESIGN OF THE INSTITUTION.

It is believed that the design of the Institution is not in all cases clearly apprehended by the public. The design is not to restore sight to the blind, but to educate them. There are persons here, who might easily, by skillful treatment, be cured of blindness. Others might be, if not wholly cured, greatly relieved. It might be well, were it practicable, to have some provision made for such cases. But under existing circumstances we have no provision for treating such cases. A physician is appointed as an officer of the Institution, but his duty is not understood to extend beyond the treatment of the ordinary diseases to which we are all in this climate liable. The physician is not expected to be an optician, or an oculist. He is not expected to perform the surgical operations necessary for restoring or correcting vision, or even to prescribe for the cure of any form of blindness. Nor is the Institution designed to afford an asylum where the blind may be provided with a permanent home. The design really and exclusively is to *educate* the blind—to teach them Science, Literature and Handicraft—to furnish them the means of acquiring such knowledge of the Sciences, and such practices of the Arts, as may enable them to earn their own living.

HOW THIS DESIGN IS ACCOMPLISHED.

To accomplish this design, the State has furnished very liberal means. A building beautiful, spacious and convenient—an honor to the State and to the age—has been erected, and furnished for the accommodation of the pupils. Board, lodging, washing, medical attendance and tuition, are furnished without charge. The pupil is expected in ordinary cases to be provided, either by himself or by his friends, with clothing, but that is the only expense to which he need be subjected. And even clothing is provided at public expense, whenever circumstances require it.

No expense or pains necessary for the health, comfort and improvement of the pupils, is spared. The house is kept in as equable and comfortable a temperature as circumstances will admit. The rooms are kept neat, clean, and orderly. The sleeping rooms are furnished with good and sufficient beds and bedding. Conveniences for washing and bathing are provided. Meals are regular

and punctual, and the table is constantly and abundantly supplied with provisions as good as the market affords. A physician, medicines, and convenient rooms are provided for the sick.

Teachers are provided for instructing in Science, Literature, and in such Arts and trades as the blind can advantageously pursue.

The course of Literary instruction embraces Reading, Spelling, Writing, Grammar, Geography, History, Philosophy, Chemistry, Arithmetic, and indeed nearly all the branches usually taught in schools. The instruction in Handicraft comprises broom, brush and basket-making, carpet-weaving, fancy bead work, knitting, and whatever else we find the pupil capable of learning.

The system of instruction, both in literature and in labor, wholly ignores the existence of eyes. The teacher may use eyes, if he happens to have them, but the pupil has no use for them. Indeed, persons who can see either to read or to work, have no business as pupils in an Institution for the Blind, as our mode of instruction is not adapted to sight, but to feeling and hearing. We teach reading by raised letters; arithmetic by mental exercise and movable figures; grammar, history, and natural science by oral instruction; music by sound, and handicraft by feeling.

In the Literary Department, the pupil is instructed, trained and drilled in such mental and practical exercises, as may prepare him for making the calculations necessary in business. In the Work Department he is taught to manufacture such articles as can be made without eyesight. In music he is taught to sing, to perform on the piano forte and the organ, and on various wind and stringed instruments.

Blind persons often become expert teachers, especially in music. Our own music teacher, one of the most accomplished teachers in the nation, is totally blind. One of our female pupils has just been appointed music teacher, with a liberal salary, at an Institution in one of the neighboring States. A number of our female pupils are already capable of giving instruction in bead work, which finds a ready sale at handsome prices, and many of the young men, heretofore instructed here, are doing good business at broom, brush and basket-making in several counties in the State.

DAILY ROUTINE OF EXERCISE.

For the purpose both of securing the most rapid improvement of the pupils, and of accustoming them to regular habits, we pursue each day a systematic routine of exercise. At half past five in the morning, at the ringing of the bell, the pupils rise and prepare for breakfast, and for the regular duties of the day. After breakfast, which is uniformly at a quarter before seven, till eight o'clock, they promenade the halls, verandas and walks, for exercise and amusement. From eight till half past twelve, the time is exclusively devoted to literary pursuits. The pupils are divided into classes, according to age and acquirements, and receive from their teachers instruction in the various branches forming our regular course of study. Three quarters of an hour is usually devoted to each recitation; and the whole time of each pupil is generally occupied in some useful literary exercise. At half past twelve we dine. From dinner till a quarter before two, exercise and amusement become again the order of the hour. At a quarter before two, all repair to the several work rooms, where the time, till a quarter past five, is industriously devoted to the several species of trade and handicraft. At half past five is the supper hour, after which, till seven o'clock, the pupils are again at liberty for voluntary exercise. From seven until nine the time is usually spent in the lecture-room, or chapel, where evening devotions are performed and a lecture delivered, or some book read for the amusement and instruction of the pupils. At half past nine the bell rings for retiring, and all repair immediately to their sleeping apartments.

THE WORK DEPARTMENT.

The primary design of the Work Department is to teach the pupils some trade, or species of handicraft, by which they may be able to support themselves after they leave the Institution. While accomplishing this primary object, we endeavor, as a matter of only secondary importance, to make the Department as profitable as circumstances will admit. The brooms, brushes and baskets manufactured in the shop are of a superior quality, and find a ready sale at remunerating prices. The bead-work made by the female pupils is sold to the visitors to the Institution, each of whom usually purchases some fancy article to take home as a present to some loved

one, or as a memento of his visit. All the work done in regular work hours, from a quarter before two till a quarter past five, belongs to the Institution. Whatever additional work the pupils please to do in recess hours is called over-work, and the avails of it accrue to the pupil who performs it.

The kinds of work performed by the male pupils in the shop furnish less facilities for overwork, than does the bead work performed by the females. Each girl has her little tin box with partitions in it, in which she carries her various kinds and colors of beads, and every moment she has to spare is industriously devoted to the manufacture of some basket, or vase, or other fancy article. We furnish them the beads at cost, and at the end of each month take in their work at its appraised value. The money we pay them for their overwork is spent by them for clothing, and other articles of necessity and comfort. Some of the pupils thus earn several dollars each month. Whatever we advance to them for overwork, comes back to the Institution when the work is sold.

We encourage the system of overwork, so far as it can be pursued without interfering with the regular exercises of the Institution, or with the health of the pupils. It not only secures some considerable profit to the pupils, but promotes habits of industry, and economy of time.

ADMISSION OF PUPILS.

The Superintendent is authorized by a rule of the Board of Trustees, to admit as pupils of the Institution, persons between the ages of eight and twenty-one years. Persons under eight, or over twenty-one, may be admitted by special action of the Board of Trustees. We have now some under eight, and others over thirty. It is believed, however, to be impolitic to depart from the general rule, unless for very urgent reasons. Children under eight require more care and attention than we can well bestow on them, and persons over twenty-one are usually so confirmed in their habits, as to be insusceptible of improvement from the course of study and discipline of the Institution. Often one person of mature age, confirmed habits, and obstinate opinions, especially if he can see some, as several of our pupils can, will cost the Superintendent more trouble in maintaining discipline and order, than twenty children. At the same time he derives very little advantage to himself. We pre-

fer for very obvious reasons to receive pupils between eight and fourteen years of age. Of such, if they have common intelligence, we can usually make useful and interesting people.

DISCIPLINE OF THE INSTITUTION.

My connection with this Institution, though short, has been already sufficiently long to teach me by the most effective of all lessons, *experience*, that the office of Superintendent is no sinecure. It is an office requiring close confinement, incessant attention, and a vast outlay of patience. The Superintendent must either directly or indirectly, see to everything about the establishment, from furnishing a shoe-string, to building and managing a steam engine. In supplying the wants of the pupils, in preserving their health and comfort, in keeping order, in maintaining discipline, and in promoting peace and harmony, he must feel and act as if he were the father of the whole family. Many of the pupils, especially the younger ones, are homeless orphans. Those who have homes and friends are, from distance and other circumstances, thrown entirely on our care. They generally, from the peculiar treatment which their dependent and unfortunate condition has secured from their friends at home, have become sensitive, and extremely susceptible to every varying emotion. They feel, as is natural to children, an instinctive desire for parental care and love. Their affections may be easily developed in the direction either of love or of hatred. If repelled, scolded, and punished, they become mischievous and intractable. If encouraged in their advances of familiarity, if soothed in their temper, and humored in their wishes and wants, they become affectionate and obedient to their superiors, but are too apt to be censorious and exacting to their associates and equals. Constant care and unremitting supervision are indispensable to keep up harmony, peace, and good feeling, and to remove the causes or to remedy the effects of rivalries, jealousies, and misunderstandings among themselves. All this, however, may be done, and filial, and fraternal sentiments may be made to predominate, if the Superintendent and teachers be disposed and able to exercise the care and patience necessary to produce the result.

Any system of discipline recognizing the usual modes of punishment, practiced in some schools and families, is wholly out of place here. The pupils must be governed by kindness, love and moral suasion, or they cannot be governed at all. If any pupil, under

mild and gentle treatment, should prove obstinate, turbulent, or insubordinate, the Superintendent should have, and should exercise authority to send him immediately home, before his pernicious influence can have infected others.

From the design and construction of the building, the pupils must spend nearly all their time, except their sleeping hours, together in some one of the public rooms. This makes it more difficult to keep order and quiet, than it could be in a building constructed on different principles. Some will, either from design or recklessness, annoy others. This leads to complaints against each other, which cannot fail to annoy the Superintendent. The great disparity in the ages of the several pupils, also, is a fruitful source of difficulty. The elder pupils too often assume to domineer over the younger, ordering them around, and scolding at them. On this we have been obliged to put an utter prohibition. No pupil, however old, must be allowed to domineer over another, however young. All must, severally and individually, be held directly responsible to the Superintendent, and all *scolding*, if it be necessary, must be done through him. The Superintendent must thus become the common protector of all the pupils, warding off injury to their persons and feelings from every source, even from each other, and from their own imprudence.

IMPROVEMENTS AND REPAIRS.

The house and furniture need a great deal of repair and replenishing. From the basement to the cupola, the locks, bolts, doors and windows, need examining and fixing. The drawers, presses, and wardrobes are out of order. Some of the furniture is worn out, and some broken or damaged. The Superintendent should have, and we suppose does have, general authority to make all these detailed and minor repairs, and he will lose no time in having it accomplished.

The heating apparatus formerly in use in the Institution having been condemned and abandoned, and there being no probability of the new system of heating which has been adopted and ordered by the Trustees, being put in operation this season, owing to the failure of some of the contractors to complete their work, we must be subject to much inconvenience, and additional expense, in keeping warm through the winter. We however shall bring into requisition every possible means of keeping up a sufficient and healthy temperature.

We can use stoves in a portion of the building. There are, however, several rooms in which there is no flue for a stove. In such cases, we must dispense with the use of the room. It will be found difficult to keep the halls and passages warmed. We will, however, try to weather the winter. Provision must be made for warming the rooms in the shop. The apparatus heretofore used for that purpose was never sufficient, and is now utterly worn out. It is thought that Resor's Patent Globe Furnace will answer the purpose effectually and economically.

The grounds about the building would be greatly improved in appearance, by a reasonable outlay for trees and shrubbery. Something has been done, but much more might be advantageously done in ornamenting and rendering beautiful this very fine lot, the finest probably in the city, and the place of resort, as it is now, and must continue to be, for many thousand visitors every year. It is hoped the Trustees may deem it wise and expedient to authorize a reasonable expenditure for improving the grounds.

Additional books and apparatus are needed for the Library Department.

In the Department of Music we need a new and better supply of various instruments. We have several pupils of fine musical taste, who desire to qualify themselves for teaching. Some of them might become accomplished organists, and find lucrative situations in churches and choirs in the large towns and cities, but we have no organ, and therefore no means of qualifying them for the position to which their taste and talent might induce them to aspire. It is earnestly hoped the next Legislature will appropriate the funds for supplying the Institution with ample means of instruction in this Department of so much importance and value to the Blind.

NUMBER OF PUPILS.

The number of pupils in attendance during the year ending this day, is eighty-seven. Twice that number might be easily accommodated in the Institution at a very slight increase of expense. To keep up the Institution respectably requires a certain amount of expense for fuel, lights and labor, independent of the number of pupils. An increase in the number of pupils involves additional expense only in the first cost of provisions.

Though the number of pupils is not yet so great as might be easily accommodated, yet an examination of the catalogue will ex-

hibit a gradual increase. The Institution has been in operation nine years, and the number of pupils each year has been as follows :

First year,	25
Second year,	28
Third year,	38
Fourth year,	43
Fifth year,	52
Sixth year,	51
Seventh year,	46
Eighth year,	77
Ninth year,	87

As the Institution increases in age and becomes better known, its advantages will be more highly appreciated by the citizens of the State, and its halls will be filled with happy and grateful recipients of the liberal provision made by the State for the Education of the Blind.

W. C. LARRABEE, *Superintendent.*

Indianapolis, October 31, 1855.

**LIST of Pupils in attendance during the year ending October 31,
1855.**

No.	NAMES.	RESIDENCE.	CAUSE OF BLIND- NESS.

SECRETARY'S REPORT.

The Receipts and Expenditures of the Institute for the Blind, from the 1st day of November, 1854, to the 31st day of October, 1855, inclusive, have been as follows:

Warrants drawn on Treasurer.

Date of Warrant.	Number.	To whom issued and on what account.	Amount.
1854.			
Nov. 15,	345	G. W. Ames, pupils' clothing.....	\$46 09
Nov. 15,	346	G. W. Ames, current expenses.....	747 51
Nov. 15,	347	G. W. Ames, expenses of work department.....	121 94
Nov. 15,	348	Adams & Co's Express, girls' work material.....	182 77
Nov. 15,	349	J. H. Vanderman, purchase of cow.....	25 00
Nov. 15,	350	G. G. Holman, blankets.....	16 12
Nov. 15,	351	Williamson & Haugh, blacksmithing.....	8 27
Nov. 15,	352	Hoge & Washburn, broom handles.....	34 50
Nov. 15,	353	W. B. McCullough, per diem and mileage as trustee.....	14 80
Dec. 13,	354	G. W. Ames, current expenses.....	301 80
Dec. 13,	355	G. W. Ames, pupils' clothing.....	54 35
Dec. 13,	356	G. W. Ames, expenses of work department.....	193 72
Dec. 13,	357	G. W. Ames, current expenses.....	5 22
Dec. 13,	358	Indianapolis Coal Company, coal.....	81 00
Dec. 13,	359	Peter Smith, broom corn.....	280 23
Dec. 13,	360	J. Cook & Co, broom twine.....	17 25
Dec. 13,	361	Solomon Hinds, repairs on cooking range.....	12 00
Dec. 13,	362	W. L. Ramsay, plumbing and repairs.....	74 00
Dec. 13,	363	Thomas Nolan, grading, balance on account.....	30 00
Dec. 13,	364	Delzell & Tyler, blank book.....	9 00
Dec. 13,	365	James G. Read, services as trustee.....	31 92
Dec. 13,	366	W. B. McCullough, services as trustee.....	12 80
Dec. 13,	367	J. F. Carr, services as trustee.....	22 60
1855.			
Jan. 10,	368	G. W. Ames, current expenses.....	297 40
Jan. 10,	369	G. W. Ames, expenses of work department.....	148 41
Jan. 10,	370	G. W. Ames, pupils' clothing.....	8 20
Jan. 10,	371	P. T. Reinhardt, repairs.....	5 45
Jan. 10,	372	G. W. Ames, repairs.....	20 00
Jan. 10,	373	C. B. Sieson, salary as matron.....	75 00
Jan. 10,	374	C. M. Walker, salary as teacher.....	50 00
Jan. 10,	375	George W. Hoss, salary as teacher.....	125 00
Jan. 10,	376	S. McGiffin, salary as teacher in work department.....	87 50
Jan. 10,	377	L. S. Newell, salary as teacher of music.....	150 00
Jan. 10,	378	J. B. Stafford, broom corn.....	16 00
Jan. 10,	379	E. F. McIntyre, work material and tools.....	78 30
Jan. 10,	380	Harriett J. Hoss, salary as teacher.....	37 50
Jan. 10,	381	Henry Haverstein, tools for work department.....	96 00
Feb. 14,	382	Jeremiah Morgan, 1,565 pounds of broom corn.....	98 72
Feb. 14,	383	Amos Miller, broom corn.....	400 62
Feb. 14,	384	John M. Tucker, broom corn.....	39 92
Feb. 14,	385	Ezra Russell, broom corn.....	82 75
Feb. 14,	386	City of Indianapolis, grading Meridian street.....	97 45
Feb. 14,	387	E. A. Wood, hauling wood.....	21 73

Warrants drawn on Treasurer.—Continued.

Date of Warrant.	Number.	To whom issued, and on what account.	Amount.
1855.			
Feb. 14.	388	M. & I. R. R. Co., wood.....	\$211 00
Feb. 14.	389	James Wood, surveying.....	6 50
Feb. 14.	390	R. S. Hoskins, hauling wood.....	20 60
Feb. 14.	391	John Smith, purchase of cow.....	32 50
Feb. 14.	392	J. Davis & Co., castings.....	32 20
Feb. 14.	393	W. O. Hogue, broom handles.....	66 00
Feb. 14.	394	Jacob Lindley, cutlery and table ware.....	32 30
Feb. 14.	395	Hannaman & Duzan, drugs and medicines.....	40 00
Feb. 14.	396	G. W. Ames, current expenses.....	283 16
Feb. 14.	397	G. W. Ames, pupils' clothing.....	6 25
Feb. 14.	398	G. W. Ames, expenses of work department.....	218 77
Feb. 14.	399	J. H. Cook, services as trustee.....	4 00
Feb. 14.	400	W. B. McCullough, services as trustee.....	25 60
Feb. 14.	401	J. G. Read, services as trustee.....	29 92
March 14.	402	G. W. Ames, current expenses.....	743 59
March 14.	403	G. W. Ames, pupils' clothing.....	5 50
March 14.	404	G. W. Ames, expenses of work department.....	104 43
March 14.	405	L. S. Newell, music and instrument.....	12 87
March 14.	406	Haskins & Wood, hauling wood.....	24 00
March 14.	407	Haskins & Wood, hauling wood.....	26 40
March 14.	408	Robert Patrick, broom corn.....	262 75
March 14.	409	J. B. Stafford, broom corn.....	198 40
March 14.	410	J. M. Taibott, bedding and furniture.....	153 74
March 14.	411	Richard Hodges, repairs on shop.....	28 75
March 14.	412	Root & Drake, repairs.....	13 15
March 14.	413	Indianapolis Coal Company, coal.....	104 00
March 14.	414	R. L. M'Quat, repairs.....	63 35
March 14.	415	M. & I. R. R. Co., wood.....	88 00
March 14.	416	Sinking Fund Commissioners, loan of fund.....	15,334 15
May 16.	417	G. W. Ames, current expenses for March.....	1,415 59
May 16.	418	G. W. Ames, pupils' clothing.....	45 00
May 16.	419	G. W. Ames, expenses of work department.....	242 32
May 16.	420	G. W. Ames, current expenses for April.....	1,007 38
May 16.	421	G. W. Ames, pupils' clothing.....	19 99
May 16.	422	G. W. Ames, work department.....	117 82

On account of Sinking Fund loans	15,334 15
On account of new heating apparatus.....	280 00
Total	\$35,408 46

Balance in Treasury Oct. 31, 1855..... \$15,568 80

The recapitulation shows a balance in the hands of the Treasurer at the close of the last fiscal year, providing all warrants have been paid, of \$15,568 80. Of this amount the following sums are appropriated, to-wit:

For payment of Sinking Fund loans.....	\$6,000 43
For new heating apparatus.....	3,720 00
	\$9,720 43

Leaving applicable to the current expenses of the Institute, from the 1st day of November, 1855, to the 1st day of April, 1856, the sum of \$5,848 37.

There remains due to the Institute the sum of \$1,362 23, which is yet in dispute between Mr. W. H. Churchman, former Superintendent, and Elijah Newland, Esq., former Treasurer. A suit was

brought against Mr. Churchman in the Marion Circuit Court, by order of the Governor, but upon trial the money was not found to be in his hands. The Board of Trustees have requested the Governor to take further action for the recovery of the money, but no such action has yet been taken.

All of which is respectfully submitted,

E. W. H. ELLIS, *Secretary.*

Indianapolis, Nov. 20, 1855.

TREASURER'S REPORT.

OFFICE OF TREASURER OF STATE, }
Indianapolis, Nov. 1, 1855. }

*To the Board of Commissioners of the
Indiana Institute for the Blind :*

MESSRS:—The following is a statement of receipts and expenditures for said Institute for the fiscal year ending Nov. 1, 1855, to-wit:

	CR.
By balance on hand Nov. 1st, 1855	\$2,623 63
By Legislative appropriations	44,634 58
By miscellaneous receipts	3,299 39
	<hr/>
	\$50,557 60

	DR.
To paid orders issued by Board	\$35,937 44
To paid warrants issued by Auditor of State	800 00
By balance on hand Nov. 1, 1855	13,820 16
	<hr/>
	\$50,557 60

NOTE.—It will be observed that a discrepancy exists between the report or statement of the Secretary of the Board, and the Treasurer of State, as to the amount of balance on hand Nov. 1, 1855. This arises from two causes: First—the Treasurer of State paid \$394 26 of orders issued the previous fiscal year which are not included in the Secretary's statement, and secondly—the Auditor of State has charged the appropriations for the Blind Asylum with several items amounting in the aggregate to \$1,354 38,

including salary of Superintendent, which the Board insist should not be taken out of the specific appropriations for the support of the Institute for the Blind.

A list by the Secretary here appended will show for what purpose and to whom payments have been made.

All of which is respectfully submitted,

W. R. NOFSINGER,
Treasurer.

BY-LAWS

OF THE

INDIANA INSTITUTE FOR EDUCATING THE BLIND.

ADOPTED JANUARY 9, 1856.

I.—OF THE BOARD OF TRUSTEES.

1. The Board of Trustees shall hold monthly meetings at the Institute, on Wednesday after the second Monday in every month, and four members shall constitute a quorum for the transaction of business.

2. Special meetings of the Board may be called by the Secretary upon the suggestion of the Superintendent, or upon the requisition of two members, or if in his own opinion the interests of the Institute requires such meeting.

II.—OF THE PRESIDENT.

1. The Board at their meeting in April annually shall elect one of their number as President, who shall preside over the deliberations of each meeting, and shall be entitled to vote upon all questions before the Board.

III.—OF THE TREASURER.

1. The Treasurer shall, in addition to the duties prescribed by law, furnish the Board an annual statement of his receipts and disbursements, in detail; a summary of which shall be appended to the annual report of the Board.

IV.—OF THE SECRETARY.

1. The Board at their meeting in April, annually, shall elect one of their number as Secretary. He shall carry on the necessary correspondence of the Board, keep full minutes of the proceedings of each meeting, and furnish, when necessary, attested copies of the same to those whom they concern, and shall issue all notices of meetings of the Board.

2. He shall keep all accounts between the Board and the Treasurer, and shall draw all warrants upon the Treasurer for appropriations and allowances by the Board, and shall furnish the Board in detail a statement of the accounts of the Institute, to accompany their annual report.

V.—OF THE SUPERINTENDENT.

1. The Superintendent shall be chosen biennially by the Board, at their regular meeting in July, and his term of service shall commence on the first day of October succeeding his election.

2. He shall be the Executive head of the Institute, and the medium of communication between it and the Board of Trustees. He shall be responsible to the Board for the faithful performance of all the duties assigned the subordinate officers, as well as for the advancement and good behavior of the pupils.

3. He shall refer to the Board of Trustees all applications for admission as pupils from those who do not come within the regulations, but in all other cases may admit the applicant without such reference. He shall keep a record of all those received into the Institute, embracing their names and ages, the causes and degrees of their blindness, the dates of their admission and discharge, the Post Office address of their parents or guardians, and such other information concerning them as may be deemed important.

4. In the school department he shall prescribe the course and methods of instruction, the time to be devoted by teachers and pupils to the several branches of study, the apparatus and text-books to be employed, the system of discipline, and other matters pertaining to the mental and moral improvement of the pupils. And it shall be his duty to make frequent visits to the several class-rooms during the hours of instruction, for the purpose of keeping himself informed as to the progress and deportment of the pupils, and of making such suggestions to the teachers as he may deem useful. He shall

devote at least two hours per day to the instruction, and attendance upon recitations of the several classes in the Institute, if his time can be reasonably spared from other necessary duties.

5. In the work department he shall prescribe the kinds of work to be learned by the pupils, and the number of hours per day to be devoted to it, fix the rate of compensation for labor performed and instruction given by graduates, or others employed as journeymen or assistants, as well as for the overwork of the pupils, and direct the manner in which the general business of the department shall be transacted. He shall be required to pass frequently through the several shops and work-rooms, for the purpose of keeping himself informed of the progress and deportment of the pupils, and of making such suggestions to the master mechanic and others employed as he may deem useful.

6. He shall provide the necessary apparatus for the work shops, purchase the work material, settle for all over work, keep a strict account of all moneys received for sales of stock, and pay the same over to the treasurer, taking his receipt therefor. He shall report the transactions of the work department to the Board at each monthly meeting, with his vouchers for moneys paid into the treasury, or expended on account of said department.

7. In the household department he shall prescribe the number of domestics and other assistants of a like character to be employed, fix the rates of their compensation, and shall exhibit in each monthly account a statement of the number, occupation, and wages of persons so employed.

8. He shall see that all of the pupils are comfortably and respectably clad, and when their friends, through inability or neglect, fail to provide them with the necessary clothing he shall supply the same, and lay the accounts therefor before the Board for allowance. He shall collect, as far as practicable, from the friends of the pupils or from the commissioners of the several counties in which they respectively reside, all sums, so laid out, and shall pay all moneys so collected to the Treasurer, taking his receipt therefor.

9. All other minor expenses, whether of the household or school department, shall be defrayed by the Superintendent, and the bills and accounts for the same, certified by him shall be laid before the Board for their examination and allowance.

10. Whenever furniture, apparatus, work material or the like, to any considerable amount, shall in his judgment be needed, the

Superintendent shall so inform the Trustees, and if they shall consent to the expenditure, he shall purchase the requisite articles upon the best practicle terms, and shall certify to the correctness of all accounts before presenting them to the Board for allowance.

11. He shall have care of all the buildings and grounds of the Institute, and shall see that they be kept constantly in order, both as to cleanliness and minor repairs.

12. He shall exercise due care in the promotion of the health of the pupils, by requiring of them frequent and thorough ablutions, exercise in the open air, and entire abstinence from all injurious practices, and by providing them with plain substantial diet, together with comfortable dormitory accommodations, and in all cases of sickness, shall see that they have prompt medical treatment, as well as every other necessary attention.

13. He shall use his utmost endeavors to imbue the minds of his pupils with the strictest principles of morality, and to induce them to avoid all unbecoming personal habits, requiring them to attend regularly upon public worship, at such place as may be severally chosen by themselves or their friends.

14. While he is enjoined to pay particular attention to the religious instruction of the pupils, he shall studiously avoid and prevent the inculcation of sectarian views, and the same care shall also be observed in regard to partizan politics.

15. He shall see that due respect always be had to the appropriate observance of the Sabbath, by all persons connected with the establishment, neither permitting visiting on that day at the Institute, nor allowing the pupils to make visits out of the house, or engage in improper occupations or amusements.

16. It shall be considered by him an essential feature in the management of the Institute, to prevent all unnecessary intercourse between the male and female pupils, and he shall therefore see that they are never together, excepting in the class rooms during the hours of instruction, or in the presence of some officer of the Institute.

17. He shall make an annual report to the Trustees, embracing an account of the condition and progress of the several departments of the Institute, of the course of instruction pursued, and of the health and general improvement of the pupils, with suggestions for the advancement of the objects of the Institute.

18. In order that all the officers and other persons engaged in

the Institute may have a clear understanding of their relative duties and obligations, the Superintendent shall be required to draft a set of regulations defining their respective duties, a copy of which, being approved by the Trustees, shall be furnished to each, and for every essential change in the said regulations the approval of the Trustees shall be necessary.

VI.—OF THE SUBORDINATE OFFICERS.

1. The instructors in the several departments, the Matron, and all other subordinate officers employed in the Institute, shall be appointed annually by the Board, at their July meeting, their term of service to commence on the first of October following such appointment.

2. They shall labor assiduously in their respective capacities to promote the object of the Institute, and shall so far as is practicable co-operate with the Superintendent in its general management.

3. Their particular duties shall be prescribed by the Superintendent, in accordance with section eighteenth, of article fifth of these by-laws.

VII.—OF THE ATTENDING PHYSICIAN.

1. The attending physician shall be appointed annually by the Board at their July meeting, his term of service to commence on the first of October following his appointment.

2. He shall visit the Institute, upon the call of the Superintendent, and at such other times as he may think necessary or proper, and shall render such medical and surgical services, except in capital operations, as shall be necessary for the pupils of the Institute, and, if the proper medicines are in the Institute, shall prepare the same for administration.

3. His compensation shall be fixed and paid by the Board of Trustees, and no charge shall be made to any pupil for medicine or medical attendance by the regular physician. The Superintendent shall have discretionary power to employ the aid of a consulting physician, but such consulting physician shall in no case supersede the regular one.

VIII.—OF THE INSTITUTE SESSION.

1. There shall be one session of the Institute in each year, commencing on the first Monday of October, and closing on the last Wednesday of July following, leaving a vacation of nearly ten weeks, and it shall be considered obligatory upon all of the pupils to spend the period of vacation at their respective homes.

IX.—OF THE ADMISSION AND DISCHARGE OF PUPILS.

1. All Blind persons residing in the State of Indiana, who are between the ages of eight and twenty-one years, and who are not incapacitated by mental or bodily weakness for useful instruction, shall be considered eligible for admission as pupils of the Institute, but exceptions may be made in favor of cases which do not come within the age specified, but in every such case special action of the Board shall be required.

2. Pupils from the State of Indiana shall in all cases receive their boarding and tuition free of charge, but their clothing and other necessary expenses must be furnished or defrayed by their friends, or by appropriation of the commissioners of the counties in which they severally reside.

3. Applicants from other States, of suitable age and capacity, may also be received as pupils, provided they shall in no case take precedence over those from Indiana, on payment of such rates of compensation for boarding and tuition as the Board in each case shall determine.

4. No applicant shall be received into the Institute, until the rules established by the Board for the admission of pupils shall have been complied with.

5. All of the regular pupils shall be required to be in attendance at the Institute, at the commencement of each session, and to remain until its close, unless prevented by sickness or other exigency; and in case of the failure of any pupil to comply with this requirement, without a sufficient reason, the right of such delinquent pupil to the privileges of the Institute shall be forfeited.

6. Pupils may be expelled for misconduct when they shall be adjudged by the Superintendent to be incorrigible, but for each act of expulsion the approval of the Board of Trustees shall be necessary. No pupil of mature years shall be expelled without an opportunity of vindicating himself from the charges preferred against him.

7. There being no limit fixed by law for the time during which a pupil may remain in the Institute, it shall be left to the Superintendent to determine in each individual case as to the proper time for dismissal, but he shall in no case discharge a pupil without the consent of the Board of Trustees.

8. Pupils who complete their course of instruction with credit to themselves, shall be furnished with a diploma by the Superintendent, signed by himself, and countersigned by the President and Secretary of the Board.

9. No pupil shall be graduated without the written recommendation of his or her respective teachers in the literary or work department, or both as the case may be, addressed to the Superintendent, and filed among the papers of the Institute.

ANNUAL REPORT

OF THE WARDEN

OF THE

INDIANA STATE PRISON,

FOR THE YEAR ENDING NOVEMBER 1, 1855.

TO THE GOVERNOR.

INDIANAPOLIS:

WILLIAM J. BROWN, STATE PRINTER.

1855.

WARDEN'S REPORT.

To His Excellency, JOSEPH A. WRIGHT, Governor of Indiana :

In discharge of the duties enjoined in the 13th section of the "Act to Lease the Indiana State Prison," approved January 16, 1846, the undersigned, Warden, respectfully submits his Annual Report, following the requirements of that section.

The unfinished cells are in the same condition that they were last year, except the foundation for the outer inclosing wall has been laid, and most all the stone, caps, sills and caping, is cut and ready for use; everything will be ready by the opening of Spring. I hope the building will then be completed, as it is needed very much. With the exception of cell-room, the prisoners are comfortable and well provided for. They have been generally obedient and faithful; have been provided with good and wholesome food, comfortable clothing, bedding, &c.

The convicts are employed as follows: From twenty-five to thirty in making brick during the summer season, and about forty in cutting wood through the winter; five or six in and about the city of Jeffersonville, four or five on the farm of the Lessee; the balance inside the Prison walls at manufacturing woolen and cotton goods, wagon-making, saddle trees, chairs, coopering, blacksmithing, carpentering, tailoring, shoe-making, and in the domestic labors of the prison.

There are, at the date of this report, two hundred and seventy-one prisoners confined in this Prison.

In conclusion, I would refer you to the reports of the Physician and Chaplain for an account of the sanitary and moral condition of the Prison. I take pleasure in bearing a cheerful testimony to the faithful and efficient manner in which they have discharged the duties of their respective offices; also the Lessee and assistant keepers.

Tables, from one to seventeen inclusive, exhibit the number received and discharged during the past year, with the various details deemed important or interesting in relation to the convicts generally.

All of which is respectfully submitted.

D. W. MILLER,
Warden of the State Prison.

List of Convicts in the State Prison of Indiana, November 30, 1855.

N MES.	WHERE CONVICTED.	CRIME.	TERM.	WHEN RECEIVED.
John Rosenberry.....	Whitley county.....	Assault and battery with intent to rape.....	Twelve years.....	September 27, 1847.

CHAPLAIN'S REPORT.

To His Excellency, JOSEPH A. WRIGHT:

In submitting my Report as acting Chaplain of the State Prison, I have simply to say I have not been absent from my charge one Sabbath, except when indisposed. I have endeavored as far as the circumstances would admit, to discharge the duties of a "moral instructor" to those unfortunate men. The more I become acquainted with the history and circumstances of the convicts, the more fully am I convinced that "preaching" is the smallest part of the labor of the man who would do them good. A majority of them are young; their education in most cases, has been altogether neglected; most of them are ignorant of the very elements of morality,—and now having neither time nor disposition to read or reflect, comparatively little may be hoped for from them, by the use of the ordinary means of Grace.

They need a teacher—one who will be willing to submit to the drudgery of instructing them in the very first principles of a common English education—as well as the rudiments of morality. Unless he will do this, he is unfit for the place. Acting from this conviction, I have applied the funds appropriated for the purchase of books, mainly to procure those of an elementary character, such as are adapted to new beginners in the pursuit of knowledge.

I find with most of the convicts, works of this description are eagerly sought and carefully read—indeed, many of them are patiently studied.

I have added lately about seventy volumes (including some Bibles,) to our Library—donations obtained, which cost the State nothing.

We have had comparatively little sickness in the Prison this year, and as a consequence, few deaths. In every case of fatal illness, I have been prompt, more or less, to endeavor to impart the consolations of religion to the unfortunate sufferer.

I am happy to say that every privilege which I could reasonably ask in the discharge of my duties to the convicts, is cheerfully granted me by the Lessee, Mr. Patterson,—and every assistance in his power is always given me by the Warden, Mr. Miller.

At this time I believe we have cheerfulness and good feeling among the convicts; as much so perhaps, as in any Prison in the United States.

The commitments of the last year have greatly augmented the proportion of young men and boys, and shows most clearly, the wisdom and necessity of consummating at as early a period as is possible, the clause in our Constitution which provides for a "House of Refuge for juvenile offenders."

Regretting that I have not more of interest to present in this brief statement,

I am with sincere regard,

Your friend,

LEE ROY WOODS,

Acting Chaplain Indiana State Prison.

PHYSICIAN'S REPORT.

HOSPITAL DEPARTMENT, }
Indiana State Prison. }

D. MILLER, Esq., *Warden State Prison :*

SIR: I beg leave to submit my Report of this Department, for the current year ending Nov. 30, 1855.

There has been more sickness in the Prison during the past year, than there was during the year that preceded it, and, in general, of a more malignant character.

Scurvy made its appearance in a severe form about the middle of December, and prevailed with great violence until the latter part of May. During this period, there were about thirty cases of scurvy admitted into the Hospital for regular treatment. A larger number still, who were affected in a less severe form, received their medicine in the office, and continued out in the various shops at light employments, by which means, those who were affected with incipient symptoms, were kept as far asunder as possible.

This arrangement, with other sanitary measures, assisted materially in the subjugation of the disease.

There was only one death in the Prison resulting from scurvy proper, although several who have since died, doubtless owe the fatal termination of their diseases to the debility induced by the scorbutic condition preceding.

There have been admitted into the Hospital for regular treatment during the current year, three hundred and five cases, and thirteen have died, to-wit : one of scurvy, one of eudocarditis, one of apoplexy, one of pleurisy, one of angina pectoris, one of scrofula, one of dropsy, one of tabes mesenterica, two of typhoid fever, one of acute pneumonia, one of chronic pneumonia and one of phthisis, and two hundred and ninety-two have been dismissed convalescent.

For in and out patients, inclusive, there have been fifteen hundred and seventy-five examinations, with prescriptions written and served out during the past year. I am able to report as good order in this Department, as could be expected under the circumstances.

R. CURRAN,
Physician Indiana State Prison.

APPENDIX.

To the Governor of the State of Indiana:

DEAR SIR:—Having forwarded my annual report through the proper channel, I beg leave to submit a few additional reflections to you upon the treatment of the convicts in the Indiana State Prison, with regard to clothing, food, cleanliness, &c.

If the reformation of the convict, as well as his exemplary punishment, is contemplated in his confinement in the Penitentiary, the management and discipline must be very different from any thing we have hitherto seen in order to realize such desirable ends.

In the mean time I am free to declare that, under the leasing plan, the management could not be better than it has been in the hands of the present lessee. Indeed the conduct and management seems to have been better than the system; and this is owing mainly to the generous good will of the present incumbent. But the system is defective, and never can, in the best hands, attain the ends contemplated or desired. Hence we look with hope and confidence to the introduction of that system devised by the wisdom of our Legislature, under your suggestion and sanction.

If we hope by penal restraints and punishments to effect the reformation of the convict, we must apply the remedy, keeping in constant view his *humanity*.

It is not our business to inquire how much punishment he can endure without being completely broken down and brutalized, but how little of privation and mortification, with kind words of encouragement, may suffice to humble and reform him. Place him in circumstances, however, that compel him to wallow in filth; subject him to exposure to the rigors of winter, with clothing so light that he is frozen in his members or injured in health, beyond the reach of remedy, or confine him to an unvarying, coarse diet, that becomes loathesome to him, and consequently innutritious, and then force him into labor beyond his strength, with an apprehension of the discipline of the lash if he fails or seems refractory; surround him by sullen guards, with none to offer a kind word or

sympathize with him, and your moral instructor might as well shut up his books and betake himself to other occupations, and the idea of reformation be at once abandoned.

Punishment, in order to be reformatory, must be mixed with mercy; but that mercy must be exercised with judgment, and under certain rules and restraints.

While the punishment is severe, there must be grounds left for the subject to preserve some degree of individuality and self-respect. These are compatible with the *endurance* of the penalty for his misdeeds.

This he cannot do, however, while all the means of personal comfort and enjoyment are removed from him. No permanent elevation can be attained without a proper observance of the proprieties and decencies of life; and for this end means and opportunities must be provided, according to some graduated rule.

Cleanliness in person and clothing, for instance, contributes greatly to promote habits of self-respect; and nowhere is this more manifest than among the inmates of a prison. But this requires more clothing, and a greater amount of time than is generally allowed in most of our prisons; and hence we lose this great auxiliary in the government and elevation of convicts.

It is to be hoped that under the new system in our prison regulations, these subjects will receive that attention to which they are entitled.

Much also depends upon the management of the food of those confined in the prison.

The dictates of humanity as well as real economy require that the convicts be fed with nourishing food; and in order to be nourishing it must be somewhat palatable, and furnished in considerable variety.

Nature, in her abundant gifts, suggests the adaptation, if not the necessity, of various forms and varieties of food; and experience has proven abundantly that a disregard of her plain manifestations, in this respect, will be followed by severe penalties.

Variety in the articles of food is essential to continued health, under all circumstances, but more especially so in confined situations and crowded communities. A single article of food, though it be the sweetest and most nutritious, is incapable of supporting the body in health and vigor.

Bread and water contain all the elements of the fluids and solids of the animal body—bread alone is called the *staff of life*—and yet so manifest is it that the human subject cannot subsist for any length of time on these alone, that in Denmark, a diet of bread and water for four weeks is considered equivalent to the sentence of death. Indeed, all the facts with which we are acquainted prove that variety and multiplicity of articles of food constitute an important hygienic rule.

Interesting experiments have been made upon animals, in order to test the adequacy of single articles of food to maintain animal

life. A dog fed at discretion on pure wheaten bread, and drinking common water, does not live beyond fifty days.

Rabbits or guinea pigs, fed on a single substance, as wheat, oats, barley, cabbage, carrots, &c., commonly die, with every mark of starvation, in two weeks. When these same articles are given in succession, or together, with suitable changes and variation, the animals live and thrive.

That great medical philosopher, Magendie, found that if an animal has subsisted for a certain time on a substance which, when taken alone, is incapable of nourishing him—on white bread, for instance, for forty days—it is useless, at the end of that time, to vary his nourishment and restore him to his accustomed regimen; he will feed greedily on the new food presented to him, but will continue to fall off, and will die at the same period as he would probably have done if maintained on his exclusive regimen.

Thus it is seen that though the substances used be equally nutritious and palatable, yet they must be varied in order to maintain animal life. Many lives have been lost in prisons from the neglect to observe and respect these unalterable laws. Scurvy and scrofula, œdema and general dropsy, with other wasting and painful diseases, attest the dreadful effects of confinement to an unvaried coarse diet.

This subject, as well as that of clothing, should be placed within the province of the medical officer, who should have control over these supplies, subject to the checks of his superior for any abuse of power.

Other subjects of deep interest present themselves for consideration, but they may be treated of outside of report; and fearing that I may already have trespassed on your patience, I submit this to your consideration with sentiments of profound respect.

R. CURRAN.

REPORT.

DEPARTMENT OF PUBLIC INSTRUCTION, {
February 11, 1856. }

HON. JOSEPH A. WRIGHT, *Governor of Indiana* :

In accordance with the requisition of the 124th section of the Revised School Law, it becomes the duty of the Superintendent to present the current Report of the Department of Public Instruction to the Executive of the commonwealth, which document I have the honor herewith to submit for your consideration and disposal.

The first report from this department, through a singular infelicity of the statute, was required a few weeks after the Superintendent had entered on the duties of his office, and consequently could be only prospective in its suggestions and introductory in its character. The third was made under similar embarrassments, and necessarily partook, more or less, of the same complexion. A like occurrence in future is happily prevented by an appropriate change of the time for the Superintendent to enter on the duties of his official life. Hereafter the head of this department will not be required to give a detail of labors and results of observation in which he has had no agency, nor be compelled to leave the narrative of his official experience to be furnished by his successor. The present report, therefore, though the fourth in the numerical series, must be regarded as embodying the results of the third years' operation of our educational system under the new constitution.

Though the cause of Popular Education in Indiana may be in a transition state, yet it is rapidly evolving into order, symmetry and efficiency. Its various strata are gradually assuming their proper position and the due relations of a well defined system. The primitive elements may indeed bear traces of the throes of ignorance and the upheavings of selfishness in an ante-constitutional period, but the genial influences of the light and heat of christian

patriotism are rapidly clothing even these volcanic scoria with a soil that promises, at no distant day, a rich and abundant harvest. It is no unwarrantable expectation that the period of its formative condition will be brief, when the developments of the past year are fully considered in connection with the reasonable results of agencies now in operation.

It will be proper to glance, briefly, at the condition of our educational affairs at the commencement of the period now under consideration, in order that we may rightly understand our antecedents, appreciate the progress already made, and profit by the disclosures and suggestions of the future, as they come into the field of subsequent vision.

Our educational system at the beginning of the year embraced in this report, was embarrassed by obstacles of a very serious and formidable character. It had been laboring for months under the depressing influence of a partial paralysis, which threatened to become complete and permanent. The two years of its existence had failed to realize the hopes of its friends, and its operation had mocked, in no slight degree, the expectations of those charged with its administration. The experience of this period disclosed the existence of a chronic disease, that forbid the hope of steady growth and ultimate vigorous manhood. The surgical operation which the patient was compelled to undergo, hardly left sufficient vitality on which to base a reasonable hope of final recovery. In other words, the legal decision pronounced at the close of its second year, created an impression that all was lost, and the feeling was well nigh universal, that we should have to abandon all our cherished expectations of its brilliant career and happy mission. The light of that decision seemed to disclose a radical defect in our fundamental law, and indicate that the school houses, fuel, repairs and furniture, must be a State provision as well as the tuition. This view was materially modified and essentially changed by a subsequent decision emanating from the same tribunal. The conclusion finally reached was that the court contemplated nothing more than a complete and permanent dissolution of all State and township co-operation, in furnishing funds for tuition and building purposes, leaving the exclusive provision of the former to the *State* and of the latter to the *Townships*. This unconstitutional union, embodied in the school law of 1852, had given rise to suits in various parts of the State, which impaired confidence in the stability of the statute and arrested progress wherever commenced. This was the statu quo at the close of 1854. The final settlement of this question, pending as it had been for almost two years and paralyzing the system, in fact, during this period, left the sky clear and the track unobstructed. On the dispersion of this fog of uncertainty, and these clouds of legal doubts, we found ourselves substantially no further in educational progress than we were two years before. Mortifying and disheartening as this discovery could not fail to be, yet it was not without its encouraging results. It

furnished an occasion for the manifestation of the real feeling and educational disposition of the people through their legislative representatives, which has been abundantly corroborated and established by the action of hundreds of townships since the revision of the school law.

The legislature, under the conviction of the soundness of the aforesaid construction of the decision of the court, gave the law a thorough revision, incorporating a few new features, supplying some important omissions, correcting divers mistakes, and giving it a little more executive power in the form of pecuniary means and the method of obtaining them. The results already reached demonstrate the wisdom that suggested the changes, and commend the patriotism that fearlessly made them. The unconstitutionality of blending provision for school house erection, repairs, fuel, furniture and prolonged tuition, is not more manifest than the infelicity of making provision for either of these objects, to depend on the caprice of the popular will, rather than the deliberate and settled convictions of sworn legislators and municipal officers. The like folly is not committed in any other department of our fiscal affairs, and therefore has been wisely discontinued in educational matters.

The district feature of partial independence, without impairing in any essential degree the township oversight and control, gives general satisfaction and bids fair to harmonize the views and feelings of the advocates of township and district regime. They are important elements in an educational system, suited to our varied character and circumstances, but they require a clear perception of their respective limits and legitimate powers, to secure harmonious action and prevent unhappy collision between their respective officials, and dissatisfaction between citizens of different localities in the same township.

Another valuable feature in the recent revision, is the equality in the length of the schools in all the districts of the same township. This provision, worthy indeed of universal imitation, obviates an evil that has long existed, and been deeply deplored by every reflecting educator and thoughtful patriot. On the former principles of distribution, the blessings of the public funds have been dispensed to their recipients in the several districts, in proportion to their numbers, without any modifying circumstances, which becomes in fact, a practical exclusion, to a greater or less extent of the people of sparsely settled districts, from an equitable participation in a common educational patrimony. The correction of this evil has long been an object of earnest desire but had been hitherto unreachd. The incorporation of it in our revised code, may be justly regarded as an evidence of progress, as well as an act of impartial justice. Does the State undertake to furnish tuition for all her youth? Let not the amount of that instruction depend on the mere circumstance of numbers congregated in a given school house, or the children enumerated within certain

geographical limits, denominated districts. The great cardinal principle that underlies and indeed characterizes our educational system, demands that a school of thirty pupils should be taught as long a period and in as thorough a manner as one containing sixty scholars. The interest of the township require it, the claims of justice imperiously call for it, and the plighted faith of the State demands it. No district has any just cause of complaint, or good ground for dissatisfaction, because an adjacent one, with only twenty-five pupils, has a six months school, provided its own seventy-five scholars are faithfully taught an equal length of time. There are infelicities incidental to equality of school terms and township control, that may seem to the inconsiderate and unreflecting, to be serious and radical defects, the peculiar and exclusive concomitants of these features of our system. Unfavorable comparisons between teachers of neighboring schools in respect to their relative attainments and competency, will often be made and the result of this comparison be converted into material to awaken discontent, excite dissatisfaction, create unkind feelings, and provoke unjust and ungenerous remarks. This state of things has existed heretofore, and will exist, and is, in no proper sense, peculiar to the aforesaid feature of our system. It may be perpetuated and indeed greatly aggravated by the prejudice, ignorance and indifference of the inhabitants of a district, or by the indolence, apathy, or incompetence of the trustees, or both of these causes combined. Yet after all, the result is nothing new nor uncommon, and even at the worst, can be regarded only as the reproduction of what existed to an equal, if not greater extent under the control and action of independent districts. These evils will be greatly mitigated, if not ultimately removed by a wise and efficient operation of the township feature of oversight and control.

Another judicious change introduced is the requisition, that hereafter the township trustees' reports shall be made to the county auditor, instead of the State Superintendent. This arrangement will prevent many mistakes, much delay, and furnish better opportunities to secure prompt, full and reliable statistics. The indolent and careless officials can be more easily reached and roused to appropriate action. Oversights and omissions can be more readily detected and supplied. The experience of a single year furnished ample evidence of the necessity and wisdom of such a change. Ninety-two townships and corporations failed to report last year, and many reports received had to be returned for correction, in various particulars, before they could be accepted. These infelicities hereafter will all be obviated. The auditors will have more direct and speedy access to the township boards, and be able to obtain any necessary addenda. These officers will be valuable coadjutors of the Superintendent, and be able to furnish important information to the Department. I take pleasure in stating, in this connection, the promptness with which the information sought in a circular dated December 5, 1855, was furnished by the county

auditors. In less than four weeks more than two-thirds of them returned the circular with the requisite data. Some failed to receive it. Sickness and other causes prevented others exhibiting similar promptitude.

Another amendment of the former school law, suggested by the decision of the court, and incorporated in the revised statute, is the power given the trustees to assess the necessary tax for the erection of school houses, provision of fuel, repairs and furniture, under certain restrictions. The liberal exercise of that power by township boards, within the last nine months, indicates the estimation in which it is held. The unique provision for meeting emergencies in this department, by authorizing the reception of donations, that shall be reimbursed to the generous and public-spirited donors, in the form of exemption from future taxes for like purposes to the full amount of said contributions, has proved a very popular and acceptable device. It has enabled township trustees to undertake the erection of all the school structures needed in the corporation without delay, affording the liberal citizens the opportunity and satisfaction of doing a generous and praise-worthy deed, and giving the more penurious the blessed assurance that they shall not be ultimately overlooked, nor be deprived of the pleasure of a due participation in this good work. This peculiar feature is not merely prospective, but in a modified form, is also retrospective in its operation. It has aided in divers instances, to cultivate a generous and liberal spirit, both directly and indirectly, and will doubtless prove a no unimportant educator of both youth and age. One of the most pleasing signs of the times and marks of progress, is the amount levied for this purpose in no less than four hundred and thirteen townships. The aggregate assessment for this sole and exclusive purpose in sixty-eight counties, is \$314,272 63, a sum indicative of a somewhat primitive condition in reference to school structures, and also highly significant of the real temper and feelings of our people relative to their educational interests. These funds when collected will be expended in the erection of buildings of various form and finish, from the neat rural school house to the splendid and spacious high school edifice, an ornament to the corporation and a lasting memorial of the good taste, intelligence and independence of the board of trustees. Such results, the first year of its operation, warrants the expectation that succeeding years will witness similar progress in the remaining corporations of the commonwealth, till all our towns and cities will be graced with school structures, indicative of a high degree of refinement and a proper appreciation of the real worth of intellectual and moral culture.

Intimately associated with neat, tasteful and commodious school houses, both in towns and rural sections, is the question of adequate funds to sustain schools in these several localities the proper length of time. If the current year exhibits a similar result, in assessment for school structures, with the last, the next Legislature

can be at no loss to infer the will of the masses in relation to school funds. It will require no special logical acumen to infer from such premises the legitimate conclusion. A community, that cheerfully pays a two and a-half mill property and a fifty cents poll tax, (which to one-half of the people, is equivalent to an additional mill property tax) for school houses, will not be satisfied with less than a six months' school in the rural sections of the State, and a nine months school in the towns and cities. Nor will such a people be unwilling to pay the additional tax necessary for such a purpose, when they know that it will involve an increase of present burdens, to one-half of the tax payers, of only from one cent to a dollar, and that the completion of the school houses will release them from taxes seventy-five per cent. greater than the proposed tuition assessment. Almost the sole complaint of the school law, in the counties visited, is the insufficiency of the funds. When told that a three mill tax will be required to furnish a six months' school, the almost universal reply is, we will cheerfully pay it. The present result from the proceeds of our school funds, and the avails of a one mill tax has been a three months' school, which satisfies no one and is but a mockery of hopes and expectations awakened by the establishment of *free schools*.

It is worthy of notice that the classified exhibit of tax payers in seven hundred and forty-eight townships and seventy-three counties, shows that almost five-ninths pay on \$500 and less, and more than two-thirds pay on \$1,000 and less. This expose discloses the interesting and significant fact, that even a three mill tax would impose on almost five-ninths of the tax payers of Indiana, the burden of an assessment varying from one cent to one dollar and fifty cents, and nearly two-ninths would pay only from a dollar and a half to three dollars. Thus it is evident that the masses would not be oppressed by such a tax, when the duplicate shows, that a levy of three mills on a dollar for school purposes on the property of more than two-thirds of said tax payers would vary from one cent to three dollars. In forty-six counties there are reported to be *thirty thousand and ninety-seven* non-residents, whose aggregate property scattered over the State, is safely reckoned by millions, who would, on such a specific assessment, be required to contribute to the moral and intellectual elevation and improvement of the rising generation of the commonwealth, within whose limits their landed estates are located. Many of them would regard such a tax as a good investment and consider its expenditure as really enhancing the value of their lands tenfold the amount of the assessment. This remark is not the result of mere random conjecture, but is based on the known and expressed views of at least some of the more wealthy of these tax payers. If others of them entertain less generous and intelligent sentiments, their speedy conversion would be no detriment to themselves or the commonwealth.

The aforesaid improvements of our educational code, together with some subordinate amendments not specifically noticed, have

placed the common school system of Indiana in a position that will enable every citizen to judge of its merits, and appreciate the nature and necessity of the further corrections that may be suggested by the experience of future years. It certainly possesses elements that justify the expectation of happy results, and entitle it to a fair trial of its capacities for good. Its great cardinal principles, *State provision of tuition and township oversight and control of the schools and the erection of school structures*, meet with a cordial approval and promise to realize all reasonable expectations. Their wisdom and propriety are generally seen, appreciated and admitted. The almost universal expression of public sentiment, both written and oral, hitherto has been in favor of these fundamental elements. The latter has been materially improved in its efficiency by the removal of the constitutional impediments, as its action for the last nine months abundantly proves, and the former has received a slight increase, by the imposition of a fifty cents poll tax. That there should be a little friction in the action of new machinery and that its motion should be subject to slight irregularities, is no matter of surprise nor any cause of discouragement. If there is power to execute the work contemplated, time will soon suggest the proper method of correcting any irregularity in its action and supplying any deficiency or oversight in the application of its energy. The present machinery requires the motive force of a three horse power to make it work to perfection, exhibit the wisdom of its builders, and meet the pressing wants of the public. It is emphatically a three boiler engine, and it is vain and foolish to think of working it with one. More and better work would be done by the implied enlargement of its steam apparatus, with less danger to the premises from explosion, and with increased satisfaction to community and a material advance in the market value of the stock. Before the two additional boilers could be legally ordered, laid in their beds and connected with the solitary one, now taxed beyond its proper capacity, the collateral object of school-house erection, now so heartily undertaken in a majority of the townships, will have been secured and the burden of its accomplishment become a matter of pleasant recollection.

It will therefore be wise to contemplate the aforesaid enlargement, and frame our purpose to make provision for its speedy execution by the next legislature. Let the people take the matter into due consideration and make known to their legislative servants their will and purpose in the premises. It requires no special logic to prove that a six months' *free school* is cheaper than a three months' term. A six months' school we *must have*, for nothing less will satisfy the masses. If only three months of this period be free, the balance must be at the expense of the parents of the pupils. We have shown from data that cannot be questioned, (if any doubt its correctness let him examine the reports of the townships and counties in the appendix.) that more than one-half of the taxpayers, of this commonwealth pay on \$500 and less, and more than

two-thirds pay on \$1,000 and less. Thus it appears that an additional three months' *free school* would cost the aforesaid one-half of our citizens, from *one cent* to *one dollar*, and that none of the above two-thirds would have to pay more than *two dollars*. This would be the expense of the supplementary three months' free school to the above-named portion of tax-payers. But who of all the said one-half could get a child taught three months for his school assessment of one dollar, or any fraction of this monetary unit? A majority of the above-described two-thirds would be subjected to the expense of from five to fifteen dollars to maintain, in a three months' subscription school, the same children that had attended the free school a like period. Either the parents' pockets or the childrens' intellectual culture must suffer by the failure to provide means for a six months' free school, in the rural portions of the commonwealth.

The conviction ought to be both deep and universal in every township in the commonwealth, that the township trustees should be selected with *primary* reference to their fitness and capacity to take charge of and properly manage the educational affairs of the corporation. The other interests committed to their charge are altogether subordinate, and secondary in importance. They should be men of large experience, practical wisdom, liberal views, and unquestioned firmness. All these qualifications will find ample verge and scope in the discharge of their official duties. The location of the sites for the school houses, the erection of these structures of due dimensions, convenient plan, tasteful finish and appropriate furniture, and the employment of competent teachers, demand the best talent in the township. The interests of the corporation must control the selection of the sites; the comfort and progress of the pupils must dictate the character of the structures and the qualifications of the teachers. What else than rich experience, practical wisdom, generous sympathies, and unflinching firmness, will be competent to meet such responsibilities and discharge such duties? Emergencies will arise that require prompt action, demand a clear and satisfactory reason for the course adopted, and call for a mild but firm resistance to demands of ignorance and the clamors of selfishness. Trustees must be men of nerve to resist the one, and of intelligence to answer the other. The experience of many a township, brief as it is, confirms the wisdom and necessity of the suggestion, and admonishes us not thoughtlessly or willfully to disregard the counsel of the past. What greater folly can be committed than ignoring such interests in the election of township trustees? A speedy and inevitable retribution is sure to follow. The thoughtlessness and improvidence of parents in this matter are quickly visited on the children, yea, seen and felt, ere the period of the next election arrives, in the continuance of long existing evils, in the form of ill selected sites, wretched school houses, still more miserable furniture, and corresponding fuel. Trustees that do not appreciate the value of

education, nor comprehend the connection of the aforesaid concomitants, with its impeded progress and retarded improvement, cannot be expected to be very profoundly impressed with either the necessity or desirableness of a township tax to secure the removal of the above impediments and procure the co-operation of coadjutors of an opposite character. Such trustees are not to blame. Sincere, honest, and consistent in their action, or rather nonintervention, in the struggle of light and darkness, they are as unconscious of blame in the premises as the township board that contracted with a firm for the erection of a school house and the instruction of a three months' school for \$60! The responsibility rests elsewhere. Let the proper remedy be applied, the disease will disappear, and the patient will soon become hale and vigorous.

A want of adequate funds for a six months' school in the rural portions of the State, is not more sensibly felt than the paucity of competent teachers is clearly perceived and deeply deplored. Appropriate means for the speedy removal of these evils must be devised and employed. Years must necessarily pass before these obstructions can all be removed and a sufficient corps of able and accomplished instructors grace our commonwealth, even if the most efficient measures should be promptly adopted and vigorously prosecuted. It will therefore be the dictate of wisdom to inquire what policy has been adopted by our sister States on the discovery of like impediments in their educational progress. The first organized effort made to elevate and improve the qualifications of teachers, in the older States, was teachers' associations, partaking more or less, in different localities, of the character of teachers' institutes. This waking up of *d'esprit de corps* attracted legislative attention, and led to public provision for their aid and encouragement. This aid and comfort gave them new life, reputation, and efficiency, which rendered their mission more stable and useful. The nature of their operation and the character of their results indicate their true sphere, and proclaim them harbingers of good rather than the real substantial blessing sought. As there must be a dawn before the full orb'd luminary appears, so the teachers' institute has always heralded the normal school.

As no public provision for either has been made in Indiana, it will not be premature nor illjudged to call attention to the necessity of some plan to give life, ubiquity, and effectiveness to this heraldic enterprise. It must necessarily languish, become spasmodic, and ultimately expire, when dependent solely on private enterprise and individual zeal. It cannot be vigorously sustained, nor become permanently successful under private patronage, however zealous and persevering. The brief existence and temporary results of institutes hitherto held in our State, furnish unmistakable evidence that the time has come when legislative provision should be made to give them power and permanence. Let a competent and experienced corps of instructors go into thirty counties of the State, and hold an institute for two weeks in each of them, with a

due accompaniment of popular lectures, and it would accomplish tenfold more good than the same expense could possibly effect in any other way. We may as well expect the sun to rise unheralded by the dawn, as to think that normal schools will come into being and flourish without this preliminary instrumentality. A normal department may be attached to all our colleges, and as many separate enterprises undertaken, yet it will all be in vain, and only mock our hopes. A knowledge of our wants, and the proper method of removal, ought to secure the necessary appropriation for that purpose. It is to be hoped that the subject will be duly considered by the people, so that their next legislative servants may be prepared to take the requisite steps.

Till something of this kind be done, money will be squandered, schools remain untaught, even with a liberal use of the *sliding scale* authorized by the 105th and 107th section of the Revised Code, and the cause of education suffer, if it does not even retrograde. It is vain to close our eyes to the fact that trustees often find themselves utterly unable to procure teachers for all the schools of the township, and that many whom they do employ, are but mere apologies. The continuance of this state of things without any immediate prospect of improvement, nor any well directed effort to remove the cause of the embarrassment, cannot fail to work disaster, dishearten even the most ardent and paralyze the best directed individual effort. Nothing would be more preposterous and absurd, than ardent zeal and wise endeavor to erect spacious and convenient school structures and provide ample funds, without corresponding advance in the number of zealous and effective teachers. The public mind needs to be directed to the consideration of this particular topic : and its relation to other parts of a wise and efficient system. If there be any truth or pertinence in the adage, "To be forewarned is to be forearmed," then the purpose of the above suggestions will not be fruitless nor ill-timed.

Among the minor improvements, correction of oversights and supply of omissions incorporated into the Revised School Law, there are several deserving more than a passing notice or a casual allusion. A reference to last year's report will show that many townships appropriated their entire share of the school fund to the erection of school houses, and thus converted the children's educational inheritance into brick and mortar, or perchance something else still more perishable, and thereby relieved the pockets of the tax-payers at the expense of the literary aliment of the youth. The day of such abuse of power and such gross perversion of funds, has passed. The reign of such selfishness has happily come to an end, and its exit from the regions of civilization has been accompanied with a scathing rebuke that will not soon provoke or tolerate a repetition of its exercise. The last clause of the second section has brought that abuse to a significant close.

The propriety, justice and, indeed, felicity of the provision of the ninth section, to equalize past burdens and future assessments,

and to secure the speediest enjoyment of their results, are worthy of special notice and commendation. The generosity of the past and liberality of the present, are placed in bold and striking contrast with their graceless counterparts, disclosing the meanness of the one and the nobleness of the other. While the limitation of the assessment was proper and necessary, the device to obtain means to meet present exigencies, without taxing the noble generosity of the liberal at the expense of both present and future exemption of the penurious from a due share of the cost, is both ingenious and happy. It is also gratifying to know that it is not less effective in practice than beautiful in theory, and that its moral results will be far more permanent and felicitous, than even the pecuniary aid it may secure. Present indications seem to authorize the expectation that the school houses will be erected and ready for occupancy in most of the townships within two years. Should this hope be realized, the public mind will be at liberty for the consideration of other departments of the system claiming attention and corresponding improvement.

The equalization of the school funds, with due regard to the exclusive right of the inhabitants of the congressional townships to the entire proceeds of their respective school sections, in accordance with the decision of the Supreme Court, secured by the 101st section of the revised law, gives general satisfaction, and materially lessens the perplexity of the distribution of said funds. The right and power of the State to distribute her common funds so as to equalize the inequalities occasioned by local funds, and thus secure an approximation to an equitable participation of the public provision for educational purposes, has been questioned by a few townships, and the case is now before the Supreme Court. The constitutional question has been submitted to the proper tribunal, where due weight and consideration will be given to all that may be said for and against the exercise of said power by the Legislature. If legislative aid must be invoked to relieve a plethoric congressional township treasury, and legalize the conversion of a portion of its surplus tuition funds into school structures, as it has been done in Ohio, would it not be equally wise and constitutional to guard against such contingencies, as far as equalizing by other funds can prevent the necessity of such pecuniary depletion? If the State, while she respects the vested rights of the congressional township to its educational patrimony from the general government, cannot dispense *her own* educational funds with the wise discrimination of a judicious parent, how can she, with any show of consistency, pretend to dispense justice and make provision for the support of the judiciary on any other than a per capita basis? Is it said that the common interests and the general welfare of society demand that crime should be detected and punished where it is committed at the common expense? While this is true, and the equity of it is unquestioned, it also suggests the inquiry, why

should ignorance, often the parent, aider and abettor of crime, be permitted to lurk and revel in its favorite haunts for want of common aid and assistance sufficient to secure its expulsion? Either let the State lay aside her maternal character and pretensions, or prove her claims to that relation by veritable deeds as well as gracious words. Let her not be a mother in one department of her duties and a stepmother in another. Can no discrimination be made in favor of a township, whose school section has not yet produced a respectable crop of hoop-poles, without a quo warranto being sued out by townships, one acre of whose school lands is worth more than the whole section of the poorer corporation?

The injustice of the library distribution, set forth in the last report, was so manifest and gross, that it needed only to be fairly presented to secure correction. Some townships that got only \$227 worth of books, were entitled to more than *four, five, six, seven, fourteen, and fifteen* hundred dollars worth of additional books. The equalization demanded by the new law will require about \$15,000, and then the apportionment will be made to each township according to the number of children. Three counties got last year so much more than their due share, that they will not be entitled to any portion of the \$90,000 expended this year.

In giving an abstract of the workings of the system, as far as they have been communicated to the department, or been observed by the Superintendent, it is proper to remark, that the office duties have been so numerous, onerous and urgent, that they have left but little time to be appropriated to county visitation. Though labor in that department has been quite limited, yet it has afforded pleasing evidence that it is a field of rich and abundant promise, and worthy of all the cultivation it can receive from the head of this department. During a tour through ten counties, I had the pleasure of a two hours' conference with township trustees and other friends of education in the several counties. The zeal and interest manifested by many of the township boards, indicated a proper appreciation of the cause, of which they were the official representatives. A ride from five to twelve, fifteen, and eighteen miles, in order to be present at the aforesaid conference, the questions asked, and the information communicated by more or less of these trustees, show that the educational interests of some of the townships are in good hands. The aforesaid interviews furnished opportunities, not only for personal interview and acquaintance, but also for the acquisition of much minute and valuable information relative to the real workings of the system, and the estimation in which it is held by the masses. When the weather permitted, a majority of the townships in most of the counties were represented at these conferences by one or more of the members of their respective boards. Four of the five townships of one county were represented by eight members of their boards, who traveled *eight, ten, twelve, and eighteen* miles. Two lectures were delivered in each of the said counties except one. This omission was occa-

sioned by the necessity of accomplishing one of the three stages of travel to the next county, after the delivery of the one o'clock address. Though such an exploration of each and all the counties in the State, which I contemplate accomplishing before the close of my official term, will disclose much to dishearten, it will also bring to light much to cheer, stimulate and assure us of the ultimate triumph of the cause. The people of Indiana are in earnest about their schools, and will do all that is necessary, when satisfied of that necessity. Facts, figures, and information will not be lost on the public mind. The influence of former efforts in this direction is manifest, and is daily becoming more and more apparent. Some counties are more wide awake than others. Some townships exhibit no dubious signs of progress. They are actually in the field at work in some corporations, while in others there may be only tokens that the preliminaries of the day's toil are under discussion, and occasionally not even the chimney betrays any signs of awakened intelligence within. There are all grades of interest felt in the cause of popular education, and manifested by the appropriate symbols, from the unhewn log house to the three story high school edifice. The unhewn log and the unchinked wall is one type of progress, even though it be somewhat primitive and rude, yet it is real, and not unfrequently does its rudeness betoken the rapid approach of a more worthy and significant substitute, and even this, in due time, will give place to a higher style of architecture.

One method adopted to open a communication with the township boards in advance of the personal interview, give expression to our cordial sympathy and communicate information relative to some of their more pressing and important duties, has been the issue of circulars. Through this medium suggestions have been made, hints thrown out, references to sources of information and counsel given, that have been appreciated and followed. The character and extent of these instructions relative to the various duties and responsibilities of the township boards, may be learned from the specimens of these circulars contained in the appendix of this report. The trustees have been urged to avail themselves of the means placed within their reach, to erect good, substantial, tasteful and commodious school houses of the most approved pattern, to pay due regard to the principles of ventilation as set forth and illustrated in Griscom's *Uses and Abuses of Air*, and in *Barnard's School Architecture*, and to exercise their utmost wisdom in the selection of the sites for the school houses. They have been reminded of the propriety and advantage of spacious grounds and neat inclosures, fixtures and furniture. They have been cautioned against yielding to the importunities of selfishness and the suggestions of ignorance in the formation of the districts. The temporary inconvenience, or the supposed infelicity of large districts is more than compensated by the superior and permanent concomitants of such territorial divisions. The early experience of other States warns us against

the multiplication of small districts, while their more recent policy and practice impel to an imitation of their present example. The superior wisdom and economy of the large over the small districts become apparent on a fair exhibit and impartial comparison of their legitimate results. A township of thirty-six square miles, may be divided into districts of two miles square, as many of them really are. Thus carved, it presents *nine* of these little cosey, quasi corporations, with a corresponding number of children, often so small as to forbid the establishment of a school, or if established, so insignificant as to be little the enterprise, and leave an unfavorable impression of its real character and consequence on the public mind. These nine schools, enfeebled by their numerical poverty, languish, droop and become so attenuated, that it is difficult to ascertain whether there is any literary life and activity in either teachers or taught. It is a very natural conclusion that is often reached and acted on by the trustees, that the schools are too small to justify the employment of the first class teachers, and therefore an inferior grade is sought and installed in these centers of literature and science, to engineer their charge through the sublime mysteries of their own ignorance, put in the time and obtain a certified claim to a portion of the public funds. This patent method of appropriating the school funds, degrading the educational cause, and exciting in the minds of our youth, a distaste for knowledge and a disgust at the usual means of obtaining it, is no fancy sketch, the originals are in too many localities to be ignored or denied. There is too strong a family likeness between the school-house, pupils, instructor and trustees, to escape the notice of even the most casual observer. A more legitimate conclusion from given premises, was never reached, than that small districts ensure small and ill furnished structures, short terms, incompetent teachers and corresponding instruction, lifeless schools and unawakened intellects, general apathy and partial disgust at the whole system. This result has been realized, demonstrated, stereotyped and widely circulated in the older commonwealths, known and read of all men. This is a truthful picture of one side of the medal, now let us look at the obverse.

The aforesaid township may also be divided into districts three miles square. Thus arranged, it presents *four* districts of sufficient amplitude to authorize the erection of more spacious and convenient houses, the employment of more competent instructors, and justify the expectation of sufficient amount of raw material to tax the skill, rouse the energy and encourage the best efforts of the literary manufacturer. This territorial division would subject but very few of the pupils to the necessity of going more than a mile and a-half from the parental roof. The exercise incident to that amount of daily travel, would be an important item in their physical education, and so far from being detrimental to their literary progress, it would rather promote it, by creating a more lively sympathy between the intellectual and physical natures, and

calling into more vigorous and lively action their respective powers. We have already too many of these hot-house plants. Let us give our children and youth a little more physical power and energy by subjecting them to a more hardy discipline. A walk of a mile, or mile and a-half, every morning, inhaling the pure, life-invigorating air of heaven, would not only damask their cheeks and call the whole muscular system into healthy exercise, but it would impart corresponding activity to the mental powers. Such daily excursions could not fail to cultivate a familiarity with the scenes of the outer world, and awaken a sympathy with the beauties of the material universe and its Great and Glorious Author. Under such a nurture our sons and daughters would be something else than mere shadows. There would be physical development that would give them, at least, a pre-emption title to the name of men and women, when they reached maturity.

The youth of a township trained under the discipline of such a policy, would possess a character for intelligence, enterprise, and a hearty sympathy with true genuine progress, that would not fail to proclaim their fathers' wisdom, economy, foresight and enterprise. Under such an educational administration, the schools would be worthy of the name, teaching merit the appellation of a profession, the houses be less dubious indices of the purpose of their erection, the value of knowledge more highly appreciated, and the import of mental discipline more clearly comprehended. The economy of such a policy is too obvious to require any financial exhibit, and the wisdom too manifest to need any explanation. Its introduction would be a marked era in the history of popular education, and its universal adoption would be nothing else than the veritable golden age of intellectual culture, benevolent impulse and philanthropic enterprise.

It is said that small children cannot walk a mile and a half or more in bad weather and in the winter! True, but they can be carried, and it would prove in the end, far more wise and economical for even the few parents so geographically situated as to create that necessity, to carry their children occasionally to the school-room, than to have the people's colleges within a mile of every man's door and be correspondingly insignificant and unworthy of the name. If children must be sent to school, whose infantile years awaken the suspicion that to get them out of the way at home was no secondary motive in securing their attendance, let not such Young America control the school policy of the township fathers, and compel them to reduce the size of their districts to suit the muscular powers of such Lilliputians.

The prevalence of such views has crippled the energies, dwarfed the usefulness and belittled the common school in the public estimation long enough in the older States. As they are waking up, rubbing their eyes and beginning to bestir themselves on this point, shall we commence our Rip Van Winkle nap? The township feature of our system was intended to correct this evil, and forestall

this inconsiderate slumber. I am aware that circumstances must occasionally modify our action, yet as a general principle for our government in these matters, large districts should be the standard, and reduced ones the exception, and these as few and as far between as possible. It will prove pecuniary wisdom and financial economy, to adopt the large district policy, although it may occasion an extra trip of the team, and enlarge the programme of the parents' visits to the school, which certainly will not prove an unwelcome addenda to the teacher's joys, nor be without its happy influence on the pupils, nor be unattended with real advantage to the unfortunate parent himself. Better that a few should go even two miles, and *all* have the benefit of superior instruction and a longer period of tuition, than that the majority of the pupils be within a stone's throw of the school house, with corresponding brevity of school training and inferiority of instruction. Better profit by the experience and testimony of others, than pay the tuition of that old teacher of the incorrigible, whose bills must and will be paid without any advantage of appraisement laws.

In these circulars, the attention of the township boards has been directed also to the superior ease and satisfaction, with which the educational matters of the corporation can be disposed of with a full treasury at command. The policy of paying their teachers with time drafts on a temporarily empty treasury, long practiced in many corporations, has been contrasted with the opposite course, and the substitution of the latter for the former has been strongly recommended. The present time, while the school-houses are in a process of erection, seems peculiarly favorable for such a change and strongly urges the introduction of the cash system. It would be attended with less trouble and perplexity now, than at any subsequent period, and the era of new school houses would be inaugurated under financial auspices of a peculiarly pleasing character. It will be no fault of the department, if this policy is not introduced into every civil corporation of the commonwealth.

One of the most prominent and characteristic events of the educational year just closed, is the reception and distribution of the last third of our six hundred and ninety-one libraries of three hundred and twenty-six volumes each. The detention of these 77,393 volumes in New York, all winter, till the month of April, was a matter of deep regret, and delayed in many counties the distribution of the libraries to the townships till that time. The operation of the library feature of the system, as far as heard from, has been exceedingly happy, disappointing the predictions of its enemies, and the fears of its timid friends, and even transcending the most sanguine expectations of its more ardent advocates. The interest awakened by its use and the estimation in which it is held by adults, as well as youth, confirm the wisdom that gave it a township character rather than a district mission. Its selection and purchase by the Board of Education is not without advantages of an important character. The former may be controlled and governed

by the principles of a wise, judicious and well matured plan, and thus secure all that could be desired in forming the taste and giving direction to the reading material furnished by the State, while the latter cannot be else than superior in economy to any other method.

It is believed that the principles of selection indicated on pages twenty-five and twenty-six of my last report, are sound and correct, commending themselves to the approval of every reflecting, judicious and patriotic citizen. No one, who looks at the character of the times and the tendencies of the age, will fail to perceive the desirableness and importance of deeply imbuing our youth with the spirit of those who laid the foundation of our government, shaped the national policy and established the fundamental principles that have controlled and guided her subsequent development. How can either youth, or age, be brought into lively sympathy with those, who achieved our emancipation from foreign thralldom, or those who subsequently reared our political fabric, without an intimate acquaintance with the history of their toils, privations and noble self-sacrifices? This knowledge can be obtained only by making themselves familiar with the standard histories of the times and the veritable biographies of those civil and military worthies, prominent in colonial and revolutionary periods. The department of American history and biography, in such a library, should be peculiarly rich and satisfactory, not only in the elaborate works, but even in those of more local and humble pretensions. The fragmentary sketches, historical incidents and personal reminiscences, composing the variegated woof of the standard history and stately biography, should not be overlooked. Even the legends and ballads of a stirring period are worthy of notice and perusal. They often reflect the spirit of the times and present a phase of society so quaint, unique and striking that it both charms and instructs.

The *parent* should not look in vain to the township library for instruction, adapted to his wants and suited to his tastes and necessities. The *teacher* should find in its treasured stores the ablest works in his department of labor, embodying the general results and experience of the best minds, whose energies have been concentrated in the educational work. It should furnish entertainment for the hours of relaxation, instruction for the thoughtful and reflecting moments, amusement for the wearied mind and nourishment for the roused and inquisitive intellect. The *man of scientific* tastes and pursuits should be assured of finding on its shelves something kindred with his mental aspirations. The *artisan* should be lured to consult and ponder its pages, in confidence that he will not go away unblest, and that familiarity with its treasures cannot fail to kindle the ardor of his pursuit and fire the fervor of his zeal. Men of all professions and employments, of varied tastes and tempers, likes and dislikes, should feel it to be a common center of attraction, a general fountain of knowledge and a common bond of

universal brotherhood. A library of such antecedents and concomitants cannot prove else than an effective and permanent coadjutor in any system of popular education. There are many pleasing tokens that it has entered on a glorious mission, and the indications of the high estimation in which it is held and the usefulness it is accomplishing, are neither few nor insignificant. The short time that has elapsed since the books were apportioned to the townships, opened and put in circulation among the people, forbids any general collection of library statistics. It may not be amiss in this connection to present a specimen of what has been received, relative to its operation in various parts of the State. One township reports 1,230 volumes taken out in $3\frac{1}{2}$ months; another 687 in 4 months; another 1,242 in 9 months; another 1,050 in 6 months; another 700 in 9 months; another 1,540 in 10 months; another 2,127 in $8\frac{1}{2}$ months. No two of the said townships are in the same county, and none of these libraries contained more than 330 volumes. A column in the statistical department of next year's report, exhibiting the number of volumes taken out during the year, would give a birds' eye view of the use made of the library, and show its value as an educator. Such an expose would doubtless convince the most skeptical that a *one quarter of a mill* property and a *twenty-five cents* poll tax never accomplished so much for education in any other way, and that it had better be left unrestricted in time, or the period of experiment be prolonged to three or four years. Nothing could be more disastrous, impolitic and unwise than the intermittent policy. Chills and fever are not very desirable, whether real or figurative, and their influence on the body politic, as far as its educational interests are concerned, is as unhappy as the veritable tertian on the physical corporation.

The various inquiries made by librarians relative to the cost of each volume, discloses the oversight committed in the preparation of the descriptive catalogue accompanying the libraries, in not appending the price of each work. This omission will be found supplied in the Appendix, together with a detailed exhibit of the collateral expenses of the purchase, transportation and distribution of the libraries and the funds appropriated to this department of our educational system. Such an annual expose of the appropriation of the library funds should be furnished by the report of this department, and may hereafter be expected.

The equalization of past inequalities, and the principles of future apportionment of the libraries required by the revised law, devolved on the Superintendent the duty of preparing a classified list of books for the current purchase, of at least fifteen hundred volumes, there being six townships entitled to sums varying from \$1,035 to \$2,310. Nothing but actual experience of its difficulties and responsibility, will ever convey any adequate conception of the labor, care and anxiety connected with the preparation of such a catalogue. It has outweighed all other drafts on the time, energy and thought made on the department. These remarks are

not intended to deprecate criticism in advance, for the imperfections or omissions that may be discovered when the list is complete, but to indicate that there has been good and sufficient reason for any supposed deficiency of out-door labor and county visitation, and to disabuse the minds of any, who fancy that the office of Superintendent of Public Instruction is a pleasant sinecure.

It is gratifying to be able to announce through the pages of this report, that there is increasing evidence of the purpose on the part of the teachers of Indiana, to leave no wise and judicious means untried to elevate the profession and meet all just and reasonable expectations. The State Teachers' Association, at their annual meeting in December, resolved to undertake the publication of a Monthly Journal, and made the necessary arrangements for the issue of said serial the current month. It is to be hoped that a generous sympathy and liberal patronage will be accorded to that enterprise by every one, who claims the title of a friend of popular education. The character of the gentlemen charged with the supervision and responsibility of its publication, is a sufficient guaranty that the patrons of the Indiana School Journal will have no occasion to regret the aid and comfort rendered it during the first year of its mission.

The Superintendent has had the pleasure of attending the commencement exercises of four of our five colleges. Two occurring on the same day, prevented the possibility of carrying out his purpose to be present at them all. It is also his design to spend at least a day in each of the said Institutions, for the purpose of a more intimate acquaintance with their methods of instruction and the character of the recitations. Though these institutions are the products of private associated enterprise, over which the State is entitled to no oversight or control, except of one, yet the head of this department has had too long experience of college labors, and cherishes too deep and lively sympathy with those in charge of these institutions, to entertain for a moment the most distant suspicion that such visits would be any less agreeable to their respective Faculties than to himself. These Faculties cherish a much more cordial interest in the advancement of popular education, and have a much more direct and effective agency in its real progress, than the superficial observer supposes, or is disposed to acknowledge. Its history in Indiana would put such sapient souls to the blush, were the curtain withdrawn, that hides from public gaze the labors of these instructors in the recitation room and in the study, through the pulpit and the newspaper columns. The baccalaureate addresses of their five Presidents for the last twenty years, delivered before popular assemblies, have accomplished more to rouse the public mind and give it a right direction in reference to its educational interests, than the combined efforts of all the ignorant, prejudiced, self-conceited college croakers since the flood. These Presidents and their associates have done more through the press and popular lectures, though they may seem to the one idea man to be few

and far between, than they will ever get the credit for from the casual observer. Their own labors in "keeping college," have too much of a family likeness with the school master's vocation, to permit them to be unsympathising spectators of his toils and degradation. It is gratifying to perceive the gradual diminution of the popular prejudice against colleges, so industriously fostered by some having no experimental knowledge of their benefit, and by others, who, having enjoyed the opportunity of a thorough training, give incontestable evidence of the indolence and negligence of their own college life, and betray a want of either the capacity to appreciate, or the honesty to acknowledge their obligations to those whose mistaken kindness tolerated the graduation of such learned dullness.

The number of our higher Institutions has been increased the past year, by the introduction of the North Western University at Indianapolis, into the college fraternity. Denominational as all these Institutions are in their origin, except the State University, they are none the less efficient and cordial in the great work of education, and bespeak the purpose of their founders. Liberal in their spirit, generous in their aspirations, and enlarged in their views of education, they constitute a fraternity that will prove both an ornament and a blessing to the commonwealth. The sympathies of our people cluster around them, and they have grown up to their present maturity and usefulness under the hardy discipline of indigence, and been blessed with no small share of its trials and embarrassments. Their pioneer life and triumph is an ample guaranty of their future mission. The thousands of teachers that have already gone forth from them, are but pledges of the thousands still to follow. Colleges, academies and schools are but parts of a great national system of popular education. Numerically considered, the common schools may be regarded as the base of the pyramid, the academies and colleges the symmetrical and graceful superstructure, whose summit reflects the dawning rays of science through many a retired valley and sequestered nook, and around whose top have ever lingered the twilight beams of the departing day of popular illumination. Historically and logically considered, the apex is the true base, however paradoxical it may seem. Colleges give rise to academies, and these in turn nourish and foster schools. Both in our own and European countries, the establishment of colleges *preceded* the introduction of any system of common schools. The past and present of all these nations confirms the truth and soundness of our remark. The date of the foundation of many of their venerable Universities *antedates*, by centuries, the maturity of any wise provision for the training of the masses. Four of our six colleges sprang into being in the *second* decade of our existence as a commonwealth. What was there in being, at that period deserving even the name, much less possessing the character of a wise and efficient system of common schools in Indiana? Let the true sequence of causes be understood

and there will be no difficulty in adjusting their relative claims to public regard, and their true position in the series. The exaltation of neither can be permanently promoted by an undue depreciation of the other. Colleges and common schools, one in their mission, indivisible in their results, now and forever, should be our motto.

Of the number and relative prosperity of academies and female seminaries in the State, the Department has no adequate means of knowing. Many of them will doubtless be absorbed by the silent operation of our system, as it evolves the several parts of an efficient graded school. Others will maintain their identity and independence, and accomplish their appropriate mission. It is a matter of regret that the authorities in some corporations have neglected to make the legal provision for the continuance of their schools, and have also failed to adopt the necessary measures to secure the requisite school house accommodations, and a systematic arrangement and classification of the pupils. The system should not be held responsible for such results. The fault is elsewhere and the authors of it should be held to a strict accountability for the failure. It is an enquiry worthy of consideration, whether the Board of Education in our cities should not be elected directly by the people, for a period of three years, one-third only going out of office at a time, and that they should not only have the charge and oversight of the schools, but also of the assessment for school purposes. This arrangement would prevent one unhappy result frequently occurring, an entire change of the persons charged with educational matters and a corresponding revolution of the schools. Nothing can be more disastrous to their best interests and prosperity, than such fickleness and instability of both means and measures. The tendency of such a policy would not only contribute to dissociate our educational affairs from all connection with political contests, but also to assimilate the city management to the township feature of control, whose board are elected for the period of three years. It would be in the highest and purest sense, democratic, prove more satisfactory to the masses, and give stability and efficiency to the operation of any system that experience might commend. The above suggestion is thrown out for the consideration of those possessing the power to effect the change, or desirous that such a policy should characterize the future.

It is both an interesting and significant fact, that the State Board of Agriculture have kindly entertained the suggestion, to offer a premium for the best high school edifice, another for the best furniture and apparatus, a third for the most tasteful and convenient rural school house, and a fourth for corresponding furniture, fixtures and enclosure. The following list of premiums for the purposes aforesaid, may therefore be expected:—1st. Colton's Universal Atlas, in 2 vols. folio; 2d. A copy of the following works—Webster's Quarto Dictionary, Smith's Dictionary of Greek and

Roman Biography and Mythology, in 3 vols., and Lippincott's Gazetteer; 3d. A pair of 13 inch Globes; 4th. A copy of Webster's Quarto Dictionary and Lippincott's Gazetteer. The appropriateness and practical value of these premiums will be readily seen. If good taste, neatness and convenience in farm houses, barns and other appurtenances of the farm, are legitimate objects of encouragement for the State to foster, surely school architecture, furniture and enclosures may claim a modicum of her maternal regard with equally promising hopes of happy results. Such an enlightened policy and liberal views will be appreciated, and the continuance of them for the next ten years will secure memorials of their wisdom, even more durable than silver pitchers, and more extensively known and valued by the masses than the most exquisite production of the graver's art. Under the stimulus of such inducements, the prompting zeal of an intelligent appreciation of their intrinsic worth, and the guidance and suggestive power of superior specimens of school architecture, we may hope to see structures rise, both in our towns and cities, and also in the rural districts, that will indicate to the passing stranger the good taste and public spirit of the parents, and prove a rich source of instruction and comfort to the pupils and of joy and rejoicing to the teachers.

Uniformity of text books is a matter of no small moment to the purses of the parents and the progress of the pupils. They are the silent teachers, directing the enquiries and prompting the investigations of the scholars and should impart uniform instruction, and in the happiest manner. A wise selection of these cannot fail to be seen and felt in the prosperity of the schools. The law provides this uniformity in order to obviate evils, that have heretofore proved serious obstacles to the pupil's progress, and fruitful sources of dissatisfaction on the part of the parent and the no small annoyance of the teacher. No change in the list first established has been deemed necessary or desirable, except in the geography, for which a series has been substituted, as far as published, that will occasion no cause of regret to either pupils, parents or teachers. If trustees will not allow teachers to dictate and control in this matter, but second the intention of the legislature, and not permit every change of instructors to be synonymous with a revolution of text books, one important point will be gained. The competent teacher is not dependent on a *particular* text book for ability to train successfully his pupils, and can therefore use any good work in the several branches taught. The power of the State Board of Education in this matter is only advisory, but the purpose of this provision may be entirely defeated by a practical disregard of its results, whatever may be the means by which it may be effected. Either let no list be recommended, or let the suggestions of the Board be uniformly followed, as far as they have been made. As they extend to only the books used in the grammar and lower departments, the city boards of education are left at liberty to introduce such text books in the higher departments

as their experience may dictate. The economy and freedom from vexation, secured by the aforesaid uniformity, are objects worthy of regard and should not be sacrificed to the dictates of either ignorance or selfishness. In science there will necessarily be progress, and consequently a change of text books will occasionally be demanded. But the *text book* in morals is the production of an Author, whose wisdom needs no revision, whose knowledge is susceptible of no increase, and whose benevolence admits of no question. The Bible, without note or comment, is installed in the schools of Indiana, and its continuance as the moral standard in these nurseries of her future citizens, will as surely mark the period of her prosperity and grace the zenith of her glory, as its exclusion would prove the precursor of her decline, the herald of her shame.

The imperfection of the returns of the several school funds for this year, consequent on certain requisitions of the revised law, forbids a full and accurate exhibit of those funds, classified as they will be hereafter. Consolidation, under the operation of the previous law, had taken place in many counties and the funds were reported accordingly. The dissolution of this unconstitutional partnership will be consummated and the assets reported in season for a full exhibit in the next report. With the current year expires the period for which the State Bank of Indiana was chartered. The settlement of the affairs of that corporation will show how much the common school fund will be increased from that source. The net amount of this fund, reported by the Fund Commissioners, November 5, 1855, is \$1,465,788 97.

The school system was made the residuary legatee of the swamp land estate. Present appearances indicate that the heir of this noble bequest will find among its assets, after the debts of the estate are paid, little else than the good will of the testator and the kind wishes of his executors. Though the swamp land fund, it is believed, will be completely exhausted in rendering these lands fit for agricultural purposes, yet its conversion into material ditches will not be without a favorable connection with the educational interests of the State. Thousands of acres will thus be redeemed from the dominion of frogs and fever miasma and converted into fields loaded with the rich fruits of the earth, or clothed with flocks and herds more numerous than ever graced the enclosures of the man of Uz. The revenue ultimately arising from the agricultural improvements of these lands, will doubtless prove more extensively and permanently useful to the cause of popular education, than the entire proceeds of their sale would have effected, had they all been added to the school fund. Though this fund of magnificent dimensions has been literally *drained*, yet its under-drains will impart increased fertility to the educational manor, whose proceeds will be an ample equivalent for all disappointed hopes in that direction,

The property of the State, pledged by the constitution to the

cause of popular education, may be regarded as the most reliable funds for the support of our schools. The Legislature have appropriated the avails of a one mill tax on said property for this purpose, and have also made a levy on the polls, for the same object, to the amount of fifty cents on each, to remind the owners of such personal estate that its security and value would not be diminished by the diffusion of knowledge; and therefore it might be properly taxed for its own protection and the general good. One collateral result of the aforesaid assessment will be the tendency of it to awaken in the minds of such property holders a more deep and decided sympathy and interest in the success of a system pledged to the training of the masses and the general diffusion of knowledge.

The financial exhibit of educational funds will be as follows:

Real and personal estate assessed in 1855.....	\$302,310,839 00
Number of polls in 1855.....	178,877
School assessment on the above amount.....	\$302,310 83
School assessment on the polls.....	89,438 50
Gross amount from the above sources.....	\$391,749 33
Aggregate of the school funds as reported last year, which has been increased from various sources, but not being definitely known, however, is not included in the above amount.....	\$2,559,308 12
This fund is loaned at 7 per cent., and the officers' fees for receipt and disbursement are 5 per cent. of the interest, which is about one-third of 1 per cent. of the interest on the amount loaned, and therefore the net interest on the school fund, at six and two-thirds per cent., will be.....	\$170,620 54
Amount of the above income.....	\$562,369 87
From this deduct delinquencies at the rate of school tax delinquencies of 1853-4, and fees and travel- ing expenses, at 16 $\frac{2}{3}$ per cent.....	93,728 31
Net amount from the above sources.....	\$468,641 56
Amount of the unexpended balance of school funds in the treasury, Oct. 31, 1855.....	32,073 91
One-half of the delinquent school tax of 1854 ...	42,616 77
Probable amount for distribution in May, 1856....	\$543,332 24

There must be a large delinquent school tax of 1854, to come in this year, from the fact that of said tax of 1854, amounting to \$277,790.21, only \$192,556.67 were paid last year, according to the Auditor's report, Nov. 1, 1855. This leaves a delinquency in the school tax of last year of \$85,233.54.

The decision of the Supreme Court converted the congressional township school section fund into a local, or special fund, and the Revised School Law commits it to the custody of the counties, and its proceeds are disbursed by the county officers. This remark is

made to show, that though the principles of equalization embodied in the law convert this fund, to a great extent, into a common fund, yet its proceeds were not an element of the fund apportioned last spring by this department. The amount of funds reported by eighty-six counties, consisting of net interest on the common fund and taxes collected and in the treasurers' hands, subject to apportionment, was \$271,500.21. The five counties not reporting were estimated at \$7,494.74. The aggregate of these reported and estimated sums is \$278,994.95; being \$7,328.75 less than was actually paid into the State Treasury, or reported to be on hands by the county treasurers. The State Auditor, in his report of November 1, 1854, page 43, reports \$47,533.07 in the treasury. This sum, added to the aforesaid aggregate, makes the amount of \$326,528.02, which the Superintendent deemed it his duty to apportion to the several counties, according to the requisitions of section 97 of the Revised School Law, supposing that reports of county and State officers were reliable data. Proceeding in accordance with the provisions of the statute, he declared an apportionment of *seventy-two cents* to each of our 445,471 children, leaving a margin of \$5,788.90 for contingencies, and then issued a circular to the county auditors, in accordance with section 100, apprising them of the amount due to their respective counties, having previously filed with the Auditor of State a statement of the same purport.

After settling with divers county treasurers on the basis of this apportionment, the Treasurer was led to believe that the state of the Treasury would not admit of the payment of the whole of the balance of \$47,533 07 this year, and requested that ten per cent. of the sum apportioned to the counties, might be deferred till the next year, which would call for the payment of \$15,459 16 this year, and leave \$32,073 91 of the aforesaid balance to be paid out of the revenues of 1856; which deduction of ten per cent. reduced the apportionment from seventy-two cents to sixty-four cents and eight mills (64.8.) On his urgent request, and statement of the embarrassed condition of the fiscal affairs of the State, and the inability of the Treasury to pay the entire sum this year, another circular was issued to the county auditors, setting forth the facts, and requesting them to act in accordance with the said facts. The change occasioned some perplexity to the county officers, but the aggregate disbursed in May, 1855, including the interest of the special fund distributed by the counties, would exceed the apportionment of the previous year, at least five cents per scholar. The infelicities of the former law occasioned the accumulation of that large balance in the Treasury, and the subsequent necessities of the State caused its temporary disappearance. The balance of \$32,073 91, now due, will be included in the next apportionment, and consequently the schools will not ultimately lose a dime of their annual patrimony. This full and undisguised statement of all the facts of the case, is due, both to the people and the officers charged with the

apportionment and disbursement of the common educational funds of the State. No censure can justly attach to either Superintendent or Treasurer. The former had the legal evidence of the facts, on which his action was based, and he is neither expected nor authorized by the law, to extend inquiries either behind or in advance of the facts set forth by the fiscal officers. The latter could act only to the extent of the means at his command.

It is to be hoped that no citizen will permit himself to be misled by the miserable, pitiful and unfounded charge, that we are burdened and oppressed with school taxes, and have a less period of instruction for the same means, than under the old order of things. Facts and figures cannot be tortured into the service of such lovers of the dear people. They shun them as the owl does the mid-day sun. The school system shrinks from no just and truthful scrutiny, and its advocates decline no honorable challenge to its defense. The statistical portion of this report contains facts, unquestioned data, fully authorizing the statement, that more than one-half, almost five-ninths, of the tax-payers of Indiana pay on \$500 and less. On the present assessment of one mill on a dollar of property, and fifty cents on the poll, the school taxes of that portion will vary from fifty cents to one dollar, and no more. Did any of that five-ninths get their children taught three months for that sum? The aforesaid data also demonstrate that more than two-thirds of our tax-payers pay on \$1,000 and less, showing that the school taxes of the said two-thirds will range from fifty cents to one dollar and a half and no more. Who of this majority of our citizens ever got *one child* properly taught three months, for even the maximum of the aforesaid scale? Are such taxes for tuition burdensome? Can such assessments oppress the masses? Shame! where are thy blushes? So much for tuition. Now let us look at the school houses. If they already exist in sufficient numbers and in proper condition, there will be no school house erection tax. If they are not found, it is quite pertinent to enquire where those long and excellent schools so feelingly remembered and so highly prized, taught in the golden age so much deplored as irrevocably passed? The echo reiterates the inquiry, that will be much more easy to repeat than satisfactorily answer. If we have no school houses, tuition funds will be of little avail. I have little faith in any golden age of schools without houses, either in the past, present or future. The expense of the school houses belongs to the croaker's side of the question in dispute as well as ours. This is no misnomer, for when the truth is reached, it will be found that the masses have little or no sympathy with such sentiments. Is it doubted? Look at the *five hundred and eighty-eight* school houses built last year, valued at \$166,655. Does the assessment of \$314,272 63 for school house erection in four hundred and thirteen of our nine hundred and forty-one townships during the last year and now in process of collection, look much like sympathy?

Now for the library assessment that is breaking the camel's back.

There is nothing like facts and figures in the solution of such questions of public economy. A *quarter of a mill* property tax, and a *twenty-five cents* poll tax, is the crime charged against the revised school law. In the defense of our client, we shall summon as witnesses of his innocence, the aforesaid two-thirds, I might more properly say, three-fourths of the tax-payers of this commonwealth. They all testify that the most they ever knew the prisoner demand of any of the aforesaid witnesses was *fifty cents*, and that his claim on more than two-thirds of the witnesses varied from *twenty-five to thirty-seven and a half cents*, and no more. With this testimony, we cheerfully let the case go to the jury, confident that no twelve men can be found, who, under the solemnities of an oath, and in view of the evidence, uniform, consistent and unanimous of such a body of our best citizens, will return a verdict of guilty. They are not willing to leave their seats. Their verdict is written on their very countenances. The court may as well call on them at once for their decision, without the formality of retiring. Is the prisoner guilty, or not guilty? Not guilty! This verdict will be pronounced just and righteous by the five hundred thousand readers of township libraries.

Another popular clamor, very intelligently raised and very patriotically reiterated, is the wholesale and sweeping assertion that "the officers eat up the funds," "the locusts of Egypt consume the educational substance of the people." If this be true, it is time the Augean stable was thoroughly cleansed. But let us look at the facts in detail. The Superintendent is regarded by some as the greatest incubus, and therefore we will examine his case first. He is a constitutional officer and not the creature of statutory power. As a State officer, his salary is paid, not from the school fund, but from the fund appropriated to the payment of Executive officers, and therefore the school fund is not burdened with his salary. The county auditors and treasurers constitute the next grade of offenders. The 93d section of the Revised School Law, specifies their compensation. "The county auditors shall receive for their services in managing the school fund, the two per cent. damages accruing on all sales for the non-payment of loans, and three per cent. on all disbursements of interest; and the county treasurers shall receive two per cent. on all disbursements of interest and two per cent. on the amount of school tax disbursed." Let us analyze these provisions. These two officers get five per cent. on the disbursements of interest, which is less than one-third of one per cent. on the sum loaned, and therefore our school funds, loaned at seven per cent. net more than six and two-thirds per cent. when their proceeds reach the township treasury for distribution. Such fees will never enrich the collectors and disbursers, nor such a tariff impoverish the proprietors of funds thus managed. The two per cent. damages, named above, come not out of the fund, but the delinquent borrower. "The two per cent. on the amount of school tax disbursed," is the lowest figure the State pays for the disbursement of

any of her funds by the said officer. If this tariff of fees in the school department is objectionable, it is equally so in all the others, and therefore the attention of the said reformers needs to be extended to other branches of our fiscal affairs. The township board is the next grade of functionaries placed at the bar of this self-constituted court, and required to plead to the general charge of embezzlement, or absorption of school funds. True, they reply, we are salaried, or rather per diem men, but fortunately for us, in this case at least, we cannot get our hands into the school fund purse, (see section 2, Revised School Law,) and therefore are guiltless of the charge. The prosecutor will probably be disposed to enter a *nol. pros.* against the remaining class of school officials, when told that their per diem is paid in time drafts on the good will of the district. What else, does all this blustering asseveration and groundless assertion prove, than that their authors know not whereof they so confidentially affirm? Let them serve through all the school official ranks, as far as their fellow citizens may choose to promote them, and they will be better posted in the premises, and find the temperature of their zeal somewhat abated.

Our school system possesses elements of sterling worth and real power, and when fairly tested will vindicate its claims to the cordial sympathy and generous support of every lover of progress. The facts disclosed in this report show, that there exists a feeling of confidence among the people of its stability, and a growing conviction that it is worthy of all the material aid that it requires to develop its capacities for good. Its friends will find something in this annual document, that may be of service in carrying on another campaign in its defense. Foes it has as well as friends, and every transfer from the ranks of the former to those of the latter, is a two-fold addition to its strength. Let not the zeal and courage of its assailants outstrip the ardor and valor of its defenders. The ardor of the former should provoke, as well as encourage, the fervor of the latter. Firm, persevering and unfaltering, in our purpose and efforts, we have no fear of an unfavorable result. Confident of a happy issue to patient continuance in well doing, let the friends go forward, remembering, that "deeds not words," is the proper test of friendship to the cause of popular education.

This is the appropriate place to present a condensed expose of the results reached during the last year, some of which are the first fruits of the revision of our educational code, and others are the exponents of the legitimate workings of our system as developed in the law of 1852. The second tabular view in the appendix presents some interesting, significant and encouraging facts, grouped by counties, while the abstract of the township school reports is not devoid of interest. A minute and critical examination of said tabular exhibits, will furnish ample materials for thought, suggestive of what remains to be done, as well as commemorative of what has been achieved. The light that shines on one portion

of the picture is too nearly balanced by the deep shading that rests on another. While the sun may shed his genial warmth and radiance on some parts of the landscape, cheering the eye and rejoicing the heart of the spectator, ominous clouds rest on others, awakening corresponding apprehensions. The frequent use of the sliding scale, (explained in the appendix, under "questions answered,") suggests a state of things, that demands a prompt and efficient remedy. These contrasts however, upon the whole, indicate progress, and show that light is actually making permanent inroads on the domain of darkness, and that ignorance is slowly receding before the steady approach of knowledge. The picture indeed presents some strange comminglings of light and shade, intelligent zeal and ignorant apathy, and furnishes specimens of prompt action and "masterly inactivity," indicative of the character and duration of the struggle yet to be waged.

The following is a brief summary of the developments of the tabular exhibit of this report:

88 counties report the number of children between 5 and 21 years of age, to be.....	439,781
3 counties not reported, estimate at the last years' enumeration	12,343
Whole number of children between 5 and 21 years of age	452,124
Increase over the number reported last year.....	6,653
Counties in the State.....	91
Civil townships.....	941
54 counties report 30,681 non-resident tax-payers.	
756 townships report 274,748 tax payers and 150,229 pay on.....	\$500 and less, almost 5-9
572 townships report 213,447 tax payers and 148,277 pay on.....	1,000 " " more than \$
413 townships report school house erection tax assessed.....	\$314,272 63
690 townships report districts.....	5,127
574 townships report schools.....	3,625
238 townships report school houses erected last year.....	588
Cost of the same.....	\$166,650
551 townships report male teachers....	2,979
308 townships report female teachers....	841
Whole number of teachers.....	3,820

A glance at the foregoing summary and an examination of the details of the tabular exhibits, will disclose the imperfection of reports. Deficient as they are, yet they are greatly in advance of last year in many important respects, illustrating the wisdom of the change of the source whence reports to this department should

proceed. Only three counties have failed and these contain only twenty-seven townships. Last year *ninety-two* corporations failed to report. On several important points the returns of this year are more full and satisfactory. The following tabular comparisons illustrate the above remark:

Schools reported in 1854.....	2,622
Schools reported in 1855.....	3,625
Teachers reported in 1854.....	3,098
Teachers reported in 1855.....	3,820
School house tax reported by 57 corporations in 1854.....	\$34,736 00
School house tax reported by 413 corporations in 1855.....	314,272 63
Average length of schools 1854, in months.....	2.54
Average length of schools 1855, in months.....	2.85
Average wages of male teachers 1854.....	\$23 00
Average wages of male teachers 1855.....	23 00
Average wages of female teachers 1854.....	15 62
Average wages of female teachers 1855.....	15 72

In compliance with the requisitions of the law, demanding of the Superintendent "a brief exhibit of his labors, the result of his experience and observation, with due notice of any imperfections in the operation of the system and suggestions of the appropriate correction," he has deemed it his duty to use great plainness of speech and fit array of figures and illustrations. The aim has been to present facts and the reasons of them, experience and the results of it, rather than fine spun theories. It is wiser to know the worst of the case and provide for it, than, by a careful concealment of its real character, to flatter ourselves that there is no cause for alarm, no occasion for apprehension. If we continue to run on the flat bar of a one mill tax and fancy that it is as secure and threefold cheaper than the T rail of a three mill levy, we must not be surprised, if our fancied security should be suddenly disturbed by an unannounced and unceremonious entrance of an educational snake-head, the precursor of dire disaster and the herald of sad disappointment. An open, frank, straitforward and liberal policy will be found in educational matters to be the only wise, efficient and successful one. Shall it be adopted and its wisdom tested? Let this question be honestly met, thoroughly canvassed by the masses and settled on the basis of an unshaken conviction of its truth and soundness, and they will be prepared to enter the promised land, though the walls of selfishness tower to heaven and the Anakims of ignorance are entrenched behind their ramparts.

It was a matter of no slight gratification to find so many of the suggestions, contained in last report, embraced in the revised code, when that revision was complete and its results clothed with the

authority of a statute of the commonwealth. But it was a source of still greater satisfaction to see it meet so general and cordial approval of the people, as the results of its operation since its enactment most clearly and fully proves. The experience of the past year encourages the hope that it will not only retain the confidence of its friends, by demonstrating its capacity to realize all reasonable expectations, but it will also win to its hearty advocacy and staunch support many of those whose faith has hitherto been feeble and whose friendship has been something more than equivocal. Once let the public mind settle down in the conviction that the school system needs but a thorough and candid trial to evince the wisdom of its fundamental principles, and there will be no difficulty in gradually incorporating into its structure all those improvements that are the natural results and legitimate sequents of its great cardinal characteristics. Let the masses awake to the true conception of its relations to their best interests, and a cordial co-operation in promoting its progress, and our fondest expectations will be speedily realized. This report cannot be more appropriately closed, than with the remark that on its pages will be found ample encouragement for effort, and abundant evidence of the necessity of prompt, wise and unremitted labor in the cultivation of a field, whose mental fruits shall be as imperishable as the intellectual soil that gave them birth, and whose moral products shall prove like flowers of heavenly perfume destined to bloom and shed their fragrance on earth, till transplanted to the paradise above.

CALEB MILLS,
Superintendent of Public Instruction.

Note.—The poverty of this report is attributed by the Auditor to the failure of the Trustees to make the necessary returns. Its *luminous* character will readily disclose the path of official duty to the Township Boards in future, and continue to throw its benignant radiance on *all parts* of the schedule, illuminating not only their department but even shedding some rays on the *un-illuminated* portions of the Auditor's labors.

REMARKS.—The school returns from the three delinquent counties referred to in the summary, on page 33 of this document, came in after this report was written and while the tabular portion was going through the press, arriving with little else than the mere announcement of the fact that there were so many children of school age in the county. The utility and value of statistics depend on their fullness and accuracy. Were every township board prompt and faithful in this department of their duty, it would enable the county auditors to furnish the Superintendent with materials for a report that would present the true condition and actual progress of our educational interests. Meager as some portions of the foregoing tabular exhibit may be, yet on some points, the facts are sufficiently full to warrant the deductions drawn from them, and, on others, the details afford cheering evidence of the dawn of a better day. It is to be hoped that promptness will hereafter characterize the action of all connected with the executive department of our common school system, and that the next report will contain unmistakable evidence of improvement in this respect.

It would be a pleasing spectacle indeed to see every space of the foregoing tabular exhibit filled with its appropriate information, instinct with statistical intelligence, like a well organized army, compact in front, flank and rear, every file complete, every rank full, indicative of the activity and skill of every officer from a corporal to a colonel. Our forces, thus marshalled and drilled, would evince both the purpose and the power to storm the Sevastopol of ignorance and sweep the trenches of prejudice and parsimony of their sturdy occupants. Some regiments, indeed, make a fine display of rank and file, as they deploy on the field of annual review, ready for inspection, roll call, or action, while others remind the spectator of a decimated corps en route *from* the scene of conflict. Were the colonels of our educational forces to ride along the line of some regiments, they would meet with companies, whose officers could not parade a corporal's guard to grace the dignity of their commissions, or shield their persons from insult and derision. The whole corps from some counties presents no inapt resemblance to a battalion, whose files have been mowed down with cannon shot, in front and flank, and whose ranks have been shattered by the explosion of a thousand shells. Let the next annual review exhibit proof that the recruiting service has been vigorously prosecuted. In other words, dropping the martial figure, let every township clerk see that his corporation report accords, in form and fullness, with the requisitions of the statute and is promptly forwarded to his respective auditor, marred with no blemish, full and complete, from the number of districts to the various details of schools, teachers, pupils, compensation of instructors, school-houses erected, and the number of books taken from the library. The township clerks have it in their power to redeem the tabular portion of this document from all future charges of leanness and all just imputations of poverty.

APPENDIX NO. IV.

Circulars to Township Boards.

No. I.

DEPARTMENT OF PUBLIC INSTRUCTION, }
 Indianapolis, June 9, 1855. }

To the Board of Township Trustees:

GENTLEMEN:—It would be to me a matter of sincere delight to have a personal interview with you, both in your individual and associated capacity, for the purpose of a mutual acquaintance and a more intimate and cordial official sympathy and co-operation. That pleasure I cannot now enjoy, but must content myself with the anticipation of the future. It is my purpose within the next twelve months, to visit every county in the State. In that tour I wish to meet the Township Trustees of each county, and spend some two or three hours in mutual conference and inquiry relative to our respective duties and the interest of the cause in charge. Confident that my motives will be appreciated, and that any wise and judicious suggestions that may be made, will receive due consideration, and ensure corresponding action, I have ventured, in advance of the contemplated interview, to address you, and call your attention to a certain class of duties that will claim prompt and decided action.

I shall send to each of your clerks a copy of the revised School Law, in a pamphlet form, with explanatory notes, forms, and suggestions, as soon as it comes from the bindery, which I hope, by due course of mail, will reach you within eight or ten days. From it you will perceive that some important changes have been made in the nature and extent of your duties, by the transfer of some to new functionaries, and the imposition of others of grave and responsible character. To your official care, providence and liberality, are consigned interests of the highest moment, involving the welfare of the present and the prosperity of the future. The full power of a complete and thorough system of Public Schools to promote the material, social, literary and moral advancement of society, has yet to be tested in Indiana. Causes have hitherto existed to a greater or less extent, marring their efficiency, thwarting the efforts and mocking the purposes of their most ardent advocates. Poverty and parsimony, ignorance and prejudice, legal imbecility and legislative oversight, sectarian bias and selfish indifference, have all contributed their due share to the aforesaid result. But in spite of all the individual and combined influences of these adverse agencies, there are signs, indubitable signs, of pro-

gress in the right direction. To guide and accelerate that progress is the legitimate purpose and obvious mission of your office, demanding no small amount of personal intelligence, firmness, and independence.

Educational improvements and progress, that were anticipated three years since, have not been realized, except to a very limited extent. The legal questions, raised almost simultaneously with the enactment of the Statute paralyzed in no slight degree the efforts, checked the zeal and crushed the hopes awakened by the passage of the school law of 1852. Instead of beautiful and commodious school houses evincing the good taste and generous patriotism of the people of their respective localities, we still meet with primeval structures, unenclosed school premises, unadorned grounds, dilapidated buildings, types of a by-gone age, still lingering in the pathway of progress; or if the spirit of improvement has been awakened in some corporations, the evidence of its presence and power will be more generally seen in the unfinished building and other arrested educational improvements, than in the well planned, spacious and well furnished structures, tasteful enclosures and becoming embellishments actually completed.

This is in a great measure the present state of things. Progress thus unhappily arrested must be resumed, taste so rudely checked must be re-awakened, and the public mind so disheartened, must be re-aroused and enspirited. This new-born zeal must be wisely directed and intelligently employed. Who shall awaken and guide these slumbering energies? The friends of education justly expect that those charged with official functions, will be found in the van, directing the ardent, restraining the impetuous, cheering the timid and distrustful, urging the indolent, and rebuking sluggishness and selfishness wherever found, by the impulsive power of a noble, self-sacrificing, personal example. While the wisdom of the serpent and the harmlessness of the dove should characterize official action, yet these traits should be associated with a firmness of purpose that shrinks from no just responsibility, and a patriotism that knows how to sacrifice all selfish and personal considerations conflicting with the general welfare.

It is desirable that, as we are now about to provide accommodations for our schools, that will be types and patterns for the next twenty years, a wise reference should be had to the question, shall the houses be neat, uniform in style, commodious and well furnished? Shall the sites be lovely and attractive, the grounds spacious, enclosed and adorned? If so, then the best plan should be adopted in reference to the external appearance of the structures, their internal arrangements, furniture and fixtures, securing for the pupils all the comfort and convenience that their physical, moral and intellectual culture could reasonably demand. The influence of such provision on the intellectual progress, social culture and moral development of our children cannot fail to be happy and effect-

ive. Whatever contributes to render their school associations pleasant and make its memories delightful, is worthy of consideration and adoption, even in a pecuniary point of view. Both time and funds are saved, intellectual stores and moral attainments largely increased by even these silent and inanimate instructors. A nice perception of what is tasteful and becoming in conduct, a delicate sensibility to all that is lovely in the natural and moral world, should be early and assiduously inculcated, and the social susceptibilities of youth should be cultivated simultaneously with the intellect and the heart. These traits are the very opposites of rudeness and coarseness, and will find their appropriate expression in the corresponding external manifestation, softening many of the asperities of life, and commending themselves to the approval of the virtuous and patriotic. Shall these finer sensibilities, bestowed for wise and important purposes, be neglected and all trace of them be obliterated by a failure to provide the appropriate means for their development and culture? Shall the vandal work of crushing them be suffered to proceed even by a longer tolerance of causes, that have hitherto been producing these disastrous results? Under what class of influences shall our children be placed and the youth of our townships grow up to mature life? Shall it be under the suggestive power of the primitive rudeness, external slovenliness, and internal discomfort of structures that can extend to their inmates but a partial shelter from the inclemencies of the season, and whose very walls are vocal with the praises of the wisdom that provided such ample means for ventilation? Shall the pupils be daily provoked to draw comparisons between the comfort, good taste, and wise arrangement of their parental mansions, and the utter destitution of all these marks of civilization in the structures to which they are sent for the acquisition of knowledge? Will such an exercise, though not required nor in the programme, yet invariably a part of the daily routine of mental training, be productive of either intellectual progress or moral refinement? Or, rather let me ask should not the youth of Indiana, at the most plastic period of their existence, have the full benefit of the moulding influence and refining power, silent and imperceptible perhaps at the time, yet none the less real and happy, of neat, spacious, well furnished, and thoroughly ventilated houses, lovely sites, tasteful and adorned enclosures? Such assistant teachers, though mute yet expressive and highly significant, would from their permanence and power, be the most economical instructors that could be employed. Once licensed and installed in their appropriate sphere of labor, they would become the ever ready and sympathizing coadjutors of the living teacher, the kind, ever present, ever prompting and smiling foster parents to the toiling pupils, reminding them of parental providence and expectation, their country's liberality and claims upon her educated sons and daughters.

The policy you adopt will leave its impress on the school struc-

tures, furniture, and playgrounds, a memorial of your wisdom and forecast, your independence and firmness in resisting the suggestions of selfishness and short-sighted economy, or the silent but significant emblem of the absence of such characteristics in your administration. Experience shows that liberal views and corresponding appropriation in these matters are ultimately more economical and satisfactory to all concerned.

You will find the subject of ventilation thoroughly discussed and illustrated by fact and figure in a work, in most of your libraries, entitled "Uses and Abuses of Air;" and it is to be hoped that not a school house will be erected in any township, till its trustees have read the aforesaid volume and thoroughly pondered its diagrams and suggestions. Barnard's School Architecture, a copy of which is in every township library, will furnish specimen views of what has been, (see page 45,) as well as what is in many, and ought to be, in every township and city of the land. You will select, examine and modify the plans contained in that work, and also in the "School and School Master," another valuable work in the libraries, to suit your various localities and wants.

It may be well to make a generous use and even to test the utmost capacity of that peculiar provision of section 9th of the school law in reference to advance taxes to meet the emergencies of the times. You will often be perplexed by the importunity of the people of some districts to have *their* house erected this season, and of the best models. The aforesaid provision will furnish the means of testing their public spirit and relieving your embarrassment, and at the same time furnishing the requisite means for the gratification of their wishes.

I have dwelt more on the topic of school house erection, because it is one that will force itself on your attention and call for action this season. Its pressing necessity, its important relations, permanent and expensive character, demand it should be thoroughly considered and wisely disposed of by the present township trustees. It is believed that no legal impediments now lie in the way of prompt and efficient action in this department of your official duty. Let the school houses be erected and furnished in the next two years, and then we shall be at liberty to concentrate our energies on the ways and means of securing a six months school in all the rural portions of the State. You will be strongly tempted to shrink from the exercise, to the full extent, of the authority vested by the law in the Trustees to provide for repairs, furniture and fuel, and erect the necessary structures. But remember that subsequent approval of a wise and liberal policy in this matter, will more than compensate for any present and temporary dissatisfaction that may be provoked. It should also be borne in mind that the character of the Township Trustees of 1855-6-7 will be daguerreotyped on the school structures, grounds, furniture, and fixtures of their respective corporations, to be the subject of con-

temptation and comment long after the originals have passed away.

Your utmost diligence and care will be required to obtain good teachers for your several districts, and it is to be hoped that the suggestions made in the notes appended to the school law in its pamphlet form, in relation to the relative duties and responsibilities of District Directors and Township Trustees, will neither be overlooked nor disregarded. The most cordial sympathy and harmony should be cherished and perpetuated between these officers. I can readily conceive the perplexities incident to a faithful and independent discharge of your duties and I can also cordially sympathize with you in them all. The consciousness that we have risen superior to all selfish considerations in our official acts, will amply compensate for all present censure, all ungenerous comments of those who neither appreciate our motives, nor the cause in which we labor, and assure us of the approval of Him, whose "well done, thou good and faithful servant," will leave nothing more to desire, nothing more to enjoy.

Yours truly,

CALEB MILLS,

Superintendent.

CIRCULAR NO. II.

DEPARTMENT OF PUBLIC INSTRUCTION, }
Indianapolis, August 10, 1855. }

To the Board of Township Trustees :

GENTLEMEN—The time is rapidly approaching when, in the discharge of your duties, it will become necessary to take the enumeration of the children between five and twenty-one years of age in your respective corporations. It is exceedingly important that the next enumeration should be accurately taken and promptly reported to the county auditor, in accordance with the requisition of sec. 10 of the Revised School Law. You will perceive by reference to said section that the enumeration hereafter will be less complicated under the present than under the former statute. There are many and weighty considerations impelling to a faithful performance of this duty. Educational statistics derive all their value from their accuracy and completeness. You are the agents on whom the Auditors and Superintendent depend for the materials for their reports. On you, therefore, devolves the responsibility, and on you will rest in no slight degree the honor of furnishing a full and satisfactory report of the educational statistics of the commonwealth. Let no reasonable pains be spared to realize the just expectation of our fellow-citizens. While there is less complexity in the information sought, and a corresponding

diminution of perplexity in the preparation of the report required to be made by township boards, it will be perceived that there is a special reason for promptness and fidelity in taking the present enumeration, since the choice of districts this year, on the part of every individual parent or guardian, becomes permanent, and is not subject to an *annual* change as heretofore. As certain franchise as well as definite educational privileges are attached to this choice, it should not be forgotten that, as matter only can be stereotyped, the election of the present occupant of a tenement will determine the educational connection of its subsequent residents. Otherwise fluctuation and change would still prevail and defeat, in no slight degree, the obvious purpose of the statute. The mutability of this choice tolerated by the former statute, was one of its manifest defects, and experience has suggested its correction. It will become your duty, therefore, to inform every head of a family of the permanency of his choice, that he may act intelligently, deliberately, and have no occasion to regret the election.

The form of Report to be made to the county auditor, found on page 32 of the aforesaid statute, will furnish all the information necessary for a full and accurate exhibition of the results of your investigations, the labors of your teachers, and the condition of your schools. Let it be an illuminated thermometer of the educational atmosphere of your township, a living index of the vitality of your corporation zeal in this cause. It is very desirable that there should be no error in the statement of the number of districts in each township. The item, 'number of common schools in the township,' in the form alluded to above, was not designed to ascertain how many sessions schools have been taught in the corporation, but in how many districts there have been schools during the educational year, commencing the 20th of September. Taking the enumeration by congressional townships, or parts thereof as may be included in your civil townships, you will be able to report with perspicuity and accuracy on a point involving no little trouble and perplexity to the Auditor. Due care and attention in these matters will materially relieve that officer's educational burdens and secure his cordial thanks. The average attendance in all the schools of the township can be easily obtained by dividing the aggregate attendance, found in the teachers' reports on this point, by the number of schools. These materials will always be at command, if you invariably insist on the observance of the requisitions of section 23d of the law.

The trustees are required by section 27 to make their engagements with the instructors employed in the several districts so that the sessions in all shall be equal. To divest this matter of all perplexity, let the school sessions in all the districts commence at the same time, as far as practicable. The known wishes and obvious interests of school districts should not be pertinaciously ignored to secure this uniformity of beginning, but the manifest advantages of such an arrangement demand that it should be generally adopted. Thus trustees and directors could so arrange their duties &

to occasion the least possible draft on their time and patience, and at the same time secure the most efficient action in the discharge of their supervisory duties. If the funds will sustain a school in each of your districts only one session, let it be at a season when the interests and convenience of the largest number will be best subserved. This order and system once introduced and established, will make your official labor more pleasant to you, more acceptable to others, and more effective to the cause. All can arrange their plans accordingly, and a more general satisfaction be secured. This policy adopted will enable you to ascertain the length of your schools the moment you employ the last teacher, for the amount of your public funds is definite and known. This remark is made on the supposition that these funds have not been anticipated. It would be well worth all the necessary trouble and expense in every township, now at the outset, to secure the convenience and advantage of this order of managing the fiscal department of our educational affairs. Better have no public schools for one year, than perpetuate a state of things forever enveloped in doubt and uncertainty. Nothing could be more embarrassing to trustees than an empty treasury and an uncertain apportionment. Competent teachers can seldom be obtained under such circumstances. With cash in hand we can compete with our neighbors in the market for the best article, so with a full treasury we can secure the services of the best instructors. But under that order of things, which substitutes for the legal currency, time drafts on an empty township treasury, we must be subject to worse than Egyptian bondage.

The public funds can now be *legally* appropriated to only one sole and specific purpose, viz: tuition. Any disregard of this provision of the statute will be a manifest violation of the law, and the Trustees, making any such mal-appropriation, may expect to be required to refund every dollar. No excuse or apology will be a substitute for the funds thus diverted from their legitimate object. If, through ignorance of the law, any have sinned in this respect, the proper evidence of penitence and the appropriate atonement for the fault, will be the assessment of a township tax to replace the funds illegally used. If they have been paid since the passage of the Revised School Law, to liquidate debts for school-houses erected previous to the passage of the revised school statute, or have been appropriated to school structures now in process of construction, the authority for the aforesaid assessment is undoubted, not merely unquestioned, but imperative, as the language of the 9th section abundantly proves. Errors in this matter must be corrected, and Trustees must not complain, if they decline the statutory method of correction of such mistakes, should the re-imbursement of perverted funds be sought at their hands by the aid of legal suasion.

An accurate statement of the number of school-houses erected, either partially or entirely during the current year, and the total

expense thereof, will constitute an important and valuable item in your report. It is to be hoped that all reasonable care and effort will be used to make that item as full and satisfactory as possible. In reporting the number of volumes in your libraries, it will be a matter of much less trouble for you to simply state the number and mark of the boxes received, as for example—two boxes, B. & C., or one box A., or C., or B. This method of reporting will be of great service to the Department, since it will indicate both the number of volumes and the works composing each library. It is known at this Department how many books each of the three classes of boxes above indicated, contained. A. and B. boxes contained 107 volumes each, and C 111 volumes more. By the aid of such a report, we shall know where to commence the next apportionment of books to each township. There being no providential hindering, we hope to complete that distribution next June. Please ascertain from your librarians the proportion of the books, which on an average, are weekly taken out and in constant use; and also state your impression of the estimation in which the library feature of our system is regarded by the citizens of your township and the reasons for it, whether favorable or unfavorable.

I would strongly recommend that the Township Trustees and District Directors establish the rule of holding stated meetings and that they be at least semi-annual. Such a course would be productive of great good, contribute to harmony of views, efficiency of action, and a livelier interest in the cause committed to their supervision. Let there be a mutual understanding between Trustees and Directors relative to their appropriate spheres of duty, and thus forestall negligence, dispute and dissension, and thereby secure prompt, cordial, and effective co-operation.

Nothing you can do will conduce so much to the prosperity of your schools, after you have provided comfortable and capacious houses and competent teachers, as systematic and frequent visitation. Endeavor to secure the company of as many parents as possible in these educational visits. Frequent calls on the part of the school officers and parents will encourage both teachers and pupils. If you would not employ a hand to haul rails for you a week without at least one visit, why should your children's progress and your teacher's success be left uncared for, month after month? Your schools will necessarily be, in no unimportant sense, just what you make them. No law, by its own mere inherent power, can infuse life, impart energy and insure success to an enterprise, however wise and discrete its provisions. As we'll might you expect a steam saw-mill, with improved machinery and abundance of fuel, to manufacture good lumber without efficient management and scientific supervision, as to look for order, substantial progress and successful teaching in a school, whose inmates are never cheered by a parent's approving smile, nor the official guardian's cordial commendation. Remember that the employment of

teachers of doubtful literary competency and questionable character and habits, will prove the height of folly even in a pecuniary view, and in its literary and moral aspects, is entitled to the severest reprobation. Active minds and susceptible hearts are too delicate and priceless to be subject to the moulding influence of any of doubtful character or attainments.

It is also to be hoped that you will not overlook the advantage to the pockets of the parents, the progress of the pupils and the comfort of the teacher, that results from uniformity of text-books. Reference to sections 118 and 157 will show the intention and views of the Legislature on this point. A hearty co-operation with the State Board on the part of township trustees, in this matter, would do much to secure a very important element of success. It is believed that the text-books recommended by the former board and now in extensive use in our schools, are such as to furnish no valid cause for change except the Geography, for which the present Board, after due consideration and patient examination, have resolved to substitute Cornell's series, which in their judgment is sufficiently superior to the one formerly recommended to fully justify the change, and hope that township boards will lend a hearty co-operation in effecting the introduction of these valuable text-books.

Doubts have arisen in some localities relative to the right of individuals, transferred from their own civil township to an adjacent one for educational purposes, to the use of the library of the township to which they have been transferred. On this point it is perhaps sufficient to remark, that all the educational privileges and immunities of a transferred individual, irrespective of county lines, go with him, and that he is entitled to the use of the library as well as the school of the corporation he has selected. The law contemplates and the citizens expect, that the trustees will act promptly and wisely in the location and custody of the library, and that great care will be taken both by them and the librarian they may appoint, in the prompt assessment and collection of damages done to library books. The prices of the books of the first purchase were not attached to the catalogue, but this oversight will be corrected in the next. No tax or assessment for the use of the books can be *legally* laid on the persons taking them from the library. Where this has been done, it must be refunded, and the expense of procuring book cases and the compensation of librarian must be included in the general charge for fuel, repairs, &c., and met accordingly. If any township wishes to enlarge its library by private donations they will find the Superintendent ready for any desired co-operation of counsel or purchase.

There is one error, which must be cautiously avoided, and to accomplish this will often test the wisdom and firmness of Trustees, viz:—the formation of small districts. There may occasionally be individual inconvenience, but the infelicity of such cases will generally admit of gradual amelioration, and if not, it will be more

than compensated by the superior advantages incident to strong districts. In some localities there must and will be temporary weakness, but this will ultimately be eliminated by the growth of the township. There must be no *division* of funds between districts, either on the basis of the number of pupils in them, or on the ground of equality of schools. Your official responsibilities cannot be met by any such surrender of control and management. It is one of the fundamental elements of the system, indeed its crowning excellence, that all the schools of the township are under the control and supervision of a wise and efficient board, and that tuition is a *State provision*, while the school house, furniture, fuel and fixtures, are a *corporation charge*.

I hope ere the lapse of a year to have a personal interview with you all at your respective county seats. I will give your Auditors sufficient notice of the time of my visit to enable them to apprise you of the contemplated meeting. Your annual report is henceforth to be made to the County Auditor; a wise change, yet I shall feel myself under great obligations to each township board, if they will favor me this coming October with the library report as suggested above. I trust the suggestions contained in my circular of June 9th, relative to the sites, enclosures, construction and furniture of your school houses have been duly considered. A careful perusal of "Barnard's School Architecture" and "Griscom's Uses and Abuses of Air," cannot fail to impress the conviction of the wisdom and economy of the course recommended in that communication.

We must not be discouraged by the exhibition of selfishness, nor disheartened at the existence of ignorance and prejudice, nor appalled at the apathy of individuals, nor frightened at the hostility of these combined foes. Let us rather labor to dislodge selfishness by the cultivation of a more excellent spirit, displace ignorance by the substitution of knowledge, compel apathy to give place to zeal and activity, disarm prejudice by the conviction of its error, and convert the hostility of those opponents into cordial amity. These results both justify and demand intelligent and unceasing effort. If there be any disappointment of hopes, any failure of expectations, let not the cause of them be justly chargeable to official dereliction. The success of the enterprise, the permanency of our institutions, and the welfare of the youth of our commonwealth demand that all charged with educational responsibilities should faithfully and fearlessly do their duty.

The text books for common schools recommended by the State Board of Education are the following: The Bible; McGuffey's Eclectic Speller; Indiana I, II, III and IV Readers; Ray's Arithmetic, Parts I, II and III; Cornell's Geographies, Parts I and II; Butler's English Grammar; Webster's Dictionary; and Cutter's Physiology and Hygiene, (School Edition.)

Yours truly,

CALEB MILLS, *Superintendent*.

REMARK.—It will be seen from the foregoing report, that the suggestions of the preceding circulars have not been lost, nor their wisdom been altogether unappreciated by the Township Boards. It is indeed a noble response to the educational exigencies of the commonwealth, that has been made the last summer by the Trustees of *four hundred and thirteen* townships, in the assessment of a school house erection tax, amounting to \$314,272 63; while the erection of *five hundred and ninety-one* school-houses during the past year at the expense of \$166,900 00, indicates the reality and energy of that zeal which underlies the enterprise. Though some of these structures may be somewhat primitive in their internal characteristics and their external features, as would be inferred from the reported cost, yet others would not suffer in comparison with kindred edifices in other States. Not a few of them are ornaments to the corporations which have erected them, and bespeak the good taste, the patriotic firmness and intelligent forecast of the Boards, under whose auspices they have risen.

APPENDIX NUMBER V.

Answers to Questions on the School Law.

The following questions have been submitted to this Department for solution, at divers times and from different parts of the State. As others of similar import, involving the same principles, are frequently proposed, it has been deemed advisable to give the more prominent of these and their respective answers, a place in the Appendix, with the hope that all interested in the points at issue may have their doubts solved:

Question 1.—Can teachers, qualified to instruct only in orthography, reading, writing, and arithmetic, be legally employed?

Answer.—The framers of the law evidently contemplated cases in which it would be desirable, nay, even necessary, if there be a school for the season, to employ teachers with less literary qualifications than section 149 specifies. If less qualifications will meet the present wants of a given district, (the pupils being young, or but little advanced in their studies), and they request the township trustees, in the manner provided in the 105th section of the Revised School Law, to employ for said district a teacher competent to teach only the aforesaid four branches; and if, with a full knowledge of that deficiency, the people still press their suit, then the end of the law for them is met, and their wishes may be legally gratified in accordance with the spirit and letter of sections 105 and 107 of the aforesaid law.

The *State standard* of the literary qualifications of teachers is fully and distinctly stated in section 149, but sections 105 and 107 were intended to give the people of a district the privilege of elevating or depressing it to suit the exigencies of their case in any given year. It is occasionally desirable, on account of the advanced progress of pupils in some localities, to have instruction given in supplementary studies, not embraced in the said programme; so also it is equally important that the people in other districts, wishing, for obvious reasons, only the first four branches to be taught in their school a given year, should have their preferences gratified, when made known in the way indicated in the statute.

I consider sections 105 and 107 as a *sliding scale* authorized to be used by parties desiring it, on presentation of a petition in the manner aforesaid. However undesirable the sliding down process may be, yet I see nothing in the said sections limiting the *direction* of the course. The petitioners themselves must be the judges of what will best suit their circumstances at the time. The question is, therefore, answered in the **AFFIRMATIVE**.

It may be proper to add, by way of *practical correction and cau-*

tion, let the Examiners state distinctly in the certificate the *specific studies*, and that it is granted on *petition* of the people of the district, and therefore *exonerates* the trustees and the commonwealth from all censure in the premises, and consequently is valid only for *one term*, and in *that locality*. This will operate as a stimulant to their ambition to reach the State standard, for if the individual can teach only in *one place*, and that too, for only a *single session*, without a fresh examination and renewed fee, it will readily occur to him that a protracted course in that direction will ultimately result in loss of both fame and funds. The propriety of this precautionary suggestion is too obvious to require explanation.

Ques. 2.—Who shall fill vacancies occurring in the district Directorship?

Ans.—In the absence of all specific provision in the statute in case of a failure to elect, or vacancies occasioned by death, removal or resignation, we are left entirely to inferential light. On the principle that a vacancy occurring in any inferior office is filled by the proximate superior power in its appropriate department, we should conclude that the township trustees possessed the authority to fill all vacancies in the office of district director. They are authorized by the Revised Statutes, vol. 1, chap. 110, sec. 8, to fill vacancies, however occurring, in the office of township clerk and treasurer, and it would be but a fair and legitimate inference that it would also be their province to do the like in reference to the said director, he being a mere ministerial officer, a local assistant in the educational department of their township duties.

The appropriate reply, therefore, to the aforesaid inquiry; seems to be—"the Township Trustees."

Ques. 3.—Must the district director be chosen by ballot?

Ans.—The proper solution of this question involves the inquiry whether a district as defined by the school law, is a corporation in such a sense as to bring the choice of its only officer, as to the mode of election, under the provision of the constitution that declares, "all elections by the people shall be by ballot." If that provision of the constitution refers solely to State and township elections, which seems to be the most natural construction, then the people of a district may legitimately express their preference in the choice of said officer, either by ballot or a viva voce vote, and the validity of said election cannot be successfully questioned on that ground, other proceedings being regular. That either of these modes of voting would be considered legal and in no way impairing the lawfulness of the election, is a natural and legitimate deduction from the fact that the Statute itself expressly *tolerates* some irregularities in the notice required to be given of a meeting, in the absence of fraud. See sec. 104. If the framers of the constitution did not embrace a school district in the scope of their vision when they prescribed to the people and their legislative representatives their respective modes of voting, then we may conclude that the will of the sovereigns in these primary meetings

cannot be thwarted by the mere circumstance that said will was expressed by a viva voce vote and not by ballot.

The conclusion therefore is, that either method is lawful and that the validity of the election does *not depend* on the exclusive use of the ballot.

Question 4.—Are the schools, regulated by the township trustees, free to all unmarried persons over five and under twenty-one years of age?

Answer.—Yes, and married too, if they wish to attend. The specification of age, five and twenty-one years, regulates the limits of enumeration, but was not intended to exclude any *beyond* that limit. The exclusion of married persons, under twenty-one years of age from the school census, goes on the assumption, that their education is completed and that domestic cares would render their attendance impracticable. If however, any, in the matrimonial state, find their education incomplete and have the time and disposition to enlarge their sphere of knowledge by attending the public school, its doors are open to them and they are bid a hearty welcome to its privileges. Some may, from various causes, find themselves, at the age and stature of maturity, with but little or no education. The Commonwealth is interested in their education and has made provision for the gratuitous instruction of all her youth. The adult in stature or years, in intellectual development and attainment, may find himself a mere youth, and therefore he is a proper subject of instruction and a suitable person for admission to our free schools. If such have the time and disposition to make up the deficiencies of early years, surely the State will find it greatly to her interest to furnish the necessary tuition. I respect the individual, who esteems knowledge so highly that he will engage in its "pursuit under such difficulties," and would most cheerfully remove every impediment from his path. On this point our sympathies and the statute perfectly harmonize, for the 23d sec. recognizes the attendance of persons over twenty-one years of age, without any intimation, direct or implied, that matrimony is any bar to their admission. All such, therefore, having the time and inclination to attend the public schools, are entitled to free tuition and bid a cordial welcome to a participation of their blessings.

Ques. 5.—Are township boards empowered, in their discretion, to quarter the teachers upon the inhabitants of the small districts to board, without their consent, or rendering any compensation therefor?

Ans.—That species of public economy has not yet been recognized by the statute, and therefore the policy or practice implied in the above question, is totally unauthorized. It is indeed the more obnoxious, because it involves an invidious distinction between large and small districts, which the law takes special pains to ignore, by requiring the schools in all the districts to be of equal length. The teachers' professional dignity cannot be thus wound-

ed, by being put through the district on the pauper system by the mere ipsedixit of the township board. His compensation, like the lawyers' fees and the doctors' charges, is intended to be a fair compensation for his services and cover all necessary expenses, and therefore the trustees have no authority from the statute to employ a teacher and quarter him on the district for his board and lodging, whether the district be large or small. The *district*, if they choose to make an arrangement with the teacher, *after* his employment by the trustees, to board him, may thereby lengthen their school to the extent of the discount from his monthly compensation, which the teacher may make with them, through their director, for the privilege of being the *guest* of his employers. This is a matter, over which the trustees have no more control nor right to interfere, than they would have over a subscription school. This district boarding arrangement is local, and its advantages must inure to the benefit of the district and not the township. It may be agreeable to some districts, and some teachers may prefer a guest's life and treatment to a boarder's fare. All such matters must be entirely and solely at the option of the parties aforesaid, without any interference whatever, on the part of the township board. It comes not within the scope of their jurisdiction, and no legitimate construction of their official duty will authorize any interference in the premises.

Ques. 6.—Can any part of the school funds be diverted to any other object than for the payment of tuition?

Ans.—No. The second section of the Revised School Law is very clear and definite on this point and need not be overlooked. Township trustees were explicitly and fully cautioned in the Circular of Aug. 10, 1855, against its violation, and apprised of the proper method of correcting any inadvertance that may have heretofore occurred in this department of their duty. That Circular may be found in another part of the Appendix and can be consulted on the point in question.

Ques. 7.—Are the trustees to so divide and apportion the school funds in the township treasury among the several districts, or schools, as shall be necessary to keep up a school for the same length of time in winter and summer?

Ans.—It is their duty to employ a teacher for each and all the districts an equal length of time, with a wise reference to the wants and wishes of each district as to the season of the year they would prefer to have their school taught. The trustees, however, must exercise a proper discretion in all cases. If the funds be sufficient only for a three months' school, it must be at a season that will best suit the older scholars, for the obvious reason that their school period is rapidly drawing to a close, and, with many, may terminate with the current session. The law recognizes no numerical division of the school funds to specific districts, but requires the trustees to appropriate them annually, so as to secure to each district an equal term of tuition. If, from any unavoidable cause, a school should not be taught in a given district in

any one year, it is just and equitable that said district should have its loss made up the next year. If trustees manage affairs rightly, such cases will be of rare occurrence, and when they do happen, the necessary amount of funds will be in the treasury, for a township board would be very indiscrete and unwise, nay, culpable, to expend all the funds on the schools in session, while one or more districts were unprovided with teachers.

Ques. 8.—Is it optional with the trustees to appropriate only a portion of the funds to the continuance of free schools, or is it their duty to expend the whole amount in the treasury every year for the maintainance of free schools in the several districts in their respective townships?

Ans.—The statute contemplates nothing else than an annual appropriation of all the school funds of every township, except in cases described in the answer to the previous question. The trustees have no authority to defer the appropriation of said funds to the succeeding year, except in the aforesaid cases of unavoidable necessity, which will very seldom occur; nor are they required to appropriate them in advance of their reception by the township treasurer, which is the policy pursued in many corporations, an unfailing source of perplexity and embarrassment to the board, and no small detriment to the cause. This custom of anticipating the funds should be abandoned at once, and the cash system take its place hereafter.

Ques. 9.—Can a district director hire a teacher?

Ans.—No. It is no part of the proper functions of his office to hire a teacher. All he can legitimately do in the matter, is to assist in procuring an instructor for his district. He may provide a suitable person for the position and present him to the board for employment. They may, or may not, hire him. The law says that the director may “under their direction provide suitable teachers therefor.” “Provide,” not hire, is the word used, so that there should be no conflict with the language in section 8, where it is made the trustees’ duty to “employ” or hire the teachers. “Under their direction,” is a phrase that more than intimates his power in the premises. Should they not need his services, where is his authority to act? Should they be called in requisition, are not their limits and character clearly defined? He is merely a ministerial officer, charged with certain specified duties of a local character, designed to relieve the trustees entirely of a portion of the labor previously devolving on them, and to assist them in the discharge of another portion of their duties of a more grave and responsible character, should they desire assistance. If he can employ or hire a teacher, what necessity, or indeed, propriety, is there of the provision contained in sections 105 and 107, securing to the majority of the inhabitants of districts the enjoyment of their preferences in certain cases therein named, and compelling the trustees to employ, or hire, the specified teacher, if their director is clothed with that authority, or can he be invested with that power even by the township board themselves?

Ques. 10.—What course shall the trustees adopt in providing schools for an equal length of time in all the districts, each containing from twenty-five to one hundred or more pupils.

Ans.—Make no engagement of teachers till the school funds are in the township treasury. Knowing the precise amount of your educational means, you can act intelligently without any embarrassment to yourselves, or detriment to the cause. Make no distribution of the funds to the districts, either on the equality or census basis. They have no authority to receive or disburse educational funds, nor the Board to make any such apportionment of the school money. Spare no pains to procure competent teachers, male or female, or both, for each of your districts, according to the best of your judgment, having a wise reference to the character and necessities of each of said districts. You are now prepared to make a contract with your employees as to the period of their service, knowing the aggregate of their compensation per quarter, of sixty-five days. Reduce this contract to writing, specifying the length of the school and the compensation for said period. Assign to each district the appropriate instructor, unless the wishes of the district, made known according to section 107, have relieved you. Transact all this business of employing teachers as a Board, and at stated meetings. Look well to the moral character and habits of the proposed teachers, that there may spring up no element of disturbance from this source. Visit the schools yourselves, in company with as many parents as you can induce to join you, so that you and they may have personal knowledge of the character of the schools and the competency of the teachers. Entertain no charge against an instructor without responsible names. If these charges are worthy of notice, seek a settlement of the difficulty, if personal, by a private interview of the parties, if of a grave and public character, by a prompt and thorough investigation of the grounds of them. Never dismiss a teacher on mere rumor, or party clamor. The grossest injustice is often done to individuals and permanent injury to the cause, by such hasty action, and the Board expose themselves to the liability of a legal process on the part of the injured party for redress. The imperative language of the statute in the last clause of the 107 section, must, in the very nature of the case, be taken in a restricted and not an absolute sense. Its peremptory character should be regarded as intended rather to disturb the masterly inactivity of indolent, careless and obstinate township boards, than to require them to violate their contract with the teacher. Any other construction of the statute would bring it at once in conflict with the constitution and render it null and void. No law, impairing the validity of contracts, has any force or binding obligation, and therefore said clause must be so construed, or it becomes a nullity. A petition, without reasons in its support, is nothing else than an arbitrary demand, and one with weak, insufficient or unsatisfactory arguments in its behalf, imposes no obligation on the board to grant the prayer, but rather the re-

verse. All the moral and indeed legal force of a petition depends on the superiority of the reasons that can be alleged in its favor over those that can be adduced in opposition. The statute requires a petition, a formal, deliberate action based on good and substantial reasons, on the part of the district, which necessarily implies a careful scrutiny and an impartial consideration of their pertinence and weight by the trustees. To say that the board shall dismiss said teacher, even if the petitioners fail to show good cause for it, is to confound all distinction between right and wrong and completely unsettle all correct notions of petition. The aforesaid petition virtually becomes a suit and the township board a court for its trial. What could be more preposterous, absurd and unjust than to require said court to pronounce its decree on *ex parte* evidence, and indeed without any evidence, or even the presence of the accused, if the language of the statute is to be understood literally and its requisitions regarded as absolute? The teacher has rights as well as the district, and they must not be ignored. The contract, by which he becomes the teacher of a given school, can not be thus unceremoniously dissolved. If there is good cause for the dismissal, let it be shown, and then the court will have good and substantial reasons for prompt action in the premises and a valid defence against any suit that may be brought by the ejected teacher. The board, that is guided by the lynch code principle, are in danger of not only having their decisions reversed, but also of receiving an invitation from the dismissed instructor to make good the pecuniary obligations of said contract, that they will not feel at liberty to decline. All such unpleasant results can be avoided by a wise and judicious selection of teachers, frequent visitation, and kind but prompt action on the discovery of radical defects in any of your corps of instructors.

If the trustees are unable to procure teachers for all their districts, let them reserve for such an equitable portion of the funds sufficient in their judgment to secure for said districts a school of equal term and quality with the others. Let the course, indicated by the foregoing remarks, be pursued, uniformly and promptly, and there will be little or no trouble, or occasion for complaint. It will require labor and care, firmness and patience. If trustees are not prepared for them, they have mistaken their calling, their own peace and the public good demand their prompt retirement to unofficial life.

Ques. 11.—Is an examiner authorised to give a certificate of literary qualifications to any one of doubtful moral character?

Ans.—No. He is a very prominent and important conservator of the public welfare and guardian of the public morals, and he would be in the highest degree culpable for sending forth into the community a man of immoral habits, or even questionable character, bearing his license to teach. The 145th section must be a guide to him in estimating the applicant's qualification, as well as to the trustees. The statute specifies the moral and literary stand-

ard, and the examiner must regard the whole man and take into the account all that the law contemplates, before he issues his license. If the trustees are expressly forbidden to employ teachers of immoral character, it is both a natural and legitimate sequence that the examiner is neither required to examine, nor authorised to license any such persons. It is therefore an obvious and imperative part of the examiners' duty to satisfy himself that the applicant is not destitute of the moral basis, nor deficient in the literary attainments contemplated by the statute.

Ques. 12.—Are township trustees obliged to levy taxes for the erection of school houses till the corporation is furnished ?

Ans.—Most assuredly. It is their imperative duty, which cannot be ignored or neglected without rendering them liable to prosecution under the provision of the 19th sec. of the school law. The State provides the tuition and pays over to the township authorities their pro rata portion of the school funds, in unquestioned confidence, that the townships will fully and promptly furnish the necessary houses, furniture and fuel. To neglect to make all legal provisions for those educational concomitants, is manifest, gross and inexcusable dereliction of duty, that should be speedily visited with appropriate retribution. Refusal to levy the requisite tax in accordance with the provision of the statute, is sufficient cause for instant removal from office. It is nothing short of practical nullification, which applied to other departments, would stop the wheels of government at once. If any have erred in this respect, no time should be lost in regaining the path of duty.

Ques. 13.—Who are the legal voters at the district meetings ?

Ans.—All persons living within the geographical limits of the district, or have become attached thereto by transfer from other townships, who are entitled to vote at the township elections, are legal voters at the district meetings, whether married or unmarried. Matrimonial relations and family responsibilities are not indispensable qualifications for the district voter, as many have supposed. Though they are valuable pledges of a judicious use of the elective franchise both in the district and township, yet the absence of them is no bar to the possession and exercise of that peculiar prerogative of popular sovereignty in these primary corporations.

APPENDIX NUMBER VI.

Exhibit of the original cost of the Township Library Books, and the expense of their transportation and distribution.

A brief historical sketch of the library feature of our system may very properly precede the financial exhibit of the receipts and expenditures. The law of 1852 imposed a tax of a *quarter of a mill* on the property, and an assessment of *twenty-five cents* on the poll, for the purpose of establishing a library in every civil township in the commonwealth. This tax was limited to the period of two years. The assessments for the aforesaid purpose, during these two years, amounted to \$186,327. The amount realized from that levy was \$176,336, leaving a delinquency of only \$9,991. The Revised School Law of 1855 provides for a similar levy for only *one year*, which will amount, according to the data found on page 54, of the Auditor's Report, viz: \$301,858,474 of property and 178,877 polls, to the handsome sum of \$123,183. The uncertainty incident to such legislative restriction is enough to damage the reputation and interests of even the best of causes. Were a similar policy adopted relative to any other great interest of the State, it would be deemed unwise and ruinous in the extreme. It is however to be hoped that such expressions as the following, will not be lost on the public mind: "Nearly all the books have been drawn out as much as *twenty-five* times, many of them oftener, and quite a number of the books are not permitted to remain in the library an hour before they are withdrawn." Says another: "Our library is doing more good than anything that has ever been done by the Legislature of this State. Great interest is manifested in it here." The latter remark represents the state of things in a rural district in the oldest county in the State, and the former portrays the condition of the library enterprise in a large river city in the "Pocket." The number of volumes embraced in the purchase, and distributed to the townships, is *two hundred and twenty-six thousand two hundred and thirteen*.

The following exhibit presents the various bills composing the aggregate expense connected with the purchase and distribution of the aforesaid libraries:

Messrs. Harper's bill for books, binding, printing catalogues, circulars, rules and regulations, labels, boxes, packing, drayage, storage and insurance...	\$115,986 53
Charles Scribner's bill for books.....	26,726 32
J. S. Redfield's bill for books.....	2,507 03
G. E. Warring's bill for books.....	262 58
Messrs. Sheets & Braden's bill for books.....	700 00
H. W. Derby's bill for books.....	1,210 30

Professor Larrabee's bill for cash, paid out in expenses of examining, selecting, purchasing, cataloguing, assorting and shipping books for Indiana School Library.....	1,085 38
Railroad charges for the transportation of 2,073 boxes of books from New York to Indianapolis.....	3,057 08
The actual expense of the library distribution to the counties is not yet ascertained, and therefore it cannot be known till the final settlement with the agent, H. F. West, whether the cost of said distribution will fall short, or exceed the sum drawn from the treasury for that purpose,.....	2,800 00
Total of the above bills.....	<u>\$154,335 22</u>

The annexed catalogue of books, with prices appended, is made according to the classified arrangement adopted in packing them in the boxes, marked A. B. and C. This will enable township boards to inform the Department what books they have received, without the trouble of enumerating the several works, where the division of libraries was made by boxes, as it was in most cases. It will be desirable hereafter to complete the aforesaid libraries, to a great extent, for the corporations now having only fractions of the same. Hence the propriety and utility of the arrangement of the following list.

The cost of the work, whether it consists of one or more volumes, will be given, and the number of volumes composing it. The trustees in determining the damage done a work must add *ten* per cent. to the price given in this list, to cover the expense of transportation and distribution. The price attached to each work is the cost of the same in New York. Great care should be taken, both by the township board and the librarian, to preserve the books and secure good usage of the same by those taking them. It is expected that \$90,000 worth of books will be distributed to the townships the ensuing summer, varying from five to more than two thousand dollars each, according to population. This addition will impart new life and interest to the enterprise, as well as enlarge its capacity and power for usefulness.

TOWNSHIP LIBRARY.

A copy of the following works has been placed in the library of each of our civil townships, viz: Barnard's School Architecture, and I, II and III Reports of the State Board of Agriculture. Seven hundred copies of Dillon's History of Indiana has been added to the previous catalogue. By some oversight in arranging the number of copies of the Acts and Documentary Journal of 1853-4 to be printed, no provision was made for the supply of these documents to the township libraries. Copies of the aforesaid documents for 1855 were not in readiness last summer, at the time of distributing the agricultural and architectural works above named, but they will be distributed at an early opportunity.

It is to be hoped that the township clerks will neither overlook, forget, nor neglect to append to the report required from the township board by sections 11 and 25 of the Revised School Law, the following item, viz: the *number of books taken from the library* during the year ending Oct. 1, 1856. This is very important information and will furnish the basis for an irresistible and unanswerable argument in favor of the continuance of the present homeopathic provision for the annual increase of the township libraries, and also prompt their friends, in every corporation, to press the next Legislature with *petitions* for the perpetuity of this feature of our Educational System.

PREMIUMS FOR SCHOOL STRUCTURES, FURNITURE AND APPARATUS.

The detention of this Report, in its passage through the press, furnishes an opportunity of presenting the final action of the State Board of Agriculture, on the subject of premiums for superior school architecture and corresponding furniture. The following list has been adopted:

For the best high school building, complete and ready for occupancy, including external finish and internal arrangement, embracing, also, enclosure, facilities for ventilation, completeness and economy of heating the same, a copy of Colton's Atlas of the World in 2 vols. folio, valued at \$27 00 will be given as a premium.

Competitors for this premium must submit a perspective view of their building, plat and inclosures, accompanied with ground plans of the several floors, with a section exhibiting the ventilation and heating arrangements, together with the external dimensions of the edifice, its several stories and apartments.

For the best rural school house, complete and ready for occupan-

cy, including external finish and internal arrangements, embracing also, a lot containing not less than a half an acre of land, the enclosure of the same with appropriate out buildings, facilities for ventilation, completeness and economy of heating the same, a pair of globes valued at \$25,00, will be given as a premium.

Competitors for this premium must submit a perspective view of their building, lot and enclosure, accompanied with ground plans of its school floors, with a section exhibiting the ventilation and heating apparatus, together with the external dimensions of the edifice, its several stories and apartments.

For the best high school furniture and apparatus, including desks and chairs for teachers and pupils, blackboards, maps, globes and other geographical, astronomical and philosophical apparatus, in value not less than \$100, a copy of Smith's Dictionary of Greek and Roman Biography and Mythology in 3 vols. 8 vo., valued at \$15,00, will be given as a premium.

For the best rural district school furniture and apparatus, embracing chairs and desks for teachers and pupils, blackboards, maps and other geographical and astronomical apparatus, in value not less than \$50,00, a copy of Webster's Quarto Dictionary and Lippincott's Gazetteer, valued at \$10,00, will be given.

Competitors for the aforesaid premiums must furnish the committee of award a perspective view of their respective school rooms, exhibiting said furniture and apparatus, as far as practicable.

It may very properly be asked, how can districts compete for such premiums, since the school houses are all erected and furnished at the expense of the township and under the supervision of the trustees, whose duty would require them to adopt a uniformity of plan, finish and furniture, that would forbid all idea of competition for such premiums on the part of individual districts? It can be done in the following manner, which was doubtless the method contemplated by the State Board in offering the aforesaid premiums. The people of a given district, if they wish for a superior structure and corresponding furniture, may say to the trustees, we will furnish the extra means to erect a school house of improved model, and provide apparatus and furniture to match, if the Board will give us our due share of the school house erection fund and permit the district to build the house on their own plan. Thus the way for competition is open, and the inducements for prompt and liberal action neither few nor small.
